Linden Hall.

J. W. Secrist, of Lebanon, is visiting his aunt, Mrs. J. M. Ross.
Dogs again visited Geiss Wagner's sheep, Sunday evening, killing several.
Harry Floray is smiling since the stork brought a little son to his home.
Miss Ella Ross returned home Saturday from a visit among Lemont friends.
J. H. Ross returned Saturday evening from Petersburg, where he was engaged in buying grain.
Misses Bertha Tressler and Edith Carper are visiting friends in eastern Penna Valley.
Among those who are sick are J. H. Weibly, from the grip, and Samuel Coble, Jr., who has pneumonia.
Mrs. Mary Brumgard, of Zion, spent part of last week with her aunt, Mrs. Mollie Miller, and is now visiting her brother, B. F. Homan, at Oak Hall.
Mildred Wieland is slowly recovering from an attack of congestion of the lungs, and little Grace Miller is also ill from the grip.
Lee Brooks expects to remain on the Henry Houser farm, instead of moving to Boalsburg on the Miller farm, as had been reported.
Mr. and Mrs. Lee Brooks and Jacob Lee and family enjoyed a sleigh ride to Lemont where they were entertained by Mr. and Mrs. P. C. Bradford, Friday evening.
Daniel Tressler is having the house on his lower farm remodeled, and after it is finished he and his son and family will occupy it. The house has been unoccupied for some years.

Oak Hall.

Miss Margaret Ferree, who had been ill, is improving.
Harry Grove, of Lemont, was a recent caller in town.
Joseph Stone, Al. and William Knopf are busily engaged cutting paper wood.
Mrs. Margaret Keller and Mrs. Amanda Walker, of Boalsburg, were guests at Sunny Hills last week.
The members of Victor Grange will entertain their friends at a banquet, Saturday, 16th inst.
Mrs. Edward Sellers is slowly improving, after an illness of several weeks.
Clement Dale and wife, of Houserville, spent Thursday afternoon in town.
Mrs. Agnes Krebs, of State College, is visiting her sister, Mrs. D. B. Lowder.
Miss Elsie Peters entertained her friend, Miss Iva Meyer, of Milesburg, over Sunday.

FARMERS' INSTITUTE

Held at Pleasant Gap, Saturday, was Largely Attended by Enthusiastic Tillers of the Soil.

The Farmers' institute held at Pleasant Gap Saturday was largely attended by enthusiastic tillers of the soil. The sessions were full of interest and highly instructive. Col. John A. Woodward was chairman, and Mrs. Carolyn Dale secretary of the institute. A brief synopsis of the work follows:

The afternoon session was opened by J. P. Pillsbury, of State College, who addressed the audience on the subject of pruning, explaining the relation of the branches to the trunk and also to the roots. He defined by blackboard illustrations his ideas of tree pruning. The question was then discussed as to what age this system should be continued. Another question was, what is the cause of potato rot and can it be prevented? Mr. Pillsbury thought the only help was to cut the vines off and let the potatoes lie in the ground for ten days.

The rights of telephone companies was next under discussion.

Hon. A. J. Kahler, of Lycoming county, took up the subject of the "Proper care of barnyard manure." He advised hauling out as fast as made and covering with straw any that had to remain in the barnyard.

Charles Hess, of Phillipsburg, orchard expert, was called upon to address the audience. He spoke of his experience in examining trees and spraying them; he offered his services whenever needed, and asked for specimens of twigs supposed to be infected.

J. H. Peachy was asked to respond to the topic, "The clover crop and how to grow it." He would not sell any hay except to a hired man, but market it through the stock; also advised a four year rotation in crops. Early planting of the seed and clipping of the young stalks the latter part of the summer were some of the ideas advanced. He also touched on the merits of alfalfa and alfalfa. He seemed to think that the best method was to plow down a clover crop and then seed it to clover. The audience became very enthusiastic on this subject.

Evening session began with a welcome song. "What benefits will result from growing seed corn?" was the first topic, and was discussed by J. H. Peachy. The advisability of using nitrate of soda was advised on by Chas. Hess and the chairman.

Quite a number of questions were taken from the box and answered by various persons, after which Mr. Pillsbury gave an interesting talk on the care of ornamental trees and shrubs. He began by telling how to dig the hole and place the tree, also the method of straightening a crooked tree, and pruning ornamental trees. There are several varieties which he recommended, such as the barberry and spirea.

The choir rendered a selection, and Mrs. Thomas Jodan gave a delightful reading entitled, "Two Farmers."

As Prof. Van Norman, of State College, had failed to arrive during the afternoon, but was now on hand, he was called on to answer several questions. Speaking of dairying in Pennsylvania, he asked the audience to guess the cost of keeping a cow for one year, and they were willing to give her \$35. The Professor then showed by blackboard work the relative position of expense and profit, demonstrating that the expense does not prove the profit, as a cow low in butter fat will cost as much to keep as one giving a high test, and will require the same amount of care. After this excellent talk the audience rose and sang "So say we all of us."

J. O. Smith, of Huntingdon county, entertained the people with a humorous sketch of "Relation of form," illustrating with blackboard drawings a snake, pine tree, radish, oyster, mouse, rat, cat, man's head, lady's hat, and closing with Rely's poem, "Little girl don't cry," and several others.

Chairman Woodward made a few closing remarks.
On motion a rising vote of thanks was given the speakers and choir.
Mr. Peachy, on being called for, made a few remarks and told several stories.

Institute closed at 10:30 p. m.

Transfer of Real Estate.

Henry Bennett, admr., to A. Y. Williams, Jan. 23, 1907, three lots in Worth twp. \$650.
Jacob Bickerman, et. ux., to Peter Stout, August 29, 1889, lot in South Phillipsburg. \$515.
A. G. Hale, et. bar., to Jacob Bickerman, Dec. 21, 1887, lot in South Phillipsburg. \$50.
A. B. McNitt, et. ux., to T. C. Kennedy, Feb. 16, 1895, 34, 137p in Gregg twp. \$231.
George Bright, et. al., to Frederick Weaver, March 22, 1883, house and lot in Aaronsburg. \$710.
Frederick Weaver, et. ux., to Mary M. Vert, March 24, 1883, house and lot in Aaronsburg. \$710.
Luther Wert, et. al., to J. H. Crouse, Dec. 14, 1905, house and lot in Aaronsburg. \$555.
Henry F. Evey, et. ux., to James E. Lenker, Nov. 20, 1906, land in Lemont. \$1000.
Sinler Batchelor, et. al., to Peter Stout, Jan. 18, 1907, four lots in South Phillipsburg. \$80.
Fayette Strunk, et. bar., to Geo. H. Emerick, Jan. 26, 1907, lot in Centre Hall. \$600.

ANCIENT EMBALMING.

Not Only People but Animals Were Embalmed in Egypt.

Myrrh, which was fabulously supposed to be the tears of Myrrha, who was turned into a shrub, was a plant of handsome appearance, with spreading, fernlike foliage and large umbels of white flowers. It was found principally in Arabia and Abyssinia. In early times the perfume distilled from it was greatly in requisition for embalming.

Hierodotus gives a detailed account of the ancient mode of embalming, which is perhaps more instructive than pleasing. After the body had undergone much preparation, which, to spare your feelings, will not be described, it was filled with powdered myrrh, cassia and other perfumes. It was then steeped in natron, a strong solution of soda, for seventy days. After this it was wrapped in bands of fine perfumed linen, smeared with aromatic gums.

Not only people were thus embalmed, but the crocodiles of Lake Moeris, which, after their mummification, were decorated with ornaments and jewels and laid in one of the subterranean passages of the great labyrinth with much pomp and display. The sacred cat, cheenuon and other cherished animals devoutly worshiped by the Egyptians were embalmed with scrupulous and fanatical care. On days special to the memory of the dead the mummies were newly sprinkled with perfume, incense was offered before them and their heads anointed with fresh oil—in the same spirit as we lay new blooms upon the graves of our dead.

WHISTLER AS A TEACHER.

A Genius Who Showed Difficulty in Imparting His Knowledge.

Whistler was certainly a genius, but he showed some difficulty in imparting his knowledge. His criticisms were often foggy and uncertain, and he hardly ever found words in which to express himself. It was almost an impossibility to develop without becoming a slave and copying him in every way. With a majority of the students this was a dangerous method. If one came with a spark of originality it was extinguished immediately by the dominating personality of the master. He could see art only from his own standpoint, and he insisted on all of us using the same palette and the same brushes as himself and on our seeing all objects with his eyes. The result to an ordinary outsider was ridiculously monotonous.

I well remember a Frenchman who wanted to join the class coming to view some of the studies and then remarking, with an amused smile, "Vous avez beaucoup des putes Wheatstair." This was perfectly true of the majority, but there were a few matured men who hardly carried out Whistler's formulas as regards the palette and method, but who, owing to their more independent attitude, profited much by the criticisms.—Century.

Voting in Paris.

"In Paris only one-fifth of the voters go to the polls and cast their ballots," said an American who has lived in Paris as a business man for several years past. "This is not because they cannot vote, but because they do not care to. Everybody in the city is interested in politics, but when the time to vote comes few care to go to the polls. The man who wins is most often the man who promises everything. For instance, in my district last time a man was elected who promised to put a new shed on the market. I know of another deputy who was kept in office fifteen years because he promised to add an extra sardine to the daily rations of the soldiers. There are so many soldiers that that made a big difference. They did not get the sardine, but he continued to promise and kept office."—Washington Post.

Man and Art.

In ancient times there stood in the citadel of Athens three statues of Minerva. The first was of olive wood and, according to popular tradition, had fallen from heaven. The second was of bronze, commemorating the victory of Marathon, and the third of gold and ivory—a great miracle of art in the days of Pericles. And thus in the citadel of time stands man himself. In childhood, shaped of soft and delicate wood, just fallen from heaven; in manhood a statue of bronze, commemorating struggle and victory, and, lastly, in the maturity of age, perfectly shaped in gold and ivory—a miracle of art!

Temper.

Temper itself is not a bad quality. It is not to be destroyed, as we sometimes say. Without temper a bar of steel becomes like lead. A man without temper is weak and worthless. We are to learn self control. A strong person is one who has a strong temper under perfect mastery. There is a deep truth here—that our mistakes and our sins, if we repent of them, will help in the growth and upbuilding of our character.

Fair Proposition.

"Don't you throw off anything because of the big holes in these doughnuts?" asked the new wife of the baker.
"I'll tell you," he replied, scratching his chin. "Eat the doughnuts, and we'll make a liberal allowance when you return the holes."

A Sleep Inducer.

Hicks—Did you hear about Macklin? They called the Rev. Mr. Dulley to his bedside last evening. Hicks—Do you mean to say he is in a dying condition? Hicks—Oh, no; only a bad case of insomnia.

CUTTLEFISH FARMS.

Where the Queer Creatures Are Cultivated to Be Milked.

Does any one know that cuttlefish are cultivated on farms to be milked? These cuttlefish farms are located on the coasts of Great Britain, and the cuttlefish are kept in tanks or ponds to be milked of their ink. The pond or tank is connected with the sea by a pipe, and a thousand or more cuttles are kept in a single one.

They form a most curious sight as they move about, trailing their long arms and staring out of their bulging eyes. They are guarded by screens which prevent them from being scared, for if they are suddenly frightened they will squirt their milk into the water, and it would therefore be lost. This fluid or milk is very valuable, and a cuttle will yield about \$3 worth a year. It is secreted in a bag which can be opened and closed at will, the cuttle ejecting the fluid to darken the water so that it may escape unseen when attacked.

The best cuttlefish are procured in China, where for some reason or other they produce the best quality of milk. When the farmer considers it opportune to milk the cuttles he proceeds by opening the sluices of the pond and gently agitating the water. The cuttles then swim around the pond, and as soon as one passes through the sluice is closed. The cuttle passes down a small channel into a basin or metal receptacle, and as soon as it is securely there the water is drained off. It is then frightened and at once squirts the fluid from the bag. When it is exhausted it is lifted out, the milk is collected and the basin prepared for another.

MODERN CIVILIZATION.

Its Complexity, Hurry and Worry Shortening Our Lives.

Not long ago while traveling I chanced to stop at a village on the river Rhine, where I found an astonishing number of old people. There were a dozen over a hundred years of age and many from eighty years old up to the century mark, yet straight and vigorous. One woman nearly a hundred years old was earning her living by picking hops. Her grandchildren were middle aged. It was quite wonderful. But there was no mystery about it. It was merely the effect of a simple life spent largely in the fields, with plain diet, consisting of a few vegetables and fruits, little meat, and native beer and wine for beverages.

Nothing can be more obvious than that the very complexity of our modern civilization is shortening our lives. But of all the evils that afflict us the worst and most destructive are hurry and worry. Hurry drives the body machine beyond its capacity, while worry racks it inwardly. Of the two worry is probably the worse. This might indeed be called the age of worry. Because of the intense nervous strain to which we are subjected we do vastly more worrying than did our forefathers. The average man of today is continually surrounded and pursued by phantom troubles, which, though few of them ever materialize into realities, haunt him continually, ruining his peace of mind and injuring his health.—Reader Magazine.

Getting Married.

I don't know myself what getting married feels like, but it cannot be much more exciting than watching other people getting married. Indeed, I always get something like palpitation of the heart just before the priest utters the final fateful words, "I declare you man and wife." Half a second before you were still free. Half a second after you were bound for the term of your natural life. Half a second before you had only to dash the book from the priest's hands and put your hands over his mouth, and, though thus giddily swinging on to the brink of the precipice, you are saved. Half a second after—
All the king's horses and all the king's men
Cannot make you a bachelor again.
It is the knife edge moment betwixt time and eternity.—From Le Gallienne's "His Quest of the Golden Girl."

The Name "Fife."

The origin of the name Fife is not known. One historian tries to show that it comes from the Celtic word veach, a Pict, and means that the district was inhabited by Picts, but that is obviously absurd, as Fife was not specially the home of any of the Pictish nations. The tradition that finds greatest favor is related by a monk, who states that the first known possessor of the district which has since grown into the kingdom of Fife was one Fifus Duffus, a famous chieftain whose date is lost in the mists of antiquity.

He Cheapened Pens.

Sir Josiah Mason was, according to his biography, walking in Bull street, Birmingham, in the year 1828 when he saw some steel pens, price 8s. 6d. each. Josiah was a hard up maker of split rings. No sooner had he seen the pens than he went home, made some better than those in the shop, sent them up to London and got a large order by return. At thirty years of age Mason's capital was 80 shillings. At sixty he had given away £400,000.

Hard Luck.

"Why does Baron Hoffman look so dejected lately?"
"Haven't you heard? He married a rich widow not long ago, and now a banker has absconded with all her money."—Meggendorfer Blatter.

In Egypt the cat was sacred to the moon, and when a cat died its master shaved off his eyebrows in sign of mourning.

Neglected Colds Threaten Life.

[From the Chicago Tribune.]

"Don't trifle with a cold," is good advice for prudent men and women. It may be vital in the case of a child. Proper food, good ventilation, and dry, warm clothing are the proper safeguards against colds. If they are maintained through the changeable weather of autumn, winter and spring, the chances of a surprise from ordinary colds will be slight. But the ordinary light cold will become severe if neglected, and a well established ripe cold is to the germs of diphtheria what honey is to the bee. The greatest menace to child life at this season of the year is the neglected cold. Whether it is a child or adult, the cold slight or severe, the very best treatment that can be adopted is to give Chamberlain's Cough Remedy. It is safe and sure. The great popularity and immense sale of this preparation has been attained by its remarkable cures of this ailment. A cold never results in pneumonia when it is given. For sale by The Star Store, Centre Hall; F. A. Carson, Potters Mills; C. W. Swartz, Tusseyville.

To the Best Paid Man.

It's sound sense that we tell you. Your work costs less dollars and is best every time you use the L. & M. Paint.

You do more painting with one gallon of L. & M. than with two gallons of other paints and the L. & M. Zinc hardens the L. & M. White Lead and makes the L. & M. Paint wear like iron.

4 gallons L. & M. mixed with 3 gallons Lineed Oil will paint a moderate sized house.

Actual cost L. & M. about \$1.20 per gallon.

A. T. Terrill, Riverhead, N. Y., writes, "16 years ago painted with L. & M. Only now requires repainting." Sold by Rearick Bros., Centre Hall.

Skin Disease of Twenty Years' Standing Cured.

"I want you to know how much Chamberlain's Salve has done for me. It has cured my face of a skin disease of almost twenty years' standing. I have been treated by several as smart physicians as we have in the country and they did me no good, but two boxes of this salve has cured me."—Mrs. Fannie Griffin, Troy, Ala. Chamberlain's Salve is for sale by The Star Store, Centre Hall; F. A. Carson, Potters Mills; C. W. Swartz, Tusseyville.

Buy BUCKEYE Stock and Poultry Food.

Stock Food. Condition Powders. Worm Killer. Gall Cure. Louse Killer. Poultry Food and Cow Vigor.

The most reliable Stock and Poultry Food on the market. Your money back if results are not satisfactory. Does not cost as much as other foods on the market. Give it a trial and save money. Sold in packages or bulk.

Howard Creamery Corp. CENTRE HALL, PA. On sale at the Creamery. Distributors for Progress Grange No. 96.
