Promptly cures all

Headaches

Save Your Eyes.

If your eyesight is good, take care of it. Look away off yonder every time you get to the bottom of a page in reading. If it is defective, let no foolish pride prevent you from wearing the proper glasses.

There is no sense in handicapping yourself in life when a piece of glass before each eye will make your vision as good as it possibly can be. The oculist will not advise you to wear glasses if you do not need them more than he will prescribe a drug you do not need.

Plenty of people, though, do not know that they have defective sight because they have never really seen at all. They have headaches, inflamed eyes, sties, even much graver troubles, from the strain of trying to see with eyes that were put up wrong. There are cases where homicidal insanity has been completely cured when impaired vision has been corrected.

Dyeing Long Age

In the dyeing of cloth the ancients possessed not a whit less excellence than the people of today. Specimens of old tartan have retained their hues in their original brilliancy after the lapse of nearly two hundred years. With the use of native plants, such as the bark of the alder for black, and that of the willow for flesh color, rue for red, crota or cudbear from lichens for brown or purple, torment roots and weather sprigs for yellow, the women on almost every farm on Lochtyside were competent to produce remarkably fine and durable colors.

COMMERCIAL REVIEW.

General Trade Conditions.

R. G. Dun & Company's "Weekly Review of Trade" says:

"Aside from prevalence of strikes and possibility of further interruption to industrial activity next month on this account, the business outlook is most gratifying. Despite some unfavorable weather, eastern retail trade has been heavy, and jobbing activity in Summer fabrics indicates expectation of a vigorous consumption as the season advances. There is less complaint regarding deliveries due to better traffic facilities. Railway earnings in March increased 13.8 per cent, compared with last year, and 2.1 per cent compared with 1901.

"In the textile industries there are still adverse factors, notably the labor controversies at cotton mills. Beyond a moderate revival of export purchases for China, there is no increase in the sales of cotton goods, both sellers and buyers awaiting some more definite information as to the future.

"Wool has been fairly steady since the month opened, but none of the March decline is recovered. New business is small at eastern shoe factories, but this is reasonable and no apprehension is felt. Moreover, current shipments are much heavier than a year ago, and activity is assured for at least two months after work begins on Fall contracts. Domestic hides have lost part of the recent recovery, and imported skins are also somewhat cheaper.

"Staple products develop irregularly as the season advances, and speculation has again become a prominent factor. Failures this week numbered 197 in the United States, against 198 last year, and 15 in Canada, compared with 19 a year ago."

[An interesting letter concerning Pe-ru-na.]

Miss Della Janveau, Globe Hotel, Ottawa, Ont., is from one of the oldest and best known French Canadian families in Canada. In a recent letter to The Peruna Medicine Co., of Columbus, Ohio, she says:

"Last spring my blood seemed clogged up, my digestion poor, my head ached and I felt languid and tired all the time. My physician prescribed for me, but a friend advised me to try Peruna. I tried it and am pleased to state that I found it a wonderful cleanser and purifier of the system. In three weeks I was like a new woman, my appetite had increased, I felt buoyant, light and happy and without an ache or pain. Peruna is a reliable family medicine."
