

In Love with Senator Frye!
They are telling this story at Poland Spring on Senator Frye. Many years ago Frye was attorney for a brother of Sister Aurelia, the Shaker sister—saintly woman of such sweet and serene life. Sister Aurelia has never forgotten it and a friendship has been lifelong between the senator and the Shaker. The other day Sister Aurelia came over to Poland Spring for her usual sale in the hotel office. One of the first callers was Frye, who thought to crack a joke in the presence of a few friends on the blushing sister of close to three score and ten years. "Sister Aurelia," said the senator, "now tell us truly—no joking—were you ever in love with any man?" The sister looked up quickly and with a pretty twinkle under the gray bonnet, said: "If I ever was in love with any man, it was with Senator Frye." The laugh went around the company, and pretty soon every one at Poland was telling the story.

It is the body which gives beauty to the clothes, and not the clothes to the body, and it is the soul which gives character and meaning to both.

QUICK RESULTS.

W. J. Hill, Concord, N. C., Justice of the Peace, says: "Doan's Kidney Pills proved a very efficient remedy in my case. I used them for disordered kidneys and backache, from which I had experienced a great deal of trouble and pain. The kidney secretions were very irregular, dark colored and full of sediment. The Pills cleared it all up and I have not had an ache in my back since taking the last dose. My health generally is improved a great deal."

George Ward, of Philadelphia, was a party to a street chase in Pittsburg which ended in arrest because he had the misfortune to find a silver dollar on the floor of the Union Station. It had been dropped by Curzio Scargians. Ward handed the dollar to a stranger, whom Ward supposed had dropped it, and passed out of the station. He was pursued by Scargians, who demanded his dollar. Ward tried to explain, but the foreigner could not understand. Ward took to his heels, followed by a mob. In the vicinity of the police station the pair were arrested. The stranger still has the dollar.

Mayor A. T. Connell, of Scranton, sent to Councils his veto of the curfew ordinance, which provided that children under 16 years of age found on the street after 9 p. m. without parents or guardian should be locked up by the police. The Mayor vetoes the ordinance on the ground that at present the city has no place to put children who might be arrested if the ordinance became a law, save in the common lockup. If Councils provide some suitable place of detention for boys and girls, as is required by the law governing cities of the second class, he is willing to give the curfew ordinance his approval.

Mrs. Simon Richards, of Lackawanna, was drowned in five inches of water in a creek which passes through the Richards property. The woman, whose husband is a prominent jeweler of Lackawanna, stepped outside her home and her body was found about midnight. In the darkness she had stumbled into the creek, and become stunned, was unable to rise from the shallow water, in which she was found face downward.

In a fit of anger Peter Malzi, Sr., aged 82, of Johnstown, struck his son Peter, Jr., over the head with a cane causing an injury that resulted fatally. The young Malzi had been drinking heavily of late. The aged murderer was locked up. The father insists that he did not intend to injure his son when he struck the blow.

COMMERCIAL REVIEW.

General Trade Conditions.

R. G. Dun & Company's Weekly Review of Trade says: Unreasonably mild weather is making it possible for farmers to secure much late grain and cotton that seemed doomed by early frost, but, on the other hand, trade is dull in heavy wearing apparel, fuel and many lines that should now be vigorous. While in the long run this business may be made up and the nation will be benefited by the increased crops, the immediate effect is unfavorable. Manufacturing activity has increased at cotton mills and several minor industries, but in iron and steel there are more idle furnaces and mills.

There were 246 failures this week in the United States, against 253 last week, 279 the preceding week and 248 the preceding week last year.

Bradstreet's says: Wheat, including flour, exports for the week against 4,330,281 bushels, against 4,004,873 last week, 5,715,555 this week last year 5,469,645 in 1907 and 3,555,507 in 1906. Corn exports for the week aggregated 1,459,036 bushels, against 1,392,214 last week, 1,308,847 a year ago, 768,384 in 1907 and 3,287,627 in 1906.

Marvels of Radio-Activity.

The interest in the strange property possessed conspicuously by such substances as uranium, thorium and radium of giving off spontaneously radiations that penetrate solid bodies and effect photographic plate is kept at a high pitch by frequent new observations and discoveries. Professor E. Rutherford, of McGill University, has enumerated three distinct types of radiation emanating from the substances in question. The first he calls the alpha rays, which consist of flights of material particles carrying a positive electric charge and having a very high velocity; the second are the beta rays, apparently the same as the cathode rays of ordinary vacuum tubes, but traveling faster; and the third the gamma rays, which are very similar to X-rays. In addition, some of the substances, as thorium, give off a fourth emanation, which appears to be matter in the gaseous state and can be carried along by air streams.

A Case of Defective Memory.

An anecdote which has lately been going the rounds in British official circles concerns the memorable experience of a certain member of Parliament during the last year of Queen Victoria's reign. The statesman in question is not one of those who are most firmly convinced of the benefits of total abstinence, and the evening of a certain public function at which royalty was to be present found him in a condition which would not have been edifying to the supporters of that movement. The late Queen was receiving the guests of honor, and it was necessary that the convivial M.P. should be presented with the royal toast, as he approached his sovereign, Victoria, he extended his hand for her to kiss. But he did not kiss it; instead, he grasped it and shook it with a vigorous enthusiasm, while he scrutinized her face with grave perplexity. "Your face, madam," he observed, "is perfectly familiar to me, but I'm bluffed if I can remember your name!"

The Tallest People.

In a comparative table of stature, arranged according to nationalities, the United States Indian stands higher than any other race of the world, though the Patagonian runs him very close. The white citizen comes next. The United States negro ranks fourteenth in the scale, and of all the countries of the world considered, the Portuguese are found to be the shortest. It has always been proverbial among anatomists that blond nations are greater than their darker neighbors. This is due to the geological position of the blond races. They are characteristic of the North, and on account of the lower degree of temperature are induced to take more exercise, which throws them more in the open air. At the top of the list of countries, arranged in order of stature, the first seven after the United States white men are Norway, Scotland, British America, Sweden, Ireland, Denmark and Holland, all Northern nations.

SISTERS OF CHARITY

Use Pe-ru-na for Coughs, Colds, Grip and Catarrh--A Congressman's Letter.

In every country of the civilized world the Sisters of Charity are known. Not only do they minister to the spiritual and intellectual needs of the charges committed to their care, but they also minister to their bodily needs. With so many children to take care of and to protect from climate and disease, these wise and prudent Sisters have found Pe-ru-na a never failing safeguard. Dr. Hartman receives many letters from Catholic Sisters from all over the United States. A recommendation recently received from a Catholic institution in Detroit, Mich., reads as follows: "Dr. S. B. Hartman, Columbus, Ohio. Dear Sir:—The young girl who used the Pe-ru-na was suffering from laryngitis, and loss of voice. The result of the treatment was most satisfactory. She found great relief, and after further use of the medicine we hope to be able to say she is entirely cured."—Sisters of Charity. The young girl was under the care of the Sisters of Charity, and used Pe-ru-na for catarrh of the throat with good results, as the above letter testifies. Send to The Pe-ru-na Medicine Co., Columbus, Ohio, for a free book written by Dr. Hartman. The following letter is from Congressman Meekison, of Napoleon, Ohio: The Pe-ru-na Medicine Co., Columbus, O. Gentlemen: I have used several bottles of Pe-ru-na and feel greatly benefited thereby from my catarrh of the head, and feel encouraged to believe that its continued use will fully eradicate a disease of thirty years' standing."—David Meekison. Dr. Hartman, one of the best known physicians and surgeons in the United States, was the first man to formulate Pe-ru-na. It was through his genius and perseverance that it was introduced to the medical profession of this country. If you do not derive prompt and satisfactory results from the use of Pe-ru-na, write at once to Dr. Hartman, giving a full statement of your case and he will be pleased to give you his valuable advice gratis. Address Dr. Hartman, President of The Hartman Sanitarium, Columbus, O.

RIPANS TABLETS
Ripans Tablets are the best dyspepsia medicine ever made. A hundred millions of them have been sold in the United States in a single year. Every illness arising from a disordered stomach is relieved or cured by their use. So common is it that diseases originate from the stomach it may be safely asserted there is no condition of ill health that will not be benefited or cured by the occasional use of Ripans Tablets. Physicians know them and speak highly of them. All druggists sell them. The five-cent package is enough for an ordinary occasion, and the Family Bottle, sixty cents, contains a household supply for a year. One generally gives relief within twenty minutes.
