## EXPOSITION TRAVEL.

WHAT THE RAILROADS ARE WILLING TO DO.

Low Excursion Rates Will Be Made on Condition That Buffalo Will Prohibit Ticket Scalping—Serious Loss of Regular Revenue.

Buffalo's Pan-American exposition, the opening date of which is set for May 1, 1901, will unquestionably be one of the grandest affairs of the kind ever held. The managers of the fair hope that in attendance it will equal if not excel the White City of Chicago, and they are straining every nerve to boom and advertise their show and induce people to visit it. It is, of course, to the interest of the railroads of the country to have the attendance as large as possible, not only because of the revenue to be derived from the sale of transportation, but also because they expect to share in the general prosperity to be induced by the exposition.

It will be therefore to the interest of the railroads to make the round trip rates to Buffalo during the exposition as low as possible, and this they intend to do, provided—and this is a most important provision—that they are protected from ticket brokers. Should the railroads entering Buffalo make greatly reduced rates for the round trip there is now almost nothing to prevent Buffalo ticket brokers or "scalpers" from buying the return tickets and selling them to regular passengers, thus causing much loss to the railroads. The "scalpers" would have a feast ready provided for them unless the roads were protected from such speculations. This question has often arisen in the past and is one of the most serious consequences to the railroad world.

Mr. George H. Daniels, general passenger agent of the New York Central, who takes pride in being the head and front of the movement against ticket "scalpers," says that the railroads must

receive definite assurances of protection before reduced rates are decided upon. According to Mr. Daniels and other authorities, among them Mr. L. P. Farmer, commissioner of the passenger department of the Trunk Line association, the remedy lies with the city of Buffalo.

Buffalo's city council can, if it will, according to these gentlemen, follow the examples of Detroit, Nashville and other cities in which expositions have been held and pass an ordinance prohibiting ticket scalping in Buffalo during the Pan-American exposition. Should the railroads decide to make reduced rates to the exposition without such or similar protection their loss would undoubtedly be very great. A number of trunk lines enter the exposition city, and each would lose thou-
