TWO FARMS FOR SALE—

The heirs of Mrs. Mary P. Wilson, deceased of 40 private acres the following two farms, situated in Potters township, Centre county, Pa. No. 1 The farm known as the station farm, located at Centre Hall station, containing one hundred and thirty-five acres, more or less, in the occupancy of Henry Homan. This farm is principally limestone land, in good state of cultivation. Good buildings and orchard, and well supplied with water. All clear except about ten acres which is covered by good oak timber. No. 2 The farm known as the Foreman farm, situated about one mile east of Centre Hall Station, now in the occupancy of P. A. Auman, containing one hundred and twenty acres, more or less, principally limestone land: all the necessary farm buildings, a never failing supply of water piped to door, good orchard, etc. These farms are offered for sale to close up an estate. Favorable terms will be made with purchasers. For further particulars apply to MRS. LAURA ELLIOTT, Bellefonte, or GEO. M. BOAL, Centre Hall, June 22, 1904.

THE SHARPLESS TUBULAR CREAM SEPARATOR is a short cut, saving half the dairy work. It is a low-down machine. There is no dredging in washing the simple three piece Dairy Tubular Separator bowl. Avoid bucket bowls. They're all full of troublesome parts. Ten-to-six sizes—take the one that will accommodate your herd. Considering the durability of the machine, the price is the lowest of any separator on the market. For further particulars write or apply in person to H. B. ROSSMAN, Spring Mills, Pa.

ALFALFA will grow anywhere if the conditions are made right, and give from 40 to 50 dollars worth of protein to the acre. Absence of the proper soil bacteria is the most common difficulty and is easily overcome by using 300 to 600 lbs. of impregnated soil to the acre, at or after seeding. I can furnish soil from a fifteen year old lot that gave over 4 tons of hay to the acre last year, and where the bacteria is very abundant. Send for prices. F. E. DAWLEY, Fayetteville, N. Y.
