The Xeed to Keep Alive Faith In Shiritual Literature.

Analysis is encouraged by our civilization more than the sense of beauty. It is a scientific age, and we are all in danger to some extent of that atrophy of the imagination of which Darwin is the most famous case. Poetry is in literature that branch which appeals primarily to the imagination and helps to keep it alive, as exercise helps to preserve the body. As we do not produce much poetry or other imaginative art we are thrown back upon the past, and this increases the necessity of education in poetry, for forms of expresthetic exercise in youth. The most sincere minds reject most emphatically any pretense of caring for what they portant in a child's education that he should be prepared to like and understand Spenser and Wordsworth, Mil-The Orangeville (Illinois) Courier ton, Burns and Shelley than that he should early acquire a realistic mode of thinking or a start in scientific information.
