A SENSIBLE SUNDAY NEWSPAPER.

So Promises the Sunday North American, the First Number of Which Appears Next Sunday.

The North American announces that on September 25th it will begin the publication of a Sunday edition containing a full metropolis paper an issue every day in the year and The North American is sensibly obeying that demand. Rumors of this innovation have already been heard and interest and speculation as to what it will be like is keen. The North American, when it does anything, does it better than any one else, and in the matter of a Sunday paper the same rule is expected to apply.

For one thing, The North American promises that its Sunday Edition will be "different." The standard of text and illustration will be as high as that of any monthly magazine. It will not be "cheap" in any sense. It will not magnify the trivial, neither will it make heroic out of the silly and the commonplace. The North American's motto is, "A sensible Sunday newspaper," and if it is such it certainly will be different and welcome.

It will be, of course, to be interesting and entertaining. That goes without saying. The special writers and artists are of the first rank—and the magnificent mechanical equipment of The North American insures perfect printing.

As to the details of the paper itself, this much is known. There will be four colored supplement in addition to the news sections and sheet music. There will be a supplement of eight pages in color, devoted exclusively to woman's interests, a comic section of four pages in color, a magazine section of twelve pages in color and a sixteen-page supplement in color explaining the involved and varied processes of making a newspaper. The sheet music will be like that on sale in music stores in every part of the country. The first Sunday North American will probably consist of seventy-six pages, of which thirty-two will be used for text.

A HOME IN THE SOUTH.

Escape the rigors of another Northern Winter and enjoy the delights of the Southland.

Nowhere can be found a more delightful climate than in our own Southland. Its winters are mild and balmy and in most cases Summer does not bring with it such extremes of heat as are found elsewhere. In fact, the South is a land where extremes of climate are avoided, and consequently, is a healthful and altogether desirable location.

The tide of emigration has turned Southward, for it is now alone in climatic advantages that this favored land excels, but its resources, the fertility of its soil and its mineral wealth and abundant water power commend it to the thoughtful consideration of any one who seeks a home where Northern thrift and enterprise may carve out success.

The Seaboard Air Line Railway, in order to stimulate investigation and to assist in opening up the fine territory traversed by its lines, announces that it will sell to prospectors and settlers, tickets one way or round trip, at greatly reduced rates, information as to which may be obtained of any agent or representative of the Company.
