"Falstaff" and "Shylock."  
Of all the characters Shakespeare  
drew, only two have added themselves  
to our language. "Falstaff" is the  
word we apply to humor, and more  
often to physical appearance, similar  
to that of Sir John Falstaff, the boon  
companion of Henry V., when Prince  
of Wales, who was "gross as a moun-  
tain" in size, and a rare rogue, posing  
as a hero when he wouldn't face an  
enemy, and being inordinately fond  
of sack, and a drink of his time. The  
other and better known word is "Shy-  
lock." Shakespeare's Shylock was a  
money-lender, and a Jew, who stuck to  
the very letter of his bond, and since  
then anyone who squeezes a hard  
bargain, and insists upon its being  
carried out, has been called a "Shy-  
lock."

**Government to Hatch Lobsters.**  
The Canadian government has de-  
cided to make an attempt to establish  
the lobster fishery on the Pacific  
coast. This industry in Canada is con-  
fined to eastern waters. All previous  
experiments on the Pacific have proved  
failures. A carload of live lob-  
sters will be shipped from Halifax  
to Vancouver, B. C. They will be  
placed in the waters of the Pacific  
and experts will observe what becomes  
of them.

# FARM AND GARDEN

**CLOVER SILAGE.**  
I am thinking of filling a silo with clover, but have not had much experience in this section with clover as silage. Will you please give me some information about it, how to handle and silo it. E. W. Sidling.

Two or three of our correspondents say they have siloed clover in the usual way, cutting it as they cut corn with the silage cutter. They began cutting when the clover was in full bloom and just before hardening. The silage fed out well and kept in fine condition and was very satisfactory. The following is the experience of Mr. Richard Attridge, of East Flamboro, Ontario, Canada, given at a recent Farmers Institute. He said:

"Early last summer I was convinced that the season was not likely to be favorable to the growth of corn, and I made up my mind to use clover as a substitute for filling my silo. I made what inquires I could, but I was unable to find anyone who could direct me. Accordingly, I made up my mind to do a little experimenting in this direction. I waited till the clover was in full bloom—till what some would consider the earliest cutting time, but when others would believe was to early to begin the clover harvest. I engaged men and teams as I would for filling with corn, and on the day appointed waited till the dew was off the hay before starting the mowing machine. However, just about noon a heavy shower of rain came on, and nothing was done till after dinner. The first clover put into the silo was, therefore, quite wet. This part of the silage when I began using was quite black and useless; indeed, it was simply manure. The next few loads of clover were much dryer, and this turned out to be very good ensilage. In the meanwhile the sun and wind had thoroughly dried the standing clover. This was cut and hauled at once to the silo. The ensilage resulting from this proved to be thoroughly sweet and good, and desirable in every particular, having all the good points of good corn ensilage. The cattle eat it greedily, thrive well upon it, and it does not taint the cow's milk. I may say that I followed the usual methods of filling a silo of corn. I cut it the usual length, and had it well tramped in the silo."

**TESTING CREAM.**  
Bulletin No. 104, of Purdue University Experiment Station, by Prof. H. E. Van Norman, on an "Alkali Test for Ripeness of Cream," just published, is a very interesting one, and may be had by writing the University at Lafayette, Indiana. The method of this test is very simple and will be found very interesting to dairymen. Prof. Van Norman in the bulletin says of the test:

"This test is particularly adapted to creamy conditions. However, there is no reason why the dairymen who are making a considerable amount of butter, sufficient to justify the labor, should not become familiar with this test even though he may not use it regularly. If he is supplying a critical trade at a satisfactory price it is desirable to use every means to secure uniformity of product."

During the ripening of cream the milk sugar in it is converted into lactic acid by bacteria. The measurement of the amount of acid developed during the ripening is the nearest approach we have to a measure of the ripeness of the cream. For this purpose Mann's acid test and Farrington's alkali test have been used with marked success. Where either one of these tests are regularly used, it is the almost universal experience that the quality of the butter runs more uniform, and loss of fat in the buttermilk is less than where the maker depends on his nose and his taste to determine the ripeness of the cream.

We have used in the Dairy School and the Station laboratory at Purdue, for a year and a half past, a slight modification of the tests on the market, which has simplified the work and contributed to accuracy of results.—Indiana Farmer.

**MISCELLANEOUS NOTES.**  
Roots are very valuable in winter to feed to sheep, hogs, cows and even horses and poultry. They carry sur-  
plus succulence into winter, making more appetizing and beneficial the dry feeds of that season. Food frequently fails to perform its function for want of proper digestion and assimilation. Roots fed in moderate quantities in winter will always help to correct this. If fed to cows or horses they should be pulped or sliced thinly to prevent all danger of choking of animals.

Sand or coarse gravel is absolutely necessary to furnish poultry with in winter, in order to maintain their health and thriftiness. In fact poultry cannot digest and assimilate food without the aid of the former. From experience I have found that a large number of deaths among poultry in winter are directly due to the neglect of furnishing them with enough sharp sand and gravel at a time of the year when they have to be confined to their house on account of severe weather.—Lewis Olsen in the Epitomist.

**A SEED SOWER.**  
A good method of sowing such seed as turnips, in the absence of a drill is to procure a half pint bottle with a neck, and to insert a quill in the cork, preferably from a hen feather. When sowing the seed, tip the bottle at the desired distance for each plant, and three or four seed will fall out; if they germinate they should be thinned to one plant at a place.—Eunice Watts in the Epitomist.

**One Too Many.**  
Senator Hansbrough, of North Dakota, has long been the owner of a country newspaper. Of late years other duties have prevented his giving it much attention and he has depended on divers itinerant journalists.

"I've had some good men in the place, too," the Senator once observed to a friend; "men capable of holding an important place on a city daily. Then I've had some who did not altogether make good. I remember one in particular, a man named Linkwood. Linkwood was never satisfied with simplicity. He would refer to an 'equine horse,' and in the case of a tramp killed in a railroad accident, said that the unfortunate man sustained a fracture of the 'spirial column.' Another of his pet expressions was 'tripping the light, bombastic too.'"

"You probably didn't keep him long?" suggested the friend.

"Oh, I didn't mind these so much. But when the daughter of a leading citizen was married and he spoke of the bridal procession 'proceeding down the aisle to the entrancing strains of Mendel & Son's wedding march,' I decided that we had reached the parting of the ways."—Dubuque Times.

Dowie has paid \$400,000 in debts and has been discharged from bankruptcy.

Last year 37,415 emigrants took ship at Irish ports, but 513 of them were not of Irish birth.

The Czar has issued several decrees lately.

patch at a time then stop to take it up, making the work progress very slowly. We like to cut several acres at a time, if weather is favorable, then with a good degree of push stay at our job until it is put into the barn. While this is being put up the mower should be kept going long enough to have another field ready by the time the first one is finished.—American Cultivator.

## THE KEYSTONE STATE

Latest News of Pennsylvania Told in Short Order.

Fifty infants were impelled the other morning by what is believed to have been an incendiary fire. At 7:30 o'clock fire was discovered in a stable in the rear of the Pittsburgh Home for Babies, 2503 Center Avenue. After considerable trouble the flames were extinguished. The nurses carried the children to neighboring houses. Arrangements had been made to place cows in the stable to insure a supply of pure milk for the babies. When the neighbors heard of this they protested, and some threatened to take action to prevent the establishment of what they considered a nuisance. The police are investigating.

Miss Margaret Eltringham, an Ashland school teacher, was comfortably seated in a chair in the yard of her parents' home, when she felt a tight pressure about one of her ankles. Looking down, she saw a huge copperhead snake tightly coiled about her foot. For some moments she was paralyzed with fright, but soon recovered, and ran screaming for help. Her mother, being an invalid, could render but feeble assistance. The young woman finally succeeded in shaking off the snake, which escaped into a drain. Several men subsequently joined in a search, but could not locate the reptile.

The cottagers at Williams' Grove, where the big grangers picnic is held yearly, have been frightened by the appearance of big ghosts stalking about the grove. Some of the farmers decided to suppress the ghosts. They armed themselves with shotguns loaded with buckshot, and fired the volley into the air. Then the "spirits" surrendered. The ghosts were jokers, one man stood upon another's shoulders and held aloft a lantern.

The tobacco planted in Clinton county is making rapid strides these days and nights, and the growers are much elated over the favorable prospects for an exceptionally fine crop. About 400 acres were planted.

Harry De Caine, a former Alleghenian, is in jail at Pittsburgh after a chase that led to Cleveland, Cincinnati, Lancaster, Atlantic City, Washington and finally to Middletown, Pa., where he was arrested. De Caine is charged with embezzling \$300 from Louis M. Smit, a jeweler, by whom he had been employed.

Levi George, a widely known hotel-keeper, who died at Tamaqua at the age of 86 years, furnished a case that attracted the attention of physicians. For six weeks preceding his death his condition was such that he was unable to take and retain nourishment. Despite his advanced age his vitality sustained him until finally he died from sheer exhaustion.

Because his wife said she felt unwell, James A. Moore, of La Motte, prepared breakfast. The meal being ready, he called his wife. Receiving no answer, he went upstairs and found her dead in bed. Physicians said death was due to heart failure.

William A. Lewis died of paralysis on the operating table at the Homeopathic Hospital, Pittsburgh. He had been wounded when held up by thugs at Hayesborough some time since, being shot by them. The man's death was considered to be due to the injury received from the highwaymen.

Thomas A. McQuaide, Pittsburgh's chief of detectives, has received \$2,082 from Washington county, \$1,000 being the reward and the remainder the expenses for capturing Milovar Vovovik, who was hanged, and Milovar Petrovich, who is serving a twenty-year sentence. They were arrested in England for the murder of Contractor Samuel M. Ferguson, who was killed by the explosion of a dynamite mine under the roadway over which Ferguson and his paymaster passed to pay off men at West Middletown.

President John Mitchell, of the United Mine Workers, when asked whether miners and operators are preparing for a strike, said: "It is a fact that the operators are storing much coal. It is also true that they always do that at this time of the year, but I believe they are storing now in greater quantities than usually. Whether they are doing this for an aggressive action, or to be on the defensive, I can't say. I have no means of knowing that."

Rev. J. R. Longenecker, of Mount Joy, a prominent minister of the Zion Children denomination for over a quarter century, dropped over dead while plowing potatoes. His wife found him in the field shortly afterwards.

Armin Hartrath has been sued for \$5000 damages by Alonzo and Lyman Brown, for alleged malicious prosecution. The plant of the Charlestown Machine and Manufacturing Company was destroyed by fire at Freemansburg. Armin Hartrath, the general manager, accused the Browns of setting fire to the plant. At a hearing before justice Wallace they were discharged.

Seth Williams received a dangerous injury while attending the Sunday School picnic of the Presbyterian Church at Oakland. In running across the floor of the dancing pavilion he tripped and fell, sliding forward on his stomach for several feet. In the slide he ran a splinter two inches in length into his abdomen. After much probing the piece of wood was extracted, but not until Young Williams had suffered greatly from loss of blood and exhaustion.

An express train on the Pennsylvania Railroad struck a freight train broadside at the Conestoga River Bridge, Lancaster, reducing seven box cars to kindling wood. The freight crew saw the train approaching in time to jump to places of safety. The four tracks were blocked several hours.

The deepest anthracite mine shaft in the world will be finished this week at Brookside Colliery near Tremont. It has been sunk more than a third of a mile, or, to be exact, 1850 feet. The shaft will be used for both coal and water hoisting and inaugurates extensive plans which the Philadelphia and Reading Coal and Iron Company has under way for deep mining.

Joseph Yokumis, of Centralia, is in a dying condition from an ax wound, caused, it is alleged, by Joseph Raginnis splitting his head with an ax during a quarrel. Raginnis was locked up.

**MUCH IN LITTLE.**  
Nine men constitute a jury in Mexico, and a majority gives the verdict. If the jury is unanimous, there is no appeal.

The oldest known manuscript of the Bible is now being exhibited at the British Museum. It was made in the ninth century.

Prof. George T. Ladd, of Yale, at the close of the Japanese-Russian War, will go to Japan for a term of two years under the auspices of the Imperial Education Society of that country to aid in the development of the system of education.

## COMMERCIAL REVIEW.

R. G. Dun & Co.'s Weekly Review of Trade says:

"Hot weather tended to retard activity in many productive undertakings and postponed forward business that could be delayed without loss, but accelerated the consumption of seasonal merchandise and advanced the crops much nearer maturity. Confidence in the future increases with each day favorable for harvesting, and much of the winter wheat is now beyond danger, while late corn is rapidly regaining lost ground.

"Inquiries indicate a general disposition to provide for a large volume of Fall and Winter business, clothing manufacturers receiving liberal orders from traveling salesmen, while cancellations are exceptionally few. Real estate transfers are large and building operations numerous, often overtaking facilities for delivery of lumber and other materials."

"There is comparatively little interruption from labor disputes, and the net result in all commercial and manufacturing branches is exceptionally satisfactory for this midsummer period, which is usually the dulles of the year."

Bradstreet says:

"Wheat, including flour, exports for the week ending July 20, are 705,329 bushels, against 852,000 bushels last week, 1,287,000 this week last year, 2,781,088 in 1903, and 3,980,959 in 1902. Corn exports for the week are 1,193,470 bushels, against 834,772 last week, 705,647 a year ago, 1,501,338 in 1903, and 79,611 in 1902."

**WHOLESALE MARKETS.**  
BALTIMORE—FLOUR—Quiet and unchanged; receipts, 4,847 barrels; exports, 5,265 barrels.

WHEAT—Unsettled; spot, contract, 87½@87½; spot No. 2 red Western, 88¼@88¼; July, 86½ asked; August, 86¼@86¼; September, 86¼@87; steamer No. 2 red, 78¼@78¼; receipts, 57,828 bushels; exports, 28,000 bushels; new Southern by sample, 63@89; new Southern on grade, 82@89.

CORN—Dull; spot, 61@61¼; July, 61@61¼; August, 60¼@60¼; steamer mixed, 58@58¼; receipts, 11,922 bushels; exports, 36 bushels; Southern white corn, 60@62; Southern yellow corn, 60@65.

OATS—Steady; No. 2 white, 38 bid; No. 2 mixed, 34½ sales; receipts, 3,921 bushels; exports, 154 bushels.

RYE—Dull (upward); No. 2 Western, 76@78; receipts, 154 bushels.

HAY—Strong and higher; No. 1 timothy, 15.50@16.00; No. 1 clover mixed, 12.00@12.50.

BUTTER—Steady and unchanged; fancy imitation, 17@18; fancy creamery, 21@21½; fancy ladle, 16@17; store packed, 14@15.

CHEESE—Steady and unchanged, 17.

CHEESE—Firm and unchanged; large, 10½; medium, 10½; small, 10¼.

SUGAR—Steady and unchanged; coarse granulated, 5.45; fine, 5.45.

New York—WHEAT—Exports, 23,015 bushels; sales, 5,600,000 bushels futures; spot firm; No. 2 red, nominal elevator and 99 f. o. b. afloat; No. 1 Northern Duluth, 1.21¼ f. o. b. afloat; No. 1 Northern Manitoba, 1.13 f. o. b. afloat.

CORN—Receipts, 34,400 bushels; exports, 5,652 bushels; sales, 24,000 bushels; spot firm; No. 2, 63½ elevator and 63¼ f. o. b. afloat; No. 2 yellow, 63¼; No. 2 white, 63¼.

OATS—Receipts, 64,500 bushels; exports, 9,575 bushels; spots, steady; mixed oats, 26 to 32 pounds, 35½@36¼; natural white, 30 to 32 pounds, 37¼@38¼; clipped white, 36 to 40 pounds, 38@41.

FLOUR—Receipts, 8,814 barrels; exports, 15,834 barrels; sales, 4,800 packages. Market firm, but dull.

CHEESE—Strong; receipts, 3,576. New State, full cream, small colored, and white, fancy, 10c.

POULTRY—Alive, quiet. Western spring chickens, 15; fowls, 14½; turkeys, 14½. Dressed steady; Western broilers, 13½@16; fowls, 10@13¼; turkeys, 13@17.

HAY—Easy. Shipping, 55@60; good to choice, 72½@77½.

COTTONSEED OIL—Irrregular. Prime crude, nominal; do, yellow, 28¼@28½.

POTATOES—Steady; Long Island, 1.00@1.17; Southern, 75@1.50; Jersey sweets, 1.00@2.25.

PEANUTS—Steady; fancy hand-picked, 5@5¼; other domestic, 3@3½.

CABBAGES—Steady; Long Island, per 100, 2.00@3.00.

**Live Stock.**  
Chicago, Ill.—CATTLE—Market steady; good to prime steers, 5.25@5.75; poor to medium, 3.60@5.15; stockers and feeders, 2.10@4.40; cows, 2.40@4.40; heifers, 2.25@4.75; calves, 1.40@2.40; bulls, 2.25@3.75; calves, 3.00@6.40; Texas fed steers, 3.00@4.50.

HOGS—Market low; mixed and butchers', 5.35@6.00; good to choice heavy, 5.75@5.92½; rough heavy, 5.30@5.60; light, 5.50@6.00; bulk of sales, 5.65@5.95.

SHEEP—Sheep steady; lambs weak; good to choice wethers, 4.75@5.40; fair to choice mixed, 3.50@4.60; native lambs, 4.50@7.50.

New York—BEEVES—Market flat and nearly half the cattle unsold; steers, 15c to 20c lower; fat and medium cows, lower; thin cows, steady on light receipts; bologna bulls about steady; steers, 4.00@3.35; bulls, 3.25@4.00; cows, 2.00@1.70; exports tomorrow, 765 cattle and 6,570 quarters of beef.

SHEEP AND LAMBS—Good handy sheep, steady; lambs uneven and weak; average sales lower; sheep, 3.00@4.75; culls, 2.00@2.50; lambs, 5.00@7.50; culls, 4.00.

HOGS—Market steady; good medium State hogs, 6.40.
