The jury in the trial of William Rasmus, for the killing of Patrick Sharpe, at Nesquehoning, on August 18, 1902, returned a verdict of not guilty. The jury deliberated only ten minutes. Rasmus related the story of the shooting exactly as he told it in the McElmoye trial, saying that he thought Sharpe was about to kill him, and that he shot in self-defense.

A proclamation was issued by Superintendent of Public Instruction Schaefer designating Friday, October 16, 1903, as Autumn Arbor Day, and asking school superintendents, teachers and pupils to observe the day by the planting of trees and by other suitable exercises.

The incendiaries who in the last few weeks have set fire to and burned five barns in Adams county have so far escaped detection. The Adams County Commissioners offered a reward of \$500 for information leading to the arrest and conviction of the firebugs.

Final notice was served on the Lebanon township supervisors by Judge Ehrgood, that unless they keep the roads in their respective districts in proper repair, they will be prosecuted. For years constables in making their returns to court have reported roads out of repair. Judge Ehrgood was prompted to issue the ultimatum upon the agreement of counsel, whereby the trial of Samuel Blecker and Samuel Lauch, supervisors of Heidelberg Township, for official neglect of duty was discontinued and the case continued to the December term.

Fire destroyed the blacksmithing and wheeling shops of Christopher D. Willis, at Seventh and Potter streets, Chester, entailing a loss of \$7000 on building and contents. A row of houses was in danger for some time. The loss is partially covered by insurance.

The United States Government is a plaintiff in a case called before Judge Shay at Pottsville. The suit is brought to recover \$771 from Harry Knerr, of Pottsville, who had the contract for the erection of the new Altoona postoffice. A note was given the Hummelstown Brownstone Company for granite furnished, which, it is said, was protested.

Alice Curry, of Philadelphia, and Minnie Merritt, of Michigan, were arrested at Bethlehem, charged by Alfred Mill, of West Bethlehem, with kidnaping 9-year-old Minnie Daniel, his adopted daughter. The women said they wanted to get possession of the girl and take her to her aunt, in Michigan. Justice Haus reserved his decision.

Mrs. Mary Faboviz, of South Scranton, was badly burned in a fire which partially destroyed her home in that city. The woman was found lying on the grass in the yard when the firemen arrived. She said she had been attacked by a man when she opened the kitchen door. The man, she said, struck her full in the face with a blazing torch made of rags saturated with oil. The flames spread to her garments and then to the house.

COMMERCIAL REVIEW.

General Trade Conditions.

R. G. Dun & Company's Weekly Review of Trade says:—Business has made moderate progress during the past week, despite unusual opposition from the elements. When all other industries are to a considerable degree dependent upon agricultural conditions, reports of serious injury to crops by cold and wet weather are not calculated to stimulate confidence. Subsequent corrections indicated that the amount of damage had been exaggerated, as usual, and prospects brightened. Manufacturing plants are well occupied as a rule, even the textile mills reporting less idle machinery, and at Chicago there is notable pressure on implements and hardware. Lumber is in better demand as structural activity revives. Payments are seasonably prompt except where late crops delay settlements and the outlook for Fall and Winter business contains much that is encouraging.

Bradstreet's says: The outlook for average crops is still a good one. Nothing in the nature of actual shortages, such as occurred in 1901, is indicated, and while trade opinion probably inclines to the view that the boom is over in several industries, none the less the belief is maintained that a good average Fall and Winter trade is in prospect.

WORN OUT, DRAGGED OUT,

Are Most Women in Summer —Pe-ru-na is a Tonic of Efficiency.

JOSEPHINE MORRIS, 236 Carroll St., Brooklyn, N. Y., writes: "Pe-ru-na is a fine medicine to take any time of the year, but I have found it especially helpful to withstand the wear and tear of the hot weather. I have taken it now for two summers, and feel that it has kept my system free from malaria, and also kept me from having that worn-out, dragged-out look which so many women have."

"I therefore have no hesitancy in saying that I think it is the finest tonic in the world."—Josephine Morris. Pe-ru-na is frequently used as a mitigation of the effects of hot weather. What a bath is to the skin, Pe-ru-na is to the mucous membranes. Bathing keeps the skin healthy. Pe-ru-na makes the mucous membranes clean and healthy. With the skin and mucous membranes in good working order, hot weather can be withstood with very little suffering. Frequent bathing with an occasional use of Pe-ru-na is sure to mitigate the horrors of hot weather. Many ladies have discovered that the depression of hot weather and the rigors they have been in the habit of attributing to malaria quickly disappear when they use Pe-ru-na. This is why Pe-ru-na is so popular with them. Pe-ru-na provides clean, mucous membranes, and the clean mucous membranes do the rest.

If you do not derive prompt and satisfactory results from the use of Pe-ru-na write at once to Dr. Hartman, giving a full statement of your case, and he will be pleased to give you his valuable advice gratis. Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

An Arctic Railway.

The most northerly railway in the world was opened a few weeks ago. For its whole length it lies within the Arctic regions. The greater part of it is in Swedish territory, and only a small part cuts through the narrow portion of Norway until it reaches the Norwegian harbor of Narvik. The chief object of the line, which now connects the northern Baltic with the Atlantic, is to open up the rich mineral resources of North Sweden and to carry them cheaply to Narvik. The new railway, which will be known as the Otten line, is about one hundred and forty miles long, and costs about one and a half million pounds. That part of it which cuts through Norway is about twenty-five miles long, and cost over half a million. The Norwegian section of this Arctic railway runs through territory altogether uninhabited, and is one of the most difficult pieces of railway engineering in the world. In this short distance there are sixteen tunnels, the longest of which is about twenty-one hundred feet.

Mrs. ADDIE ANDREWS, R. F. D. No. 1, Broome, Wis., writes: I received the free trial of Doan's Kidney Pills with much benefit. My little nephew was suffering terribly with kidney trouble from scarlet fever. Two doctors failed to help him and he finally went into spasms. His father gave him Doan's Kidney Pills and from the second dose

The Origin of Pyrography.

About a century ago an artist named Cranch was standing one day in front of a fire in his home at Axminster. Over the fireplace was an oaken mantelpiece, and it occurred to Cranch that this expanse of wood might be improved by a little ornamentation. He picked up the poker, heated it red hot and began to sketch in a bold design. The result pleased him so much that he elaborated his work and began to attempt other fire pictures on panels of wood. These met with a ready sale, and Cranch soon gave all his time to his new art. This was the beginning of what is now known as pyrography. The poker artist of today uses many different shaped tools and has a special furnace in which they are kept heated. The art has been elaborated greatly. The knots, curls and fibres of wood are often worked into the design and delicate tinting produced by scorching the panel.

Since the great volcanic disturbances in the Windward Islands it has been impossible to maintain unbroken cable connections between the islands of Martinique and Guadalupe, and the French government has established a wireless telegraph service between the two. Mrs. Tressie Nelson, 422 Broad St., Nashville, Tenn., writes: "As Pe-ru-na has done me a world of good, I feel in duty bound to tell of it, in hopes that it may meet the eye of some woman who has suffered as I have. For five years I really did not know what a perfectly well day was, and if I did not have headache, I had backache or a pain somewhere and really life was not worth the effort I made to keep going. A good friend advised me to use Pe-ru-na and I was glad to try anything, and I am very pleased to say that six bottles made a new woman of me and I have no more pains and life looks bright again."—Mrs. Tressie Nelson.
