New York (Special) .- The contention that alcohol is beneficial in the treatment of tuberculosis was declared to be falacious by Dr. T. D. Crowthers, superintendent of Walnut Lodge Hospital, Hartford, Ct., in an address before the International Congress on Tuberculosis in this city. He declared that, on the contrary, alcohol is really more dangerous than the disease it is given to correct.

Dr. Crowthers said "Alcohol as a remedy, or a preventive medicine, is a most dangerous drug. All preparations of syrups containing spirits increase rather than diminish the disease.

"They may cover up the bad symptoms, but they increase the poisons and the soil for the growth of the consumptive germ. Rock and rye prescriptions make the conditions

## ANNA GOULD GETS DIVORCE

TRUST HAS BEGUN A Complete Victory For the Countess Castellane.

> Paris (By Cable) .- The Tribunal of First Instance of the Seine, Judge Ditte presiding, at noon Wednesday granted a divorce to the Countess de Castellane (formerly Anna Gould, of New York) and gave her the custody of her children, who, however, will not be allowed to be taken from France without the consent of their father, Count Boni de Castellane.

The end of the famous case came suddenly. The court brushed aside the demand of the Count's lawyers for an examination of witnesses, and, as anticipated, the public prosecutor did not even ask to be heard.

As soon as the court assembled Judge Ditte handed down the judgment, which is a sweeping victory for the Countess. In granting her petition for divorce the court gave the Countess the custody of her children, the Count being allowed only the usual rights to see them and share in the control of their education, which was not contested.

The Count is given the right to see the children at stated periods at the home of their grandmother and keep them a month annually during the holidays.

No Alimony for Boni.

The Count's demand for an "alimentary allowance of \$50,000 annually" was pronounced by the court to be without foundation in law and was rejected.

The only point decided in the Count's favor was the imposition of the inhibition on the Countess to take the children out of France without their father's consent
