

What Ails You?

Do you feel weak, tired, despondent, have frequent headaches, coated tongue, bitter or bad taste in morning, "heartburn," belching of gas, acid risings in throat after eating, stomach gnaw or burn, foul breath, dizzy spells, poor or variable appetite, nausea at times and kindred symptoms?

If you have any considerable number of the above symptoms you are suffering from a disordered liver with indigestion. Dr. Pierce's Golden Medical Discovery is made up of the most valuable medicinal principles known to medical science for the permanent cure of such abnormal conditions. It is a most efficient liver invigorator, stomach tonic, bowel regulator and nerve strengthener.

The "Golden Medical Discovery" is not a patent medicine or secret nostrum, a full list of its ingredients being printed on its bottle wrapper and attested under oath. A glance at its formula will show that it contains no alcohol, or harmful habit-forming drugs. It is a fluid extract made with pure, triple-refined glycerine, of proper strength, from the roots of the following native American forest plants, viz., Golden Seal root, Stone root, Black Cherry bark, Queen's root, Bloodroot, and Mandrake root.

The following leading medical authorities, among a host of others, extol the foregoing roots for the cure of just such ailments as the above symptoms indicate: Prof. R. Bartholow, M. D., of Jefferson Med. College, Phila.; Prof. H. C. Wood, M. D., of Univ. of Pa.; Prof. Edwin M. Hale, M. D., of Hahnemann Med. College, Chicago; Prof. John King, M. D., Author of American Dispensatory; Prof. Geo. M. Scudder, M. D., Author of Specific Medicine; Prof. Laurence Johnson, M. D., Med. Dept. Univ. of N. Y.; Prof. Finley Ellingwood, M. D., Author of Materia Medica and Prof. in Bennett Medical College, Chicago. Send name and address on Postal Card to Dr. R. V. Pierce, Buffalo, N. Y., and receive free booklet giving extracts from writings of all the above medical authorities and many others endorsing in the strongest possible terms, each and every ingredient of which "Golden Medical Discovery" is composed.

Dr. Pierce's Pleasant Pellets regulate and invigorate stomach, liver and bowels. They may be used in conjunction with "Golden Medical Discovery" if bowels are much constipated. They're tiny and sugar-coated.

The wise young man keeps both eyes on the small but wise person, whose big sister he wants to face the person.

Chilean Woman's Manto.

The Chilean women's most fetching garment, wrap, or what you will, is the manto. It is of some kind of fine black material, and is worn thrown over the head. Sometimes a flap of it is drawn tightly across the forehead. After being thrown over the head the manto, by some means which I have as yet been unable to discern, is cinched in close about the neck.

This cinching in at the neck makes a kind of hood around the face, and this hood is very skillfully manipulated by some of the women to cover up moles and other defects and not been carefully combed.

From the shoulders the manto falls down in front to the toes and behind to the heels. It is held together in front, partly by pins and partly by the hands of the wearer. It is usually, but not always, worn over the street costume.

The wearing of mantos by all women, no matter of what class, on attending church is obligatory. This providing for a uniform costume is quite reasonable, and is designed to eliminate such things as our Easter-bonnet competitions and allow the mind to forsake earthly and devote itself to things spiritual.

It also swells the attendance on many occasions, for some of the ladies, when they arise too late to have time to dress for early morning mass, merely thrown on their mantos over their robes de nuit and, with the addition of such head and foot trimmings as is necessary to give the impression of being fully dressed, trip demurely off to church, to all outward seeming as though they had spent hours instead of minutes before their glasses.—Los Angeles Times.

Of Course.

Gunner—I see where a man in the Southwest had twenty-three children and then disappeared. What do you think of that?

Guy—Why, that was nothing unusual.
Gunner—What?
Guy—Why, twenty-three—skiddoo.—Chicago Daily News.

Railroad Detectives at Chickasha, Okla. T., searching for lost tools taken by shopmen, found that one employe had hauled away a locomotive cab and attached it to his house for use as a kitchen.

Beware of Ointments For Catarrh That Contain Mercury.

As mercury will surely destroy the sense of smell and completely derange the whole system when entering it through the mucous membrane, such articles should never be used except on prescriptions from reputable physicians, as the damage they will do is often to the good you can possibly derive from them. Hall's Catarrh Cure, manufactured by F. J. Cheney & Co., Toledo, Ohio, by F. J. Cheney & Co., Testimonials free. Sold by Druggists; price, 75c. per bottle. Take Hall's Family Pills for constipation.

Asia bought \$105,000,000 worth of American goods in the last fiscal year, a decrease of \$23,000,000 from 1905, but an increase of \$36,500,000 over 1904.

Head Covered With Humors Sores, With Loss of Hair—Another Speedy Cure by Cuticura Remedies.

"All my life I had been troubled more or less with humor in my scalp, but about a year ago it became worse, and my scalp was covered with little sores, which itched so it nearly made me crazy; my hair also began to get dry and fall out. I tried all kinds of hair restorers with no effect, and I was nearly discouraged, but one day I was reading in a paper what the Cuticura Remedies had done for scalp diseases, and decided to make a trial. I got a cake of Cuticura Soap, a box of Cuticura Ointment and Cuticura Resolvent Pills. I used them according to directions, and soon noticed a difference; the tiny sores on my scalp began to heal, the itching stopped, and my hair began to grow thick. I have used only the one cake of Cuticura Soap, one box of Ointment and one vial of Pills, and now I have no humor on my scalp and my hair is soft and silky. Miss Mary C. Atkins, Box 32, East Orleans, Mass., Mar. 19, 1905."

Money doesn't grow on trees, but much of it is obtained by grafting.

A girl, no matter how pretty, who bristles with the points of obtrusive hatpins is a menace to the public welfare and should be legislated against like mobs and invasions.—Fortnightly Review.

COMMERCIAL COLUMN.

Weekly Review of Trade and Latest Market Reports.

New York.—R. G. Dun & Co.'s Weekly Review of Trade says: "No unfavorable developments have appeared except the damage by storm at the South, which was almost entirely local in effect. Autumn trade is now in full swing, special activity being reported in dry goods, millinery and footwear. Manufacturing plants are engaged far in advance in all the leading industries, the metal departments making the most striking exhibits, and the activity of transporters is shown by railway earnings in September—9.2 per cent. larger than last year's figures. Crop returns are up to expectations, aside from some loss in cotton, which caused a violent rise in prices.

"Scarcity of most forms of steel and pressure for quick delivery tend to harden quotations, while the rise in pig iron has continued until the inflated position of a few years ago seems about to be attained. Practically all the pig-iron furnaces are now in blast and work will soon be started on many new plants of the open-hearth variety. Any decrease in demand for structural steel for buildings on account of the approach of winter is more than offset by the urgent needs of car works, which are falling behind with deliveries. High prices continue to prevail for minor metals.

"Commercial failures this week in the United States are 183, against 188 last week, 200 the preceding week and 195 the corresponding week last year."

Wholesale Markets.

Baltimore.—FLOUR—Steady and unchanged; receipts, 19,422 barrels; exports, 55,473 barrels.

WORTH REMEMBERING

Kissing a woman's lips is a gross insult in Finland.
The Ashantis of Africa are perhaps the most cruel and demoniacal of the races that people the earth. Their drums are decorated with human skulls and bones.

Most of the larger towns in Chekiang, China, are establishing chambers of commerce; these are semi-official bodies, being under the supervision of the local bureau of agriculture, trade, industry and mines.

Had The Name Wrong.

The family in the flat above the Smiths in the second-proof (?) apartment-house walked so very much like elephants that Mrs. Smith instantly christened them the Lightfoot family, without the least knowing their name.

Mr. Smith is an absorbed gentleman, so interested in his business that he listens to things at home in sort of a dream, and particularly he takes what his wife says as a matter of course, without any question.

The other day he met the man from the flat above in the elevator.

"Mr. Smith, I believe," said the man from the flat above, genially, "I am not waiting for an introduction, because we have many mutual friends. I live right above you in this house, and I think we should be acquainted at least."

"Oh! It is Mr. Lightfoot," replied Mr. Smith, cordially. "I am very happy to meet you!"

"Not Lightfoot, Brown," corrected that individual, smilingly.

Mr. Smith's brows were knitted. "My wife told me your name was Lightfoot, I wonder why?" he asked. "Queerest thing, she is usually so exact," and then he caught the glare of wounded dignity on his companion's face, and so he bowed himself out quickly and went in to reproach his innocent better-half for getting him in trouble.

This Eel Propelled A Boat.

Charles McCoy, while fishing at Wescoland lake on Saturday, landed an eel weighing fifteen pounds after a hard struggle. McCoy found he could not handle the monster, and, picking up a hammer, nailed the eel by the head to the stern of the boat. In its struggles the eel propelled the boat to shore. It was the biggest ever caught in this section.—Dispatch.

A Daily Thought.

Our love is inwrought in our enthusiasm as electricity is inwrought in the air, exalting its power by a subtle presence.—George Eliot.

INTERESTING CONTEST.

Heavy Cost of Unpaid Postage.

One of the most curious contests ever before the public was conducted by many thousand persons under the offer of the Postum Cereal Co., Ltd., of Battle Creek, Mich., for prizes of 31 boxes of gold and 300 greenbacks to those making the most words out of the letters Y-I-O-Grape-Nuts.

The contest was started in February, 1906, and it was arranged to have the prizes awarded on Apr. 30, 1906.

When the public announcement appeared many persons began to form the words from these letters, sometimes the whole family being occupied evenings, a combination of amusement and education.

After a while the lists began to come in to the Postum Office, and before long the volume grew until it required wagons to carry the mail. Many of the contestants were thoughtless enough to send their lists with insufficient postage and for a period it cost the Company from twenty-five to fifty-eight and sixty dollars a day to pay the unpaid postage.

Young ladies, generally those who had graduated from the high school, were employed to examine these lists and count the correct words. Webster's Dictionary was the standard, and each list was very carefully corrected, except those which fell below 8000, for it soon became clear that nothing but that could win. Some of the lists required the work of a young lady for a solid week on each individual list. The work was done very carefully and accurately, but the Company had no idea, at the time the offer was made, that the people would respond so generally, and they were compelled to fill every available space in the offices with these young lady examiners, and notwithstanding they worked steadily, it was impossible to complete the examination until Sept. 29, over six months after the prizes should have been awarded.

This delay caused a great many inquiries and naturally created some dissatisfaction. It has been thought best to make this report in practically all of the newspapers in the United States and many of the magazines in order to make clear to the people the conditions of the contest.

Many lists contained enormous numbers of words which, under the rules, had to be eliminated. "Pegger" would count, "Peggers" would not. Some lists contained over 50,000 words, the great majority of which were cut out. The largest lists were checked over two and in some cases three times to insure accuracy.

The \$100.00 gold prize was won by L. D. Reese, 1227-15th St., Denver, Colo., with 994 correct words. The highest \$10.00 gold prize went to S. K. Fraser, Lincoln, Pa., with 992 correct words.

A complete list of the 321 winners with their home addresses will be sent to any contestant enquiring on a postal card.

Be sure and give name and address clearly.
This contest has cost the Co. many thousand dollars, and probably has not been a profitable advertisement, nevertheless, perhaps some who had never before tried Grape-Nuts food have been interested in the contest, and from trial of the food have been shown its wonderful rebuilding powers.

It teaches in a practical manner that scientifically gathered food elements can be selected from the field grains which nature will use for rebuilding the nerve centres and brain in a way that is unmistakable to users of Grape-Nuts.
"There's a reason."

WHO SHE WAS

SKETCH OF THE LIFE OF LYDIA E. PINKHAM

And a True Story of How the Vegetable Compound Had Its Birth and How the "Panic of '73" Caused it to be Offered for Public Sale in Drug Stores.

This remarkable woman, whose maiden name was Estes, was born in Lynn, Mass., February 9th, 1819, coming from a good old Quaker family. For some years she taught school, and became known as a woman of an alert

and investigating mind, an earnest seeker after knowledge, and above all, possessed of a wonderfully sympathetic nature.

In 1843 she married Isaac Pinkham, a builder and real estate operator, and their early married life was marked by prosperity and happiness. They had four children, three sons and a daughter.

In those good old fashioned days it was common for mothers to make their own home medicines from roots and herbs, a physician only in specially urgent cases. By tradition and experience many of them gained a wonderful knowledge of the curative properties of the various roots and herbs.

Mrs. Pinkham took a great interest in the study of roots and herbs, their characteristics and power over disease. She maintained that just as nature so bountifully provides in the harvest-fields and orchards vegetable foods of all kinds; so, if we but take the pains to find them in the roots and herbs of the field there are remedies expressly designed to cure the various ills and weaknesses of the body, and it was her pleasure to search these out, and prepare simple and effective medicines for her own family and friends.

Chief of these was a rare combination of the choicest medicinal roots and herbs found best adapted for the cure of the ills and weaknesses peculiar to the female sex, and Lydia E. Pinkham's friends and neighbors learned that her compound relieved and cured and it became quite popular among them.

All this so far was done freely, without money and without price, as a labor of love.

But in 1873 the financial crisis struck Lynn. Its length and severity were too much for the large real estate interests of business, suffered most from fearful depression, so when the Centennial year dawned it found their property swept away. Some other source of income had to be found.

At this point Lydia E. Pinkham's Vegetable Compound was made known to the world.

The three sons and the daughter, with their mother, combined forces to

restore the family fortune. They argued that the medicine which was so good for their woman friends and neighbors was equally good for the women of the whole world.

The Pinkhams had no money, and little credit. Their first laboratory was the kitchen, where roots and herbs were steeped on the stove, gradually filling a gross of bottles. Then came the question of selling it, for always before they had given it away freely. They hired a job printer to run off some pamphlets setting forth the merits of the medicine, now called Lydia E. Pinkham's Vegetable Compound, and these were distributed by the Pinkham sons in Boston, New York, and Brooklyn.

The wonderful curative properties of the medicine were, to a great extent, self-advertising, for whoever used it recommended it to others, and the demand gradually increased.

In 1877, by combined efforts the family had saved enough money to commence newspaper advertising and from that time the growth and success of the enterprise were assured, until today Lydia E. Pinkham and her Vegetable Compound have become household words everywhere, and many tons of roots and herbs are used annually in its manufacture.

Lydia E. Pinkham herself did not live to see the great success of this work. She passed to her reward years ago, but not till she had provided means for continuing her work as effectively as she could have done it herself.

During her long and eventful experience she was ever methodical in her work and she was always careful to preserve a record of every case that came to her attention. The case of every sick woman who were thousands—received careful study, and the details, including symptoms, treatment and results were recorded for future reference, and to-day these records, together with hundreds of thousands made since, are available to sick women the world over, and represent a vast collaboration of information regarding the treatment of woman's ills, which for authenticity and accuracy can hardly be equaled in any library in the world.

With Lydia E. Pinkham worked her daughter-in-law, the present Mrs. Pinkham. She was carefully instructed in all her hard-won knowledge, and for years she assisted her in her vast correspondence.

To her hands naturally fell the direction of the work when its original founder passed away. For nearly twenty-five years she has continued it, and first Lydia E. Pinkham dropped her pen, and the present Mrs. Pinkham, now the mother of a large family, took it up. With woman assistants, some as capable as herself, the present Mrs. Pinkham continues this great work, and probably from the office of no other person have so many women been advised how to regain health. Sick women, this advice is "Yours for Health" freely given if you only write to ask for it.

Such is the history of Lydia E. Pinkham's Vegetable Compound: made from simple roots and herbs; the one great medicine for women's ailments, and the fitting monument to the noble woman whose name it bears.
