Safe Investment.

Are there any among our customers, or among those who are not our customers, who would not take an entire day in finding out all about the value of a bond, or the worth of a man with whom he is going to risk the small sum of \$1,000, and it is right that he should, for it is easier to lose money today than it is to make it, and any good business man thinks well before he enters into an investment. But how often do we see people careless in all matters pertaining to their business life, except in buying goods. They go into it thoughtlessly, paying any price, buying where credit is given, helping to pay some one's bad bills, simply being negligent in the most important investment when you buy a bill of merchandise you are investing your money just as truly as you are when you buy a bond.

We are in a position to save you money on your investment. From the fact that we sell only for cash, pay no rent or drayage, have no bad accounts, is it not plain that we are in a position to save you money.
