Broken Down, Like Many Another, With Kidney Troubles.

Mrs. A. Taylor, of Wharton, N. J., says: "I had kidney trouble in its

were bearing-down pains, and the kidney secretions passed too frequently, and with a burning sensation. They showed sediment. I became discouraged, weak, languid and depressed, so sick and weak that I could not keep up. As doctors did not cure me I decided to try Doan's Kidney Pills, and with such success that my troubles were all gone after using eight boxes, and my strength,

ambition and general health is fine." Sold by all dealers. 50 cents abox. Foster-Milburn Co., Buffalo. N. Y.

At their recent joint meeting the Foreign Mission Boards of the United States and Canada appointed a committee to investigate the religious conditions of the 130,000,000 people in Russia, with a view to beginning Protestant mission work among them.

The Prince and Princess of Wales' tour through India cost more than

BABY COVERED WITH SORES.

Would Scratch and Tear the Flesh Unless Hands Were Tied-"Would Have Died But For Cuticura."

"My little son, when about a year and a half old, began to have sores come out on his face. I had a physician treat him, but the sores grew worse. Then they began to come on his arms, then on other parts of his body, and then one came on his chest, worse than the others. Then I called another physician. Still he grew worse. At the end of about a year and a half of suffering he grew so bad I had to tie his hands in cloths at night to keep him from scratching the sores and tearing the flesh. He got to be a mere skeleton, and was hardly able to walk. My aunt advised me to try Cuticura Soap and Ointment. I sent to the drug store and got a cake of the Soap and a box of the Ointment, and at the end of about two months the sores were all well. He has never had any sores of any kind since. He is now strong and healthy, and I can sincerely say that only for your most wonderful remedies my precious child would have died from those terrible sores. Mrs. Egbert Sheldon, R. F. D. No. 1, Woodville, Conn., April :2, 1905."

TIN FOIL'S INVENTION.

The foil, or silver paper, which is used the world over for wrapping cigars, hocolates, cakes of yeast, etc., owes its origin, like the telephone, to America.

A New York man, over 50 years ago, gave a good deal of time to an unsuc cessful attempt to cover iron bolts with copper. Such bolts would have taken the place of the costly ones of pure The man, though, could not make them.

But in the beating out of the copper hit on the idea of beating out tin. He beat it out between sheets of lead, and the beautiful, flexible silver paper that he obtained achieved an instant popularity.

Tin foil, or silver paper, is now beaten from pure tin exactly as gold leaf is beaten from pure gold. It is usually rolled in sheets four feet long by six inches wide. It is perfectly easy, with a little beating, to double the length and breadth of these sheets without adding any new material to them.-St. Louis Globe-Democrat.

CONDENSED MILK.

The idea of condensing milk to make it keep better occurred first to a French chemist named Appert in 1827. Seven years later the method of evaporating the milk in rarified air, to prevent it from reaching the boiling point was first used. Commercially the process was first exploited in the United States. where there are at present about 50 factories, which dispose of 200,000,000 pounds of condensed milk a year, valued at over \$12,000,000.

SALLOW FACES.

Often Caused by Coffee Drinking.

How many persons realize that coffee so disturbs digestion that it produces a muddy, yellow complexion?

A ten days' trial of Postum Food Coffee has proven a means, in thousands of cases, of clearing up bad complexions.

A Washn, young lady tells her experience:

"All of us-father, mother, sister and brother-had used tea and coffee for many years until finally we all had stomach troubles more or less.

"We were all sallow and troubled with pimples, breath bad, disagreeable taste in the mouth, and all of us simply so many bundles of nerves.

"We didn't realize that coffee was the cause of the trouble until one day we ran out of coffee and went to borrow some from a neighbor. She gave us some Postum and told us to try that.

"Although we started to make it we all felt sure we would be sick if we missed our strong coffee, but we were forced to try Postum and were surprised to find it delicious.

"We read the statements on the pkg., got more and in a month and a half you wouldn't have known us. We were all able to digest our food without any trouble, each one's skin became clear, tongues cleaned off and nerves in fine condition. We never use anything now but Postum. There is nothing like it." Name given by Postum Co., Battle Creek, Mich. Read the little book, "The Road to Wellville." "There's a reason."

THE QUEST. We followed the Rainbow Road When the storm had grumbled by.

The rainbow stood by the big east wood With its top against the sky. Dot and the dog and I, -The dog with the curly tail-

big. A spade and a new tin pail, (She was the company, I in command, And the dog went along to guard the band).

And a spade to dig for our treasure

The colors came down to the ground, -Somebody told us so-And somebody told how a pot of gold Was hid at the end of the bow. We harried along, a-row, Ready to seek and find; I led the lot and next came Dot. With the curly tailed dog behind. (She was a girl, and so, in case Of danger, I gave her the safest place.)

O, we were almost there, And we would have been rich, no doubt,

But the wind came by with a dreadful cry,

And the Beautiful Bow went out When we turned to look about The great black dark had come-We ran so fast that Dot was lost, And the dog was the first one home. (And the rainbows come and the rain-

bows go, But Dot and the dog and I-we

know!) -Nancy Byrd Turner in St. Nicholas.

BEN'S BIRTHDAY GOAT. Ben had a goat named William J. Thompson. He was named so in honor of Ben's uncle, who had given him to Ben as a birthday present. Ben called him Billy for short. He didn't call him William J. Thompson for long, though, for after he had lived in Ben's back yard for three days and had devastated the flower beds and charged and put to flight the grocery

J. Thompson must find another home. Sadly Ben went down into the yard, untied the white goat from the clothes jolly as any children you ever saw .-post and slowly led him out of the Presbyterian. back gate and down the road to the village. At the crossroads he met

boy as he was trudging up to the back

door with his basket, Ben's mother

Dick Lloyd. "Nop," said Ben. "Mother won't

let me keep him." "I've got an express wagon," said

Dick. "S'pose we go partners and start an express route." "Bully!" cried Ben. "Can you keep

him at your house?" "Well," said Dick, thoughtfully, 'mother's sick in bed and I don't think it's a good time to ask her to let me keep a goat. But if we keep him in the cellar and tell her after he's been there a week, and show her he's been so good and quiet she didn't even know he was there, and he has not been the least bit of trouble. I'm sure she would let him stay. Let's

try it anyway." So it was agreed and the boys walked on to Dick's house leading William J. Thompson. When they got near the back gate Dick went ahead to see if the coast was clear. He peeped in at the kitchen window. Bridget was not there. Back he ran to Ben. "Come quick!" he called.

So Ben and William J. Thompson and Dick ran up to the house and clattered down into the cellar. "Now," said Ben, "you run and get

some straw for a bed and I'll get some carrots for him to eat and then he'll be quite all right." Everything would have been all right if Bridget had not gone down

into the cellar that evening to get some potatoes. William J. Thompson heard her footsteps, and, expecting with a joyous "n-a-a-a-a!" Bridget gave one look and dropping

the candle, fled shricking up the cerlar stairs. "Sure and there's an awful creature with horns downstairs. It's a

banshee, indade it is!" Mr. Lloyd heard the noise and rushed down to the kitchen. He peered something to make someone comfort cautiously into the darkness from the able. Never come to breakfast untidtop of the cellar stairs. Sure enough, | fly dressed. there was the gleaming eyes and shadowy horns. But just then the plaintive "n-a-a-a!" sounded again and Mr. Lloyd stepped boldly down and draa-

ged forth the luckless goat. "Dick," he asked severely, "how did this animal get here?"

ed Dick. "We wanted to keep him to run the express wagon."

len son to Bridget, who sat with the ward and forward. Then he laughed. Nature and Science in St. Nicholas. "Take the goat out in the yard," he said. 'I'll persuade mother to let you keep him."-Elizabeth Well, in

the Washington Star.

FUNNY BEGINNINGS OF WORDS. told about the derivations of words, be placed on the tops of sacred trees since people are likely to twist their long before it was used on buildings. language into strange forms. Thus, The movement of the bird in the the Pope is even today called by the name "pontifex," which boys in the stitious to ward off evil spirits. On Latin class all know is taken by him a number of modern churches the from the title of the old Roman familiar vane is missing, but in days priests. Now "pontifex" means bridge gone by a church was hardly ever

republic were in charge of bridges; but scholars tell us that the word 'pontifex," probably should be "pomptifex," meaning "maker of cere monies." Many of you have wondered what the priest had to do with bridge building, and this little change of nt to mp makes the whole matter clear.

An astonishing derivation is that of the word "stranger," which we are told comes from the Greek word ex or out of. Absurd as this seems, it is easy to understand. Ex means out, from, or away, the same word as the Latin ex; hence comes extra. Then comes the Latin extraneus, which means outside. The old French word, from this, estrange, means an outsider, but estrange, gave us the word etranger by dropping the s, and stranger by dropping the e.

After this serious example, we shall not be surprised at the old joke that derived the town name, "Middletown," from "Moses," by dropping the "iddletown" and adding "oses."

ABOUT INDIAN DOLLS.

Students of the Indian race tell us that when an Indian girl dies, her mother often substitutes a doll for the last little one. She fills the empty cradle with feathers, arranged in the form of the child, and carries this around with her wherever she goes, talking to it and caressing it as she would her loving child.

The reason the Indian mother carries her "doll' in this pathetic way, is because she thinks that the little dead child is too small to ftad its way to Paradise. By substituting the doll, it will help along until the dead baby has grown large enough to make its way to the Spirit-land alone, at least this is what the sad Indian mother believes. Christian parents know that when their little ones die they go to

be with the Lord forever. The children of the Passamaquoddy tribe of Indians play with a doll not more than a couple of inches high. In fact, it is smaller than the word which means doll, for this word is "Ampskudahekanek." One had almost rather go without make-believe babies than to be obliged to call them by such an outlandish name, don't you think so? Just fancy a wee papoose crying, "I want a Ampskudahekanek!"

The Sioux doll is made of chamois and deer-skin. The curious thing about it is that it is perfectly flat. To judge from this, one might think said kindly but firmly that William that the Sioux babies were systematically starved. This is not the case, for they are as round and fat and

BIRD CITIES.

All along the coast of the Atlantic Ocean are little cities inhabited by birds alone. Gardiners Island at the extremity of Long Island, is the place where the fish bawks come during their breeding time, and owing to the friendly attitude of the family on the island the ospreys have become very tame, and build their nests upon the ground instead of in the high trees.

In the Indian river, Florida, is a small island called Pelican Island It received its name through being one of the favorite settlements for the pelicans during their nesting season

Away up in the mouth of the St. Lawrence river is the famous Bird rock, "the greatest bird tenement house in the world' as one naturalist expresses it. This rock rises abrupt ly from the water, and in its formidable clefts thousands of northern sea birds dwell-the snowy feathered gannets. On the crest of this rock rises a light house, whose keeper is on the best of terms with his countless feathered neighbors.

These bird cities, or settlements, are under the protection of the American Ornithological union.

THINGS EVERY GIRL SHOULD LEARN.

Someone has suggested twelve things that every girl can learn be fore she is fifteen. Not every girl can learn to play or sing or paint well enough to give pleasure to her friends. more carrots, rose on his hind legs but the following "accomplishments" are within everybody's reach: Shut the door and shut softly. Keep your room in tasteful order. Have an hour for rising, and rise. Learn to make bread as well as cake. Never let a button stay off twenty-four hours. Always know where your things are. Never let a day pass without doing

ANIMALS' QUEER WAYS.

Birds, as well as four-footed antmals and insects, often avail them selves of the labors of others in homemaking. I have a photograph of a barred owl nest in a remodeled hawk "It's Ben's birthday goat," confess- nest. Skunks use woodchuck bur rows, white-footed mice and flying squirrels are fond of building holes Mr. Lloyd looked from his crestfal- in decaying trees made by woodpeck ers, and bumblebees take possession apron over her head rocking back- of mice nests in the ground.-From

The Weathercock.

The effigy of the cock so often seen on church steeples is usually connected with a legend in connection with St. Peter. As a matter of fact, There are some very funny stories however, the figure of a cock used to broeze was supposed by the superbuilder, and it is true that the Roman priests in the early days of the sceeple.—London Standard.

COMMERCIAL

R. G. Dun & Co.'s "Weekly Review of Trade" says:

In some sections the intense heat facilitated retail trade in Summer goods and improved the attendance at seaside resorts, but the most important development in the business world was the increased activity of jobbing and wholesale departments in preparing for Autumn and Winter requirements, Crop reports are all that could be desired. harvest and threshing returns surpassing all but the most sanguine expectations, the few unsatisfactory statements being far outbalanced by the numerous encouraging results.

Mercantile collections might be more prompt at some Eastern points, but the average is well maintained by discounted bills at the West and South. Manufacturing news is still of good progress, the iron and steel industry maintaining phenomenal results, despite some labor

High prices prevail in the footwear industry and for most textile fabrics, but the general level of all commodities reflect the cheapening of farm products on account of the big crops.

"Bradstreet's" says Business failures in the United States for the week ending August 9 number 137, against 170 last week, 166 in the like week of 1905, 167 in 1904, 160 in 1903 and 181 in 1902.

Wheat, including flour, exports from the United States and Canada for the week are 2,262,961 bushels, against 2,895,-020 last week, 865,002 this week last year, 1,281,399 in 1904 and 9,039,761 in

Corn exports for the week are 1,202. 638 bushels, against 623,146 last week 1,152,441 a year ago and 695,202 in 1904.

ODDS AND ENDS.

Samuel Bradbeer, who died at Pitminster, England, the other day at 82, had sung 70 years in the parish church choir.

Thomas A. Edison has acquired the farm at Milan, Erie County, O., on which he was born and reared, and is going to transform it into a fine country home. Consul C. P. H. Mason makes a re-

port on the growing walnut crop of

that French district, which indicates that the harvest will be above the average both in quantity and quality. Nearly every native Indian who can afford one is the happy possessor of an umbrella. He needs it to shelter him from rain and to shield him from the

fierce rays of the sun

HOW TO KEEP FRIENDS.

The other day a lady forgot an engagement to pour tea at a friend's afternoon at-home. The lady who was left in the lurch managed as best she could, but felt a little incensed that a chair of honor stood empty that many would have been delighted to nil,

There were all the materials for a breach of friendship, particularly as the lady who tailed to appear was reported as out walking on the street. But being person not given to quick judgment, the offended lady waited. In the early morning came a ring at the telephone, at the other end of the wire a woman full of frankness and apology. What excuse did she offer? None-actually none; but with honesty confessed that she had forgotten the engagement entirely, and told her distress, offered eager apologies, begged the favor of a drive, and in every way possible made amends. The result is that the two women are dearer to each other than before, for each feels she has discovered good qualities of friendship in the other.-Pittsburg Press.

SOMETHING ABOUT VALUABLE STONES.

The black diamond is so hard that it cannot be polished.

An uncut diamond looks very much

like a bit of gum arabic, The diamond, in sufficient heat, will burn like a piece of charcoal. The island of Ceylon is the most re-

narkable gem depository in the world Every gem known to the lapidary has ocen found in the United States. The carat used in estimating the weight of gems is a grain of Indian

THE FLORIST'S DEVICE.

ring.-Louisville Courier Journal.

that Edward the Confessor wore in his

Florists are no longer content to decorate flowers with several dollars' worth of ribbon. That cannot be made to cost enough, whatever the quality of the ribbon may be. So it has become the fashion this spring to tie up the boxes in ribbons. From the most expensive shops there are sent out now boxes bound up at one end with broad ribbons, which add at least several dollars to the price of each box. Sometimes small bunches of the flowers inside are tied under the ribbon as an index to the contents of the box.-Chicago Inter Ocean.

Good Colors For Houses.

It is not generally known-not even among painters-why certain tints and colors wear much better than others on houses, and the knowledge of just what tints are best to use is, therefore, rather hazy.

One writer on paint, in a recent book, says that experiments seem to show that those colors which resist or turn back the heat rays of the sun will protect a house better than those which allow these rays to pass through the film

Thus red is a good color because it turns back, or reflects, the red rays, and the red rays are the hot

In general, therefore, the warm tones are good and the cold tones are poor, so far as wear is concerned. In choosing the color of paint for your house, select reds, browns, grays and olives which, considering the various tones these tints will produce, will give a wide range from

which to choose. Avoid the harsh tints, such as cold yellows (like len.on), cold greens (like grass green, etc.), and the blues.

It must be understood that no virtue is claimed for tints in themselves. irrespective of the materials used in the paint. Any color will fade, and the paint will scale off, if adulterated white lead or canned paint is used, but if one is careful to use the best white lead-some well-known brand of a reliable manufacturer-and genuine linseed oil, the warm tints mentioned above will outwear the same materials tinted with the cold colors.

Consul James E. Dunning, writing from Milan, says that more than half million dollars in American money yearly sent out of the United States by temporary Italian residents to a single bank at Naples, and that the total emigration to the States from Italy in the year 1905-6, also approaching the 500,-000 mark, is indicated by the annual statement of the general commissioner of emigration at Rome.
