There is Money in **Growing Ginseng**

Prof. W. L. Howard of the Missouri State Agricultural College says: "I advise American farmers to cultivate Ginseng. Big profits may be realized. It is a hardy plant and is easily grown."-A recent bulletin issued by the Pennsylvania State Agricultural College in part says : "The supply of native Ginseng root is continually diminishing and the price per pound is correspondingly increasing, while the constant demand for the drug in China stands as a guarantee of a steady market for Ginseng in the future. The market for our cultivated root will exist as long as the Chinamen exist."-Consul General W. A. Rublee of Hong Kong says in the U. S. Consular reports: "The sale ot Ginseng root grown in America is very large here and the demand is so great that much more could be disposed of advantageously. The root is as indispensable to the 400,000,000 Chinese as is their rice.'

Ginseng is a staple on the market the same as corn, wheat and cotton. The present market price varies from \$5 to \$8 per pound according to quality, while the cost of production does not exceed \$1.50. There is room in an ordinary garden to grow several hundred dollars worth each year. The plant is hardy and thrives in all parts of the United States and Canada, except in arid regions. We are successful growers and can show you how to make money growing Ginseng. You can get a good start in the business for a small outlay, and soon have a comfortable income. We have several thousand choice roots for sale for fall delivery. The planting season begins in August and continues till the ground is frozen. Write us today for literature.
