HANDLORD LOSES OVER \$225 00.

S. B. Shaffer, Proprietor of the Old Fort Hotel, is Out His Money Kept in a Smokehouse.

S. B. Shaffer, proprietor of the Old Fort Hotel, is out of pocket \$225 00, which he placed in the smokehouse for safe keeping. The Old Fort was doing a rushing business Thursday of last week, and the proprietor made a chest in the smokehouse his place of deposit for cash. It was frequently necessary for Mr. Shaffer to change bills of ten and twenty dollar denominations, and if the money drawers of the hotel did not happen to have that amount of change, the landlord went to his "vault" for the necessary. It is supposed that these maneuvers created suspicions that Mr. Shaffer had a pile of money somewhere about his premises and that the thief watched an opportunity and investigated to his own satisfaction.

The robbery proved an easy job. The smokehouse was broken into and the tool chest sprung open, and the money consisting of notes, gold and silver, was hurriedly carried away. The robbery was committed, according to Mr. Shaffer's story, in broad daylight, between two and four o'clock in the afternoon. A detective was sent for, but all that could be done was to look sorrowfully at the empty chest, and hope the thief might be caught.

The affair created considerable excitement at the time, and a variety of stories, conflicting in many ways were circulated. Some are even so cruel as to say that the whole affair is a fake, but Mr. Shaffer declares the robbery to have taken place.

TROLLEY LINE FOR MILLHEIM

The Lower End of Penns Valley to be Connected by Electric Locomotive Power.

A Millheim correspondent who is enthused over the prospects of a trolley line being constructed to connect Coburn, Millheim, Aaronsburg, Rebersburg, Madisonburg and Penns Cave writes that negotiations are being made to secure the necessary timber, such as poles and ties, and that construction on the line will begin in less than a month.

The power house is to be built as soon as the necessary timber and other material can be secured. The location for the power house is along Elk creek, which is to be dammed and harnessed to furnish the power necessary to run the dynamo which in turn will furnish the power to chase the trolley cars and to light adjoining towns. It is the purpose of the company, of which J. W. Messer is the moving local spirit, to combine passenger and freight traffic.

The correspondent further adds that Penns Cave is to pass, into other hands, and that the surrounding acres will be converted into a most beautiful park, and that a new hotel will be erected, the cost of which improvements will only be a secondary matter.

The Reporter hopes the above will materialize, and that by next New Year lower Penns Valley will regularly hear the clangs of the trolley bells. The Reporter assures its readers that when the trolley line is completed to Penns Cave and that magnificent hotel mentioned is completed, it will give to its subscribers and their families a week's free entertainment, including transportation over all railroads and trolley fare. The event must be properly celebrated and be national in importance.

The Reservoir.

The reservoir is full of water! There are ten to twelve feet of clear, blue water constantly in the borough reservoir. The wall placed along the breast of the reservoir is a splendid piece of masonry, and was constructed under the supervision of B. D. Brislin. The wall extends about one-third way around the reservoir, the balance being left in its original state. It is the purpose of the borough authorities to extend the wall when occasion demands, but for the present it is not deemed necessary.

IMPROVEMENTS IN SPRING MILLS.

Fine Business Place and Private Dwelling Houses Erected.

Among the numerous improvements made in Spring Mills during the past summer, besides the remodeling of quite a number of dwellings, is the very imposing and spacious building erected by Smith & Bro. for their extensive furniture business. The building is one hundred by fifty feet and three stories high. The first floor all in one room, has a floor surface of 2900 square feet; the floor surface of the entire building is about 6000 square feet. The first floor is very handsomely finished in hard wood and polished like a mirror, has all the modern conveniences and is well lighted. This is a sales room and for the display of furniture; here too are located the offices, one for the general business of the firm, and the other exclusively for business connected with funerals. The second floor is used for storage and duplicate; a room is also partitioned off for the repairing department with all the necessary machinery and fixtures. The third floor is fitted up for the lodge rooms and can be used for the town hall. At the west end of the building is a passage way and entrance exclusively for receiving and the delivery of goods. Wagons can enter this passage way directly under a large hatchway, and be loaded and unloaded without any delay. John Hogan the well known contractor and builder, of Farmers Mills, had entire charge of the building, which is equivalent to saying that everything connected with the structure is of a very substantial character.

Another improvement at Spring Mills is the very beautiful residence erected by Ambrose Gelzert. The dwelling contains ten large airy rooms and all are finished in oak and the ornamentations are of an elegant and artistic character, a very attractive and spacious portico on the south and east sides adds greatly to the beauty of the building. Mr. Gelzert has also introduced into his residence many of the modern conveniences and improvements, as stationary wash stands, bath room, hot and cold water, so that for convenience and attractiveness, Mr. Gelzert has a home second to none in the village.

C. P. Long, merchant and lumber operator, is also erecting a very pretty room residence on the Avenue, which is rapidly approaching completion. This will be the fourth dwelling Mr. Long has erected on this splendid thoroughfare.

George Huss, boot and shoe maker, is also erecting almost a new dwelling, his old residence he had removed from its original site, dug a cellar and built a very substantial wall, upon this foundation he will place his residence. The dwelling will be thoroughly remodeled, and about the only thing of the old house will be the frame.

William E. Dodge, of Williamsport, a well known base ball player, has unexpectedly fallen heir to a fortune of \$100,000, two-thirds of which is in cash and the balance in real estate. Nothing was heard from him until a few months ago, when a letter was received from R. J. Baldwin, an attorney at Seattle, Washington stating that Mr. Dodge had died in that city leaving a large estate, and that the writer was trying to locate his local heirs.
