THURSDAY, JULY 19, 1906.

CHURCH APPOINTMENTS. Reformed-No services.

Presbyterian-Spring Mills, morning; Centre Hall, evening. Methodist—Sprucetown, morning, "What is Who"; Centre Hall, afternoon, "The Great Fool"; Spring Mills, evening, "Life's Mission."

[Appointments not given here have not been reported to this office.]

New Bells.

The Bell telephone was installed in the residences of L. L. Smith, George L. Goodhart and Hon. Leonard Rhone, in Centre Hall.

Runkle-Kline.

Maurice Runkle, of Tusseyville, and Miss Catharine Kline, of near Bellefonte, were married at the Lutheran parsonage, Centre Hall, Wednesday evening of last week, by Rev. J. M. Rearick. The groom is a son of John L. Runkle, and the bride a daughter of John Kline, formerly a resident of Potter township.

Box Social.

Telephone Companies Combine,

graph Company, The Keystone Telephone Company and several other local concerns are to be united under one corporation to be known as the Philadelphia, Pittsburg & Erie Telephone Company. The competition among these companies has been very sharp, and this move is intended to put all on an equal footing.

Mitterling-Middleton.

The marriage of Charles A. Mitterling and Miss Mary A. Middleton, for a real rest. both of Chicago, Illinois, took place a short time ago. Last week the young family will no doubt be pleased to couple set up housekeeping in a suite of rooms in a prominent flat.

The groom is the eldest son of J. William Mitterling, of Centre Hall, and is engaged in a drug store. He has been located in Chicago for several years. The bride is a Chicago lady.

The Aggregate That Counts.

The wave of civic righteousess passing over the States should not be shut out of the small cities and boroughs. If there is an opportunity to lessen the expense of conducting the business of the smaller municipalities, the opportunity should be seized. Because the leak is at the spigot and not at the bung-hole is no reason why a remedy should not be applied. It is the aggregate of dollars saved that

Keith Souvenir Palm Mirror.

Any lady who sends her name and address, together with a two-cent stamp and this notice, to the Publicity Department, Keith's Theatre, Philadelphia, will receive, free of charge, one of their beautiful new and serviceable palm-mirrors, which will be found just the thing for the Summer, and indispensable to any lady traveler, Summer resorter in the country or at the seaside, or for the city maiden. Thousands have been delighted. It is your turn next. Send in your name at once.

Keith's Theatre.

An interesting bill is that at Keith's Chestnut Street Theatre, Puiladelphia, this week. Toby Claude, the diminutive comedienne, is a leading feature. Nellie Beaumont & Company appear in a sketch entitled "A Busy Day." Max Witt's "Six Sophomores and a Fresh Man, " with Harry Pilcer as the Fresh Man, is a bright and tuneful number. Brown and Nevarro, colored character artists, are of interest. The Zazelle-Vernon Company, giving comedy acrobatic pantomimes, are an extra attraction. Others appearing there are : Markey and Moran, character comedians; Myers and Rosa, disc manipulators; Grace Childers and her dog; Edsall and Forbes, in "The Two Rubies;" Arthur Deagon & Company, in "The Perfect Man;" The St. Onge Brothers, comedy cyclists.

Resolutions of Respect.

Whereas, it has pleased Almighty God in his all wise providence to take from our midst our sister and co-laborer, Mrs. Elizabeth Coxey, therefore

Resolved, That by her death the Woman's Home and Foreign Missionary Society of the ty, this week. Lutheran church, keenly feels the loss of a faithful member.

Resolved. That though gone out from us, the missionary spirit manifest by her constant devotion to the work through all the years of her relation to this society, of which she was a ton, at 2:30 p. m. The service concharter member, is still with us. Though dead she yet speaketh; and in our remembrance of her attitude to the cause of missions as well as to every other operation of the church, we find a noble inspiration.

Resolved, That as a society we bow in humble resignation to the will of our heavenly Father, and commend the bereaved home, for comfort, to Him who is a very present help in have been present.

Resolved, That this memorial be placed upon the minutes of our society, that it be inserted in the county papers, that a copy be sent to the be reaved home and one to the historian of the Synod ... ! Society.

MISS ANNA SWEENY, MRS. J I. STONECYPHER,

LOCALS.

And now that the walk is down, the fad is to build a concrete block-a stepping stone to a vehicle.

According to reports to the Agricultural Department there will be a most abundant crop of barley this year.

The salary of postmaster J. W. Stuart, at State College, has been increased from \$2000 to \$2100 a year. R. K. Merrill, the "buckwheat king, " of Clinton county, will grow

fourteen acres of buckwheat this season on his island farm. Dr. J. Finley Bell and wife, of Euglewood, N. J., visited the doctor's

All old soldiers are invited whether members of Company E or not.

Mr. and Mrs. David R. Foreman and family, of Bellefonte, are spending their vacation in Penns Valley among relatives, staying the greater part of the time with Mr. Foreman's mother, Mrs. Sarah Foreman, in this place. Mr. Foreman is the very efficient clerk to Prothonotary Kimport, and finds the South side of Centre] county, his old home, just the place

The friends of Dr. H. F. Bitner and learn that his son, Laurence S. Bitner, has received an appointment as Junior Resident Manager of the Jaynes Medical Company, at Shanghai, China. Since his graduation from college Mr. Bitner has been employed in the advertising department of the Philadel- In the air of towns and crowded places phia Press. He is to be congratulated on receiving this new appointment, which gives him a large salary and excellent opportunities for travel in foreign lands. One unpleasant feature is that he is covenanted to remain abroad for not less than three years. It is to be hoped that he will be equal in efficiency and integrity to the usual Centre Hall boys, who always " make good" in positions of responsibility. He will sail about August first, in the mean time he will be in the Company's office in Philadelphia to learn the details of the work.

Smullton

Eugene Smull, while at play in the barn, fell and broke his arm. H. H. Stover is working at Zion during haymaking and harvesting.

Mrs. Lydia Luse and Mrs. George Waite spent Sunday in Sugar Valley. Sidney Douty and family were visitors at the home of Amos Fehl Sunday. Herbert Smull, who was seriously ill from tonsilitis, is slowly improving. David Diehl, of Wolfs Store, was a guest at the home of Warren Bierly

Mr. Harry, while jumping across a fence, sprained his foot, and is now unable to work.

Howard Struble and Miss Kathryn Fehl, of Williamsport, spent a few days with the latter's parents.

Mrs. Ida Bair, who had an operation performed at a Philadelphia hospital, returned home last week. Pearl and Bessie Mallory, of Pitts-

burg, have been spending some time with their brother, Charles Mallory. Mr. and Mrs. Edwin Smull, Misses Mayme Wolf and Mabel Brungart attended the centennial celebration at Williamsport.

NATURE IN THE OCEAN.

Ereatures Devouring Each Other to Prevent Overproduction.

It is estimated that the cyclops will beget 442,000 young in the course of the year, and if these were all permitted to mature and reproduce themselves the seas would in a short time be a simple mass of living organisms. But the cetochilus, or "whale food," constitutes almost the exclusive food of the vast shoals of herrings and the sea living salmon and salmon trout. Their existence is one of the greatest economic triumphs of nature, for these minute creatures scour the sea of its refuse and keep it sweet, while they form the food of fishes, which in turn old home, Pleasant Gap, a short furnish wholesome food for millions of time ago. Dr. Bell is meeting with human beings.

Feeding on dead vegetable and animal matter, these entomostraca are converted into the food fishes of the world by one remove, being first assimllated by the herrings, then absorbed by the tunny, cod, mackerel and other fishes which follow herring shoals and prey upon the latter. They mainly swim on the surface of the water, and it is the search of them in this position which brings the shoals of herrings to the surface. Their countless numbers are also augmented by the microscopic larvae of fixed shells, such as the barnacle, which begins life in this form first as a one eyed swimming crustacean, then growing a pair of eyes and

finally affixing itself. In rivers these larvae are the sole food of all young fish and often also of older fish. In early spring the creatures in every stage-eggs, larvae and perfect though miscroscopic entomostraca-swarm in the water, on the mud and on the water plants, and were it not for nature's provision for keeping them in check so rapid would be their rate of multiplication that the whole character of the water would speedily be entirely changed,

AIR IN HIGH ALTITUDES.

The Same as In Other Places, but It Contains No Microbes.

It is an error to think that the chemical composition of the air differs essentially wherever the sample may be taken. The relation of oxygen to nitrogen and other constituents is the same whether it is on the heights of the Alps or at the surface of the Bea. The favorable effects, therefore, of a change of air are not to be explained by any difference in the proportions of its gaseous constituents. The important difference is the bacteriological one, The air of high altitudes contains no microbes and is, in fact, sterile, while near the ground and some hundred feet about it microbes are abundant. not only does the microbe impurity increase, but other impurities, such as the products of combustion of coal, ac-

Several investigators have found traces of hydrogen and certain hydrocarbons in the air, especially in pine, oak and birch forests. It is to these bodies, doubtless consisting of traces of essential oils, that the curative effects of certain health resorts are traced. Thus the locality of a fir forest is said to give relief in diseases of the respiratory tracts. But these traces of essential oils and aromatic product must be counted, strictly speaking, as impurities, since they are apparently

not necessary constituents of the air. Recent analysis has shown that these bodies tend to disappear in the air as a higher altitude is reached until they disappear altogether. It would seem, therefore, that microbes, hydrocarbons and entities other than oxygen and nitrogen, and perhaps also argon, are only incidental to the neighborhood of human industry, animal life and damp vegetation.-Chicago Chronicle.

Ancient Remedies For Hiccough. The hiccough seems to be a modern and dangerous disease, but the ancients knew it and prescribed remedies that might now be tried advan-Rev. G. W. McIlnay preached most- tageously. Galen recommended sneezly to the children Sunday. Text, St. ing. Actius approved of a cupping instrument, with great heat, to the breast. Alexander believed in an oxymel of squills. Alsaharavius made use of refrigerant drafts. Rhazes put his trust in calefacients, such as cumin, pepper, rue and the like in vinegar. Rogerius looked kindly on calefacient, attenuant and carminative medicines.

Not Just What He Meant.

Lloyd George was addressing a meeting in Wales, and his chairman said: "I haff to Ihtroduce you to the member of the Carnarvon boroughs. He hass come here to reply to what bishop Welsh disestablishment. In my opinion, gentlemen, the bishop of St. Asaph is one of the biggest liars in creashon. Mr. and Mrs. John William, of Oak- But he hass his match in Lloyd

Savored of the Truth.

"That's no lie," remarked the man with the newspaper. "What's no lie?" queried the other

party to the dialogue. "This paragraph to the effect that 'wise men are more often wrong than fools are right," answered the other .-Chicago News.

WONDERFUL MIRAGES.

Those Seen In the Winter Twilights In Northern Aluska,

The most wonderful mirages ever beheld by mortal eyes are those that are seen in the twilight winter days in northern Alaska. These remarkable chastly pictures of things, both imaginary and real, are mirrored on the surface of the waste plains instead of upon the clouds or in the atmosphere. Mimic lakes and water courses fringed with vegetation are to be seen pictured as real as life on the surface of the snow, while grassy mounds, stumps, trees, logs, etc., which have an actual existence some place on the earth's surface, are outlined against mountains of snow in all kinds of fantastic shapes. Some of these objects are distorted and magnified into the shapes of huge, ungainly animals and reptiles of enormous proportions. The fogs and mists are driven across these wastes by the winds, and as the objects referred to loom up in the flying vapors they appear like living creatures and seem to be actually moving rapidly across the

At other times they appear high in the air, but this is a characteristic of the northern mirages that are seen near the seashore. When the vapors and mists are driven out to sea the images mirrored in them appear to be lunging through the waters at a terrific rate of speed, dashing the spray high in the air, while huge breakers roll over them and onward toward the nountainous islands beyond and against which they all appear to be dashing. Monstrous serpents, apparently several hundred feet long, some times with riders on their backs, men on horseback thirty to fifty feet in height, animals and birds of all kinds of horrible shapes and colors seem to be scurrying past, racing and chasing each other until they are lost in the twilight fogs or dashed to pieces upon the rocky islands mentioned above and which are twenty miles out to sea.

THE RED SQUIRREL.

He Stores Very Little Food For Use In Winter.

In Maine-in fact, all over New England-red squirrels do not put by great hoards of any kind for winter use. When a Maine red squirrel has filled itself with acorns and beechnuts it will hide a few here and there-under leaves, in hollow logs, in cracks of rifted trees and among stone heaps.

An average red squirrel, having the un of an oak grove in the fall of the year, may in the course of two weeks ide away from two to four quarts of corns, though they will be in perhaps twenty different places, and in no instance which we have noted has any nut been shelled.

The squirrel which plans a hoard of nuts and makes deliberate preparations winter is the little chipmunk, or striped squirrel, which seeks winter quarters soon after heavy frosts and which remains in hiding all winter. The chipmunks often hide as many as two quarts of shelled beechnuts in one place. Their storehouses are, as a rule, under the ground, in sloping and sandy soil, the burrows having been dug with true engineering skill, so that no fresh-

et can drown them out It is believed that most observing woodsmen will say that the red squirrels of this vicinity seldom make large caches of provisions for winter consumption and never shell the stored nuts. In fact, the red species have no need to pay much heed to such matters. as they are abroad and active in the coldest days of winter as much as they are in midsummer, so precautions for food are not demanded. As the red squirrels subsist for a good part of the year upon the cones of pines and spruces, which hang to the limbs, they do not care how deep or hard the snow may be, feeling secure in finding all the food they want among the treetops,-Bangor News.

Courage.

The greater part of the courage that is needed in the world is not of a heroic kind. Courage may be displayed in everyday life as well as in historic fields of action. There needs, for example, the common courage to be honest, the courage to resist temptation, the courage to speak the truth, the courage to be what we really are and not to pretend to be what we are not, the courage to live honestly within our own means and not dishonestly upon the means of others,-Smiles.

Indian Ocean Serpents.

Among the most venomous serpents in the world are the marine snakes of of St. Asaph said the other night about the Indian ocean. They are the dread of fishermen, and it sometimes happens that vessels are obliged to thread their cables through barrels to prevent the reptiles from swarming on board. Great numbers of them may often be seen floating on the surface of the water as if asleep. They are exceedingly flerce and will commonly attack human beings without provoca-

When the Raven Was Milk White. According to Mohammedan belief, the ravens which Noah took with him on the ark were both pure white. When the ark had been riding the billows of the flood for thirty-three days one of the giraffes died, and the carcass was thrown overboard, No sooner had It struck the water than the ravens pounced upon it. For this Noah cursed them, and since that day they have been coal black.

The Disappointment.

May-It was too bad that Miss Trills disappointed the audience at the amateur performance. Elsle-But she didn't. She was able to appear after It is some compensation for great all. May-Yes, but it was generally supposed that she would not be able to appear.
