His Boy Very Much Like Other Boys, After All.

On the day The Boy was eleven years old he visited an artist friend who likes boys. The artist entertained him royally. He gave him a gun and cigarette coupons worth \$2.50. The Boy was proud of the gun, but he thought still more of the cou-

"What are you going to get with them, son?" asked The Boy's mother. "I don't know," said The Boy.

His mother was about to offer a few suggestions but The Boy's father interfered.

"Just you let Bob alone, he said. "Let him pick out his own prize. He knows what he wants."

"But he'll get something foolish," argued the practical mother. "No, he won't," said the father. "That boy's got the best judgment of

any boy I ever saw. He won't throw his money away. He'll come home with something useful-something that he needs right on the spot. I wouldn't be afraid to bet on that." So the mother finally gave in. On

Saturday The Boy went down town to exchange his coupons for a prize. When he came home the family was gathered at the dinner table talking about him. "Come, dear," said his mother,

"show mama what her little boy got." They sat expectant while the boy unwrapped his prize. After a little they spoke. The mother said, "Oh! oh! oh!" and the father said, "Well, I'll be blessed!"

The boy had bought a razor.

## LIFTS MEN OUT OF RUTS.

Merchant's System Gets Work from His Employes.

A well known employer, whose force is one of the largest in the country, has a system of "weeding out dead timber" among his employes. This man is a philanthropist. He helps more men to find themselves, possibly, than any dozen training schools. His system is philanthropy elevated to the highest plane. When he notices that e man begins to show signs that he is falling into a rut at one kind of work he promptly changes him to some other kind of employment. If there also his disposition is to become mechanical in his work, he, is shifted again. Two or three changes will either put him in a place where he can expend his energy to the best advantage of himself and the house, or show decisively that his sphere of activity, if he has any, is somewhere else. Then he is discharged.

"I absolutely will not have men in my employe who fall into a rut," is the way this employer puts it. "I don't want machines in my office. I want men who know enough to improve themselves as the years go on, and who are progressive enough to be just a little ahead of their jobs, so that if I need a man to fill the position 'just ahead' I will have a man to take and promote. The man who stands still is a detriment to any business."

Her Astral Spouse.

An unmarried woman of my acquaintance was drawing dangerously near the threshold of that age where the unmated must abandon every mat-

rimonial hope. Belonging as she did to that large contingent of women to whom marriage represents the only possible career, her anxiety, as she saw her chances of achieving it dwindling to the vanishing point, became keen, and in her distress she began to seek for comforting reassurances among that fraternity who, for a suitable consideration, obligingly offer to reveal the secrets of the future.

In the course of an interview with one of these "wise women" she was told: "My dear, you already are married on the astral plane, and it is your astral husband who is keeping the earth men away from you."

## EVERY WALK IN LIFE.

A. A. Boyce, a farmer living three and a half miles from Trenton, Mo., says: "A severe cold settled in my kid-

neys and developed so quickly that was obliged to lay off work on account of the aching in my back and sides. For a time I was unable to walk at all, and every makeshift I tried and all the medicine I took had not the slightest effect. My back continued to grow weaker until I began taking Doan's Kidney Pills, and I must say I was more than surprised and grati-

fied to notice the backache disappearing gradually until it finally stopped." Doan's Kidney Pills sold by all dealers or by mail on receipt of price, 50 cents per box. Foster-Milburn Co., Buffalo, N. Y.

He Didn't Smoke.

Several of the villagers were seated around the stove in the general store at Selkirk yesterday afternoon, when Coroner Ray dropped in on his way back from a call just below the village. The Coroner invited all hands to have a good cigar and only one of those present failed to respond. "Don't you smoke?" queried the Cor-

"I reckon not," was the reply. "Well, have something else," said

the Coroner. "Very well," said the tardy one, 'ooking around, "give me two loaves of ters of this world may receive the bread."-Albany Journal.

EFFECTS OF LACK OF CONTROL. | blissful assurance that God, the It is lack of control that sends Father, is a God of Love. most of us into conditions of nervous whoops and hysterical fussbudgets. It is lack of control that causes us to speak harshly to the cook when It is lack of control that makes us unjust, quick-tempered, uncharitable

women suffer. rying."

that the human body has a telephone system. Whenever your mind gets into a turmoil the whole neighborhood of nerves knows all about it

but builds no new ones.

The first thing in this matter of control is to learn to breathe properly and to carry yourself properly. The next is how to dress properly, how to eat and how to sleep. These are all in line with physical beautifying. The other course embraces mental beautifying.

We all should realize that everything is a matter of the mind. Observe the woman who is madly in love with her husband. Several years later she isn't. The man, no doubt, is the same as he was when she loved him. And the change? It is simple. At first her mind saw only his splendidness, his virtues and goodness. After a time it discovered a few faults. She magnified them. were as she thought them. Everything was the product of her own brain-so far as she was concerned. She might just as well have continued to have thought him adorable. Then Cupid wouldn't have been told to get another lodging place-poor NOVELTIES FOR MORNING WEAR. dear.-Indianapolis News.

TO FRESHEN GOWNS.

in the matter of trimmings this is Oriental somewhere in their costume. Cloth of gold or cloth of silver add their splendid sheen to many gowns either as tiny vests or deep girdles, and all sorts of net are embroidered with turquoise and crysophase stones.

The net is cut in strips, beaded and used as bretelles. This is an excellent and effective way of freshening up an old dinner or house gown of a pastel tint. Lace that is too handsome to be discarded, but is slightly torn, may be restored to use by embroidering if lightly with a design of beads.

Another smart touch for the woman who is tired to death of her winter cloth skirt and tacket is to make a set of deep turnover collar and cuffs of butchers' linen to wear on her coat. These sets may be of pure white linen or of colonial buff. The collar is shawl shaped, rolls well down over the bust, and is braided or embroidered at the edge. The cuffs are deep and round and finished, of course, like the collar, with braid or embroidery.

The suits are showing the bolero and skirt, the short basqued coat and skirt or the Russian blouse and skirt. These are the most universally becoming and popular styles of the tailor made. I think it is safe to say that the bolero will not be out of fashion for many a day to come.

Like chiffon, we cannot do without it. A wrap ending above or a little below the waist line gives considerable length to the limbs. As most of us admire height today, this is an advantage these styles have in common. These suits have skirts of the new length, just touching all around. This length is the hardest of all to wear, as it is too short to hold up, yet curls in an aggravating fashion at the edge unless it is held up .- Philadelphia Telegraph.

REALM OF DESIRE.

Let not desire for the material pleasures of the physical world gain control of your senses. If you do, your higher nature will be the slave, your low, base, animal, sensual nature the master-a master who knows no love, no pity, no sympathy, but whose one object, one purpose, will be to crush in order that the subtle powers of hate, angor, revenge, and above all the carnar assions may hold high revel; thereby forging chains around you that will bind and imprison the soul in such a narrow dungeon that it will never be able to understand that there is a realm which is its lawful inheritance -a ream which night does not exist-but which is, through the endless eternities, lighted by the divine goddess of truth. Be still and know that the angel of truth stands continually at your side, waiting with a sublime patience for an opportunity to prompt and instruct, in order that the earthbound sons and daugh-

SIMPLICITY IN CHILDREN'S STYLES.

Simplicity is the predominating feasalmer words would do twice as well. ture of the fashions for children, especially in their out-door garments. Contrasted with last year's frilled and vindictive. It is lack of control bloused and furbelowed modes, the that produces about nine-tenths of models for the approaching season the headaches from which nervous are plain almost as if the little ones themselves had had a finger in the You hear every day "I worry so, it juvenile fashion pie; but at least the makes me iil," or "I am so ill most! influence of the common-sense mother of the time, and I just can't help wor is easily detectable. The garments are built for comfort and durability There you are. The sick mind and have the additional advantage of brings the sick body. The sick body | graceful lines rather than an artificial creates the sick mind. Remember fussiness so out of place in children's clothes. If the small girl of 1905 wants to play teeter-totter on a board balanced over the back yard fence, she may do so in her everyday coat The stomach sulks. Every part of without feeling that she will be the digestive apparatus takes a vaca- scolded for crumpling the flounces. Her coat has no ruffles nor flounces There's one grand standstill, dur- to crumple, and it is made of a serving which the body gives out forces, iceable fabric which will not show soil and dust easily.

A CHANGE IN SKIRTS.

The unwelcome news has arrived from the French capital that skirts are to be shorter in the front and on the side, with a slight train at the back. This is the latest fad in modes. Again, there are French dressmakers who refuse to build this skirt and continue to make their costumes with skirts that are long on sides, in fact, touch the ground an around. There is little doubt, however, that the skirts of street costumes are less voluminous than they were last season. Many of the best models show smooth-fitting skirts over the hips. but they flare considerably just below the hip curve. The circular skirt In doing this she lost sight of his has returned to favor. Undoubtedly virtues. His goodness and his faults the turned w-mJk\$I,kbzxzxfizfiffffix the vogue of checks and plaid materials is largely responsible for the return of the circular skirt, as it is especially well adapted to plaids and checks.

For morning and, indeed, for general street wear, there are some delightful novelties in wooltex tailormades. These have little blouse the day of barbaric spiendor, and few coats, the "Frocks and Frills" jacket, women, however inconspicuous their a most abbreviated garment, indeed, the shoulder seams and ends its short career not far below the shoulder blades in the back, and a trifle longer proportionately in the front. These are to be worn with dainty little lingerie blouses, and the short, plaited sieeves-it seems half sleeve, half cape-that comes only below the bend of the elbow, will display the fine needle work of the blouse sleeve to excellent advantage .- Newark Ad-

> FIRST LOVE NOT ALWAYS TRUE ONE.

It is a popular fallacy that the first love is the true one, unique in its excellence, says an exchange. As well say that the first great picture of a painter is the best of all he will paint in the course of his life: that the first speech, the first book, the first statue, the first composition, will be the best of the statesman, novelist, sculptor or musician, as the case may be. First works have all the im perfections of uncertainty, of inexperience and ignorance. And it is rather by chance than by anything inherent in the nature of cupid's ways that the first love turns out to be the great one.-Indianapolis News.

FASHION HINTS.

A gown of pale buff pique was made with a skirt laid in small close plaits, with a plain front panel.

For the summer styles the double width materials are all of them desirable, and in many modes imperative. Pique is as good a material as linen for coat and skirt suits, and, indeed, has some points of superiority.

A white pique gown had a plain plaited skirt and a blouse with a wide front panel of eylet embroidery. There are some excellent piques on the market much lighter in weight

thas this fabric has ever been before. The revival of ruffles and frills is a boon to thin women who have sometimes found it difficult to wear summer muslins becomingly.

The average ready-to-wear hat is frankly hideous. It combines all the fads of fashion in cheap materials, and is very seldom the simple, stylish thing most women prefer for morning

A graduation party gown of fine nainsook was made with a full skirt trimmed with no fewer than ten narrow ruffles edged with the popular round-meshed Valenciennes, which is only less desirable than the real lace.

Miss Frances Benjamin Johnson. of Washington, has been appointed "official photographer" by the Imperial Yacht Club of Germany during the preparation for the trans-Atlantic race for the Kalser's cup.

Physicians in various parts of England are complaining that the competition of departments of hospitals, is rulnously unfair.

CREAMED EGGS.

Cook six eggs half an hour. While they are cooking, make a cup of white sauce. When the eggs are done cut them in quarters, arrange on bits of thin buttered toast, dip the sauce over them, and send to the table piping hot.

POTATO SALAD WITH CELERY.

Six or eight cold-boiled potatoes, one-third the same bulk of celery. one egg, one teaspoonful of salt, one teasponful powdered sugar, one-half teaspoonful of white pepper, one scant teaspoonful dry mustard, two tablespoonfuls salad oil, four of vinegar; stir salt, sugar, pepper and mustard into the beaten yolk of the egg; add the oil a little at a time, then the vinegar, lastly the beaten white; cut the potatoes and celery into small bits, mix and pour the dressing over them. Garnish with parsley or celery tops.

SPINACH AND EGG SALAD. Prepare and mould the spinach. Have ready, also, some cold boiled egg and mayonnaise. Turn the spinach from the moulds on to nests of shredded lettuce. Dispose, chain fashion, around the base of the spinach, the whites of the eggs cut in rings, and press a star of mayonnaise in the centre of each ring. Pass the yolks through a sieve and sprinkle over the top of the mounds and place above this the round ends of the

ROSE JELLY.

Charming decorative pieces are made of the transparent gelatine jelly and wild rose, or rose petals. Make the plain lemon jelly, flavoring with rose. Pour a very thin layer of the liquid jelly into individual round oval moulds, and let it harden. Then lay upon it a single briar rose or a grouping of rose petals, and fill the mould with the liquid jelly. Set away for several hours in the ice chest to harden. When turned out the pink rose gleaming through the thin cover of grade, 88@98. transparent jelly gives a beautiful

As the making of marmalade is one of the most easily achieved exploits in the art of preserving, few cupboards need be without their supply of the home-made delicacy.

The two receipts that are given here have been tried and found true many a time and oft. For the first, take twelve Seville oranges and two Valencias and shred them finely. Altaste, can escape a touch of this that in its newest phases is plaited at low two quarts of water to every und of fruit, and let the result stand for twenty-four hours, then boil it until the chips are tender. Again leave it to stand for another twenty-four hours, and boil it with one pound of sugar to each pound of fruit until it jellies.

A second very good receipt is as follows: Take six Seville oranges and one lemon, or twelve Seville oranges and two lemons, shred the fruit very finely, having previously wiped it most carefully, and taken off any specks which thay adhere to the peel. Place the fruit in a large vesssel and add one pint of water for every lemon, and let the mixture stand for twenty-four hours, then boil it until it is tender and again allow it to stand for twenty-four hours. Next add one pound of sugar to every orange or lemon, and boil it again until the mixture jellies. Remove it from the fire, put it in jars and cover it with airtight papers.

The presence of the lemon in the second receipt gives the confection a pleasant zest, and will be better liked by people who do not care for sweet preserves ...an the first one. But both will be found excellent, both for puddings, tartlets and on toasts or bread eaten in the ordinary man-

USEFUL HINTS.

All oak furniture looks nice if rubbed with beeswax and turpentine. Put on thinly, and polish with a

brush A pinch of salt added to the whites of eggs will make them whip up

easier. Cream or milk that has turned, but is not soured may be made sweet by stirring into it one teaspoonful of carbonate of magnesia to each quart

When feeling faint or the symptoms of heart palpitation, bend the head downward. Some persons cannot stand so violent a remedy, but it is effectual, as it allows the blood to run to the head.

Do not attempt to clean suede gloves with gasoline. Draw them on the hands and scrub with a soft, old nall brush dipped in fuller's earth. Some cleaners combine equal parts of fuller's earth and powdered alum. Many people do not know how to

rest when tired. If the waist is aching badly, lie down on a sofa or bed and thrust the arm under the left knee while lying on the left side. Less scum rises on soup after the requisite amount of salt has been added, therefore arrange the akim-

ming accordingly. A cup of cream added to a pot of beans the last hour while baking greatly improves them.

COMMERCIAL BEVIEW

R. G. Dun & Co.'s Weekly Review of Trade says:

"Unseasonable weather is the chief cause of complaint, both as to distribution of merchandise and agricultural development. At many leading cities retail trade in spring and summer wearing apparel is falling behind expectations, and there is less than the customary reorder business in wholesale and jobbing departments. Although no actual reduction in the crops is yet assured, sufficient uncertainty has appeared to render dealers in the farming districts somewhat cautious regarding the accumulation of supplies beyond current requirements. Otherwise the trade situation is satisfactory.

"Manufacturing activity is fully maintained, the percentage of idle machinery being smaller than at any recent date and the textile industries make notable progress under the stimulus of advancing raw materials. The few strikes now in progress cause little interruption and some of the July I wage scales have been adjusted, but others are still under discussion. Railway earnings thus far available for May show an average gain of 8 per cent. over last year's.

"Structural shapes have taken the position of prominence in the iron and steel industry. Building operations that were retarded by inclement weather are now under way and tonnage of steel required will keep mills fully occupied for some time. The industry, as a whole, is well engaged and the output for May promises to attain a new record.

"Failures this week numbered 214 in the United States, against 236 last year, and II in Canada compared with 12 a year ago."

Bradstreet's says: 'Wheat (including flour) exports for the week ended May 18 were 1,512,550 bushels, against 899,355 bushels last week, 1,225,763 bushels this week last year, 5,293,373 bushels in 1903 and 5,-184,839 bushels in 1902. Corn exports for the week were 1,688,299 bushels, against 1,528,200 bushels last week, 118,-337 bushels a year ago, 1,814,186 bushels in 1903 and 90,969 bushels in 1902.'
