A REVOLT AGAINST PROTECTION.

That very influential and important organization, the National Association of Manufacturers, with its headquarters at Philadelphia, has resolved on a new and radical departure that may mean much in the future tariff policy of the country.

Although I have been a protectionist all my life, I am confident that the time has come when we must extend the principal of reciprocity, and make commercial treaties with other nations if we wish to maintain our present position or reach the goal we are aiming at.

This is a strong argument for tariff reform and a sweeping reduction in our present high rate of duties. Labeling it reciprocity does not change the facts.

Our manufacturers, with a great marketable surplus, have at last discovered the truth that we cannot sell our goods in other countries unless we buy goods from other countries.
