Every particle of bitter inner white skin of the rind should be peeled off and only the juicy yellow part used. You may add fresh syrup and rinds from time to time, as you wish. When cutting up oranges for the supper table, the roads may be laid aside and used for this purpose.

A GOOD POT ROAST.

This is said to be Henry Clay's favorite dish, and is guaranteed to be after a recipe of Mrs. Clay's. Have the butcher extract the bone from the rump roast and take a few stitches to keep the piece in shape. Place in an Iron pot with a tight cover. Put in with it two small onlons with two cloves stuck in each, a pod of red pepper, two carrots, sait, and a little allspice. Pour enough boiling water over the beef to nearly cover it. Let it come to a hard boil, then set the pot where it will just simmer for gix hours. Place the beef on a hot dish, strain the gravy, and take off every particle of grease. Have ready one half teaspoonful of sugar browned in a saucepan, pour the gravy over it, and thicken with a little Cour. When cooked pour over the beef. Cut up the carrots and arrange around the meat. A better pot roast could hardly be cooked.

What Gold Beaters Can Do.

Gold beaters, by hammering, can reduce gold leaves so thin that 282,-000 must be laid upon each other to produce the thickness of an inch, yet each leaf is so perfect and free from holes that one of them laid upon any surface, as in gilding, gives the appearance of solid gold. They are so thin that if formed into a book 1,500 would only occupy the space of a single leaf of common paper, and an octavo volume of an inch thick would have as many pages as the books of a well stocked library of 1,500 volumes with 200 pages in each .- New York News.
