

MILLHEIM HIGH SCHOOL

Graduation Exercises Close with an Elaborate Banquet Tuesday Evening.

Millheim is cultivating a healthy educational sentiment, and has for its leader Prof. C. R. Neff, a man completely absorbed in the intellectual advancement of the pupils under his instruction.

The graduating class consisted of Miss Lydia A. Musser, Wm. C. Mingle, Earnest R. Schreckengast, Boyd F. Winkleblech, each of whom had taken the full three years' course in the High School.

The banquet given to the Junior class by the Seniors was served in the very home-like home of Prof. and Mrs. Neff. Forty-two persons sat at the tables, all of whom, in actions or words, lauded the Millheim Public Schools and the Principal, congratulated the four young people who had just experienced the honey-moon of education, and bespoke good for the large Junior class.

These exercises will be one of the pleasant recollections of school life that in future years will be referred to as the beginning of a healthy sentiment for education in the borough of Millheim.

A Personal Letter from Mr. Shaw. When looking for a new factory superintendent two years ago, I visited the three great vehicle centers of the Central West; talked to and investigated the records of thirty men, many of them having charge of some of the largest factories in the country. I found my man. I know that we have one of the very best vehicle factory superintendents in America. He has had twenty years' experience in buggy building. All that time he has been accustomed to making high grade work. That is our class. I attend personally to the buying of materials; am thoroughly conversant with every kind, size, the weight, grade, strength, finish, price and general construction of every piece of woodwork, hardware, steel, leather, cloth, paint and varnish that goes into our work; have visited and examined the material, and have torn apart the finished work of six or eight of the largest factories; want to say that I am confident we are building a better buggy than these factories ship to the dealer at one-third more than the price we ask you. A fact. Think it over. Our pay roll, when compared with that of other factories, shows that we are paying more in wages. This means we have a higher class of mechanics. The result is better quality of work. We had over 60,000 orders in this department last year. Very busy now, but we have a lot of good, experienced men to help. People are realizing that this is the place to buy vehicles. stronger and more durable vehicles, better made in every way, easier riding, more stylishly trimmed, better finished and altogether with more lasting qualities for the money than any other buggy concern in the world. Our vehicle business in 1904 increased 20 per cent; other houses fell behind 30 per cent. We never put a \$50 description on a \$40 job. We have purchased material for manufacturing twice as many vehicles in 1905 as in 1904. We paid spot cash for it. We expect great things. Have really put prices upon the finished work that are extraordinarily low when considering the quality. Send us your order and we guarantee to return you good material and good labor in the shape of a good rig. Send for Our Vehicle Catalogue. The descriptions in our vehicle catalogue are correct. We have the goods to back them up. We know what's under the paint. If you have not received a copy ask for it. Order with this understanding: That if upon receipt you are not satisfied, write us and we will have the job returned, promptly refund your money and pay the expense both ways. We shall be pleased at any time to have our customers visit our plant, and I, personally, will be glad to answer any questions regarding our work, or to assist you in any way possible in the selection of a job or to quote and purchase for you any special vehicle that we may not catalogue.
