Wagon Passed Over Young Man.

Hile, the oldest son of George Dunklebarger, of Pleasant Gap, met with rather a serious accident Tuesday morning. The day previous he had gone to Frank Lee's, near Nigh Bank, to work on the farm, and the first work to be done was hauling manure. The young man was passing through the lane with the team when in some way he fell from the wagon, one of the wheels of which passed over his abdomen. Dr. Lee was called, and reports that while there were no bones broken, the internal injuries are of such a character as to make the outcome very uncertain.

The outsiders who live with the Storey Cotton Company are not entitled to sympathy on account of the good money lost by them. The investor who expects a foreign company to earn fabulous dividends for his money must know that to accomplish it some one must be skinned. Because the promoters saw fit to skin their patrons is no just reason for complaint—they should be willing to take their turn.

Since the large additions of machinery have been made the gasoline engine has proven altogether deficient in power. STATEMENT BY MR. SHAW We did not go into the manufacture of vehicles to help out the general catalogue business. We started out to build out an average buggy, but to make ideal work, and to furnish it to our customers at as low a price as it is possible to sell good work. I have not been in the buggy business forty years. I have been in it, however, long enough to know a good buggy from a poor one. I attend to the buying of materials in our factory. I know what the labor costs; and when any concern offers you the same kind of a vehicle that we manufacture and describe at a less price than ours, there is something wrong with it; I will state my reputation upon the truthfulness of that statement. I have visited nearly every factory in the Central West. I have examined the materials that they use; I have brought and torn apart their finished wheels, stronger spars, better bodies, and a more elegant and lasting finish than the money, than any other factory in this country. The dealer's price on any of the buggies in our catalogue would be from one-fourth to one-third more than ours. All of our work is well-proportioned, and there is a style about it that you find on no work that is ordinarily sold for twice the amount we ask. Our price is not for any of these statements by shipping any one of us at my expense and I will pay freight both ways.
