TWENTY YEARS OF IT. Emaciated by Diabetes; Tortured With Gravel and Kinney Pains,

Henry Soule, cobbler, of Hammondsport, N. Y., says: 'Since Doan's Kidney. Pills cured me eight years ago,

I've reached seventy and hope to live many years longer. But twenty years ago I had kidney trouble so bad I could not work. Backache was persistent and it was agony to lift

anything. Gravel. whirling headaches, dizziness and terrible urinary disorders ran me down from 168 to 100 pounds. Doctors told me I had diabetes and could not live. I was wretched and hopeless when I began using Doan's Kidney Pills, but they cured me eight years ago and

I've been well ever since." Foster-Milburn Co., Buffalo, N. Y. For sale by all dealers. Price, 50 cents per box.

Car Had to Walt.

A Chicago street car had to be stopped and the police appealed to before Ethel Morrison, 16 years old, could be induced to leave a mirror, placed on the front platform of the car to enable the motorman to tell when the passengers were all on or off at the other end of the car.

Miss Morrison had reached the cross street near her home when she discovered the mirror on the front end of the car. Stopping to fix a stray wisp of hair that was hanging in her eyes, she loosened a hairpin and all her hair fell about her face and shoul-

Impatient at the delay she was causing the motorman told the young woman to get off the car. She replied that she could not get off "with her hair all down," and asked for a moment to rearrange her loosened braids.

Exasperated by the young woman's action, the motorman shouted to Sergeant Delaney .- New York Herald.

Cheaper Than a Lawsuit. In Perak unsettled disputes may be

dealt with by the ordeal of diving. The pleadings upon either side are sealed up in two similar bamboo tubes. Two stakes are then driven into the bed of a pool in a river, to which two boys are tied, immersed to the neck, and each holding one of the tubes.

When all is prepared, a pole stretched horizontally above the heads of the boys is pressed downward, forcing both under water. Each lad holds out beneath the surface as long as he possibly can by gripping his post.

The moment one bobs up to breathe, he is set upon, and his tube is torn from him and flung away. The other boy is led ashore, where his tube is opened, and the party whose pleadings it contains is declared by the rajah to have won the case at law.-Stray Stories.

1,100 France for King's Umbrella. The king of the Belgians once left his umbrella in a harsom when driving in Brussels. This was returned to his majesty a few hours afterward by the proud "cabby," who was offered for his honesty by King Leopold the sum of 100 francs. The astute Jehu. however, begged a great favor of the king. Could he have the umbrella instead of the money? The favor was granted, and before many days had passed the cabman nad put up the umbrella for sale, and it was knocked down to some royal erthusiast for 1,100 francs. When King Leopold heard of this he exclaimed: "Well. I've heard of an umbrella being put up to keep off showers of rain; but this seems to have been put up to bring down showers of gold!"

Sensitiveness of Humorists.

A poet at a banquet of humorists told a story of R. K. Munkittrick, American's veteran joke writer.

"Blank and I spent the night with Mr. Munkittrick at his fine New Jer sey home in May," he said, "and the next morning we came in to New York on the train together.

"Mr. Munkittrick had brought along a bundle of funny papers to beguile the ride with, and, picking up one of these journals, Blank began to read it After a while he turned to Mr. Munkittrick and said:

"'So this is one of your jokes, is it" Ha, ha, ha!'

"The veteran joke writer said in a hurt, indignant tone:

"'Well, what are you laughing at? Len't it a good one?" "

BABY'S INSTINCT Shows He Knew What Food to Stick To

Forwarding a photo of a splendidly handsome and healthy young boy, a happy mother writes from an Ohio

"The enclosed picture shows my 4-

year-old Grape-Nuts boy. "Since he was 2 years old he has eaten nothing but Grape-Nuts. He demands and gets this food three times a day. This may seem rather unusual, but he does not care for anything else after he has eaten his Grape-Nuts. which he uses with milk or cream, and then he is through with his meal. Even on Thanksgiving Day he refused turkey and all the good things that make up that great dinner, and ate his dish of Grape-Nuts and cream with the best results and none of the evils that the other foolish members of the family

experienced. "He is never sick, has a beautiful complexion, and is considered a very handsome boy. May the Postum Company prosper and long continue to furnish their wholesome food." Name given by Postum Co., Battle Creek,

COMMERCIAL REVIEW.

R. G. Dun & Co.'s "Weekly Review of Trade" says:

"Commercial tendencies are still in the direction of improvement, although progress is hampered by some inflation of prices for the raw materials of textile and footwear industries. Confidence expands as the crops are secured, each day putting a large quantity of grain beyond danger, and making sensational rumors of loss less effective. Weather conditions have been favorable for retail distribution, reduced stocks in the hands of dealers being reflected in enlarged wholesale and jobbing demands. Evidences of faith in the future are increasing, more disposition being shown to provide for requirements beyond immediate consump-

"Resumption of work at several steel plants testifies to the brevity of the midsummer period of dullness. Confidence in the future is so general in this industry that it would be most surprising if expected activity failed to materialize.

er the Inducement. Niagara Falls, August 7.-The volume of water being diverted from the historic Niagara Falls is reaching such proportions that the people of the State are trying to pass laws which will prevent the possibility of a practical wiping out of this sublime natural spec-

Water sufficient to develop nearly five hundred thousand horse-power continuously, twenty four hours per day, for industrial purposes, is now being taken from the river above the Falls, and further Cevelopments requiring more water are contemplated.

Probably the largest user of the electricity produced by the waters of the mighty river is the concern which by the five or six thousand degree heat of the electric furnace brings lime and coke into unwilling union, thereby producing what is known as Calcium Carbide.

Dry calcium carbide is lifeless as so much broken rock, but in contact with water it springs into activity and begets abundantly the gas Acetylene. The light resulting from the ignition of acetylene is the nearest approach to

sunlight known. These facts, though of comparatively recent discovery, were soon seized by men with an eye to the commercial possibilities and to-day calcium carbide is being shipped everywhere and used for dispelling darkness in buildings of all descriptions, from the ordinary barn of the farmer to the country villa of the wealthy, as well as for lighting the streets of a large number of towns.

Acetylene can be ensily and cheaply installed, and the manufacture and sale of acetylene generators has become a business of recognized standing, has assumed large proportions and is steadily growing.

In the Land of Ah-Sing.

In the Celestial Empire curious customs exist literally by the thousand. On every side strange usages abound, and here we notice one peculiar little ceremony.

When a man is ill, doctors, in some parts of this extraordinary land, recommend the carrying out of a peculiar proceeding. A friend of the man who is unwell procures a straight branch with a few twigs and leaves at the end, hangs a mirror of polished metal on to this, and under that secures one of the sick man's coats,

Thus provided he takes a short walk whilst a priest performs a ceremony. The coat, conveyed in this way, is supposed to draw the disease from the sufferer. If it fails to do so, well, that cannot be helped.

Active Scotch Centenarian.

Mr. James Grieve, who resides at the head of Loch Long, is 104 years of age, but this does not appear to interfere with his activity, for he has set out on a tour of his old friends, or at least such of them as have not joined the great majority. First of all he walked six miles to Ardlui, the nearest railway station to his home, and on arriving at Tyndrum he walked twelve miles more to the house of an old comrade, a shepherd. Since leaving home he has visited the graves of his wife and son at Dunblane, and is now visiting his daughter at Falkirk. The plucky old fellow is proud of his achievements, and is enjoying his tour immensely.
