ment is that of silence.

MAN IN THE MOON.

Version of the Myth as Held by Peo-

ple of Different Lands. Of all the myths which have sprung up around the moon, before Galilei's telescope revealed another world with lofty mountains, deep valleys and vast plains, the oldest and probably the years Mr. Lee had teen in declining human inhabitant. Every nursery has caused chiefly from stomach rouble. found by Moses gathering sticks on neard the story of the man who was About three weeks prior to his death the Sabbath and condemned to dwell

n the moon till the end of time. Originating doubtless in the superfimorning, at Centre Hall, the Masonic cial resemblance of some of the moon spots to a man with a bundle of sticks on his back, it would be handed down 22, 1874, to Miss Laura Arney, who by zealous Sabbatarians as an edifying warning. It has even been referred to Biblical authority. German nurses commonly vary the tale by saying that the offender was given the choice of burning in the sun or freezing in the moon and that he preferred Jeremiah, Hublersburg; Amos, Col- a lunar frost to a solar furnace. But yer; Ivy, Greenwood, Nebraska; Miss in the middle ages, before Lutherans and Puritans had superimposed the conception of the Jewish Sabbath upon the Christian Sunday, the crime thus

> It is possible, however, that the "man in the moon" myth may claim an even remoter antiquity. Primitive man had a tendency to personify those natural forces whose laws he could not comprehend, his imagination endowed them with human force and human feelings and with superhuman knowledge and power; hence the moon acquired a sex and a gender. In Sankrit and all derivations, except Greek and Latin, and such modern languages as have come under the classical influence, it is masculine. And doubtless this is the reason why the legendary "woman in the moon" is not nearly so

> prevalent as the legendary "man." Be this as it may, it is certain that in Teutonic fable we find the moon inhabited by both sexes, for, according to Mr. Baring-Gould, our familiar nursery rhyme about Jack and Jill is derived from the Scandinavian myth of the two children, Hiuki and Bil, who were taken up into the moon with their pole and bucket as they were drawing water. They symbolize the waxing and waning of the moon, while the water they are carrying refers to the influence of the moon's phases upon the rainfall.

There is an ancient belief found in some of the writings of the old Egyptians that the moon is an abode of departed spirits. And some of the South American Indians still regard it as their "happy hunting ground," the paradise of dead chiefs and braves. But in the middle ages the moon was generally looked upon as the seat of hell, and it is probably this circumstance that led to the familiar association of

A Narrow Escape.

Uncle Mose is famed for several counties around as the best banjo player in Georgia, says a writer in the Philadelphia Public Ledger. Naturally, therefore, when a lady in his town wished to show some northern visitors just what a genuine old darky can do Mose's little cabin and stated her wishes to his wife.

"'Deed, chile, dat ole nigger ain't playin' dat banjo no mo'," Aunt Sal said, pointing to where the instrument hung, covered with cobwebs, on the wall. "He des' puts in all his time fishin' now."

"Why, what caused him to give it up? Has he been converted?" the visitor asked

"'Deed dat wufless nigger neber will git conberted, honey. No, he des' got skeered."

"Scared! Of what?" "Dat minstrel show done it, Miss Mary," Aunt Sal explained. "De boss o' dat show he hearn mah ole man playin', an' he offered him a steady job doin' hit. Yassum, an' hit skeered him so bad he quit playin' dat banjo

Baby's Traveling Hammock. When traveling with a baby in a

sleeping car insure a good night's rest for yourself and the baby, not to mention your fellow travelers, by putting him to sleep in the little hammock which is to be found in the berth. This procedure is practicable for all infants under one year of age and is the only absolutely safe sleeping place for the baby. Provide yourself in advance with a piece of cotton rope two feet in length. With this one end of the hammock is to be made fast to the lower end of the chain or cable by which the upper berth is suspended. The other end of the hammock is left on the hook from which it usually hangs. The hammock is thus suspended diagonally across the berth. Now put in two pillows end to end. These serve the double purpose of spreader and bedding. If the hammock is strung tightly it will swing clear of the person sleeping below, and the rougher the road the more the hammock swings and the sounder the baby sleeps.-Good House-

Broken Bones.

Nowadays a broken bone is not always put up directly into a splint and kept immovable until it has healed. Many fractures-i. e., bone breakshave damaged or involved joints, and in the case of the elbow, wrist and ankle there would soon be an incurable stiffness if the splints were kept on until the bones were quite united again. So that, if the case be suitable, the surgeon nowadays removes the splints and, having bathed the limb, gently rubs and moves the joint for a minute or two. Union of the bone and the use of the limb are in that way hastened at the same time.

The church of Warmsworth, however, a village situated about two miles from Doncaster, can boast of a belfry which is about half a mile away from

The belfry is by no means a makeshift building. The tower, in fact, is said to date back to the twelfth century, and the reason of its isolation forms a rather curious story. The church was originally built on its present site to accommodate the villagers The Reporter extends its congratu- of both Warmsworth and Balby, the lations to the young couple, and latter village being half a mile from the former.

The tower was then placed in Warmsworth in order that the parishioners might hear the bell, which stops ringing a quarter of an hour before the service in order to enable the bell ringer to get to the church in time.-London Strand.

Richelieu as an Editor.

The first reporter of France was Louis XIII. The National library possesses the manuscripts of thirty-six articles written by that king. Almost all are accounts of his military operations. These articles were published in the Gazette de France. The "copy," however, did not go directly to the printer. Louis XIII. wrote abominable French, and he had vague notions of orthography. His articles were corrected and often entirely rearranged by a secretary named Lucas, who copied them, sending to Richelieu the new manuscript. Richelieu examined it*in his turn and often introduced additional corrections. At the siege of Corbie the king wrote a few lines eulogistic of the cardinal, but afterward crossed them out of his article. Richelieu wrote them in again, and so they appeared in the Gazette de France.-Revue de Par-
