

THURSDAY, MAY 2, 1907

TRAIN SCHEDULE

Trains leave Centre Hall on the Lewisburg and Tyrone Railroad, P. R. R. System, as follows:  
EAST.....7:17 a. m. and 2:35 p. m.  
WEST.....8:15 a. m. and 3:36 p. m.

Post Cards.

A new line of Souvenir Post Cards—all kinds and at all prices. The local views are the prettiest yet offered for sale at this office.  
Birthday, Stork, Art, Poses, Comic Cards, etc., etc.,—more than one hundred kinds.

LOCALS.

Its a big mistake to act small.

May court opens Monday May 20th. John L. Graden, of near Spring Mills, was in town one day last week.

The trout is not necessarily near-sighted, although it always wears specks.

In Mifflin county cherry trees are in bloom, while the apple trees are in leaves.

Constable W. H. Runkle was busy Monday serving subpoenas on witnesses to testify in the Dale murder trial.

Mrs. Harrison Bloom, of near Pine Grove Mills, is the guest of her brother, Frederick K. Carter, in Centre Hall, and will remain until the latter part of the week.

E. M. Huyett is having the interior of his dwelling repainted and repaired. The work is being executed by John T. Noll, of Pleasant Gap, assisted by several other painters of experience.

The Centre Hall auxiliary of the hospital aid society will hold its regular meeting at the home of Mrs. H. W. Kreamer, Monday evening. It is desired that all members attend.

On account of the illness of Mrs. Philip Durst, her daughter, Mrs. George W. Condo, of Jeannette, came home the latter part of last week. Mrs. Durst has been in delicate health for some time.

Although John Rishel, of near Bellefonte, is able to be about again, he is in a very frail condition. In addition to the lingering pains from his recent affliction, he is also suffering from gangrene.

Saturday afternoon Mr. and Mrs. John H. Weber returned from Philadelphia where Mr. Weber was treated at the hospital connected with the University of Pennsylvania. His condition is as good as can be expected, and it is thought the treatment will be beneficial.

Tuesday morning Samuel F. Snyder went to Pittsburg where he expects to engage at his trade, that of carpentering. Mr. Snyder has been located in Western Pennsylvania during the past few years except for the last few months. Later he expects to take his son Floyd with him.

Kerstetter Brothers, the Pleasant Gap butchers, purchased a bunch of fine steers from Merchant John Harter, of Rebersburg, who had the animals fattened for market on his farm near that place. The steers were driven through Centre Hall Monday by Samuel Griffin, who is the right hand man for the Kerstetters.

Mr. and Mrs. Harry Davidson, of Milroy, were the guests of the latter's parents, Mr. and Mrs. John Snyder, east of Centre Hall, over Sunday. Mr. Davidson runs the dinky engine from Milroy to Stone Creek, hauling all kinds of timber from the mountains to Milroy where it is either sawed or shipped for props, lagging, etc.

In another column is a clipping from the Mifflinburg Telegraph referring to W. B. Mingle, Esq., associating himself with a Washington, D. C., party with a view of establishing a plant for pasteurizing cream and shipping the same to the Nation's capitol. The fertile valleys of Union county have been looked over, and Mifflinburg is regarded as a very favorable point at which to locate such a plant.

Anticipating the approach of the "Veteran Trackmen's" banquet to be held at Wilkes-Barre in the near future, Calvin Osman, of Glen Iron, is wearing his Veteran badge with considerable, but just pride. He began work on the branch twenty-two years ago, at Linden Hall, and for eighteen years has been foreman at Glen Iron. Mr. Osman accompanied his daughter, Miss Hattie, to Centre Hall, where she will stay with her aunt, Mrs. E. W. Crawford, and be instructed in music by Prof. P. H. Meyer.

Nittany Mountain,

Mrs. J. A. Hoover, who had been ill from nervous trouble all winter, is able to be around again.

Willard Garver, son of A. W. Garver, who had been hurt while working at the White Rock lime and stone quarries, is able to go to work again.

George W. Horner is having all manner of trouble with his pump. Ask him about it.

Elmer White and wife, of Altoona, and Samuel Wasson and family spent Sunday with A. G. Noll and wife. The latter are the parents of Mrs. White and Mrs. Wasson.

Gus Strouse has bought the house built by George Rossmann several years ago. The structure is being torn down and moved to Pleasant Gap.

A \$13,000,000 OBJECT LESSON.

Will the Republican Voters Profit by Their Dearly Bought Experience?

The election of the Democrat Berry to the State Treasurership in 1905 was the direct cause of the exposure of the Capitol scandals. If the Republican Plummer had been chosen the theft of millions of the people's money would have been hushed up, and half as much again would have been stolen in the execution of plans abandoned when the taxpayers hired a Democratic watchdog. These are facts which the narrowest partisan will hardly attempt to deny.

The point of the costly object lesson taught by the unrestrained grafting of the Capitol builders is that the majority party control of State expenditures should always hereafter be regulated by a minority party check. Common sense, prudence and ordinary business hindsight unite in demanding that State Treasurer Berry shall be succeeded in office by another capable and honest Democrat in order that the millions to be raised by new schemes of taxation shall not be diverted to the pockets of the thieves who make Harrisburg their headquarters.

Will the Republican voters of Pennsylvania profit by their dearly bought experience? The Centre Reporter is not optimistic enough to believe it. It ventures to predict that they will compromise with the dictates of reason by nominating and electing a "respectable" Organization man—of the type, for instance, of Samuel W. Pennypacker.

A Fitting Memorial.

A memorial will be raised to the memory of the late Dr. G. W. Atherton by the class of 1909, Pennsylvania State College. The stone, which consists of two parts, is light granite, same as the base of the Auditorium. The top slab is seventy-eight by thirty-two inches. The head is twelve inches thick and the foot eight inches, giving the surface a drop of four inches. The granite slab will rest upon a base twelve inches thick, ninety inches long and forty-four inches wide. The base extends six inches on each side of the top slab. The letters of the epitaph will be raised and rounded in order that they may better withstand the element.

Transfer of Real Estate.

D. B. Bitner, et. ux., to Chas. Edgar Aley, March 23, 1907; premises in Jacksonville. \$1000.

Chas. S. Hassinger, et. ux., to R. A. Beck, April 10, 1907; lot in Spring twp. \$115.

Luther Guisewite, exr., to Samuel B. Weaver, April 11, 1907; 70 acres in Miles twp. \$1.

Henry Gilbert, et. ux., to W. D. Breon, April 1, 1899; 21 acres, 28 perches in Miles twp. \$225.

Mary Simler, et. bar., to Esther Hind, April 10, 1907; premises in Philipsburg. \$1900.

Geo. W. Kessler, et. ux., to Sara B. Beyer, Feb. 23, 1907; 265 acres in Ferguson twp. \$100.

Samuel B. Wasson to W. O. Daugherty, April 6, 1907; lot in Lemont. \$1350.

Martha Mosebarger, et. bar., to W. D. Zerby, April 11, 1907; premises in Bellefonte. \$3000.

Elijah Weston, et. ux., to Samuel Hooper, March 29, 1899, 140 acres in Taylor twp. \$1650.

William H. Thomas, et. ux., to Elijah Weston, Dec. 18, 1886; 140 acres in Taylor twp. \$1650.

Wm. Patterson, et. al., to Christian Reese, Dec. 18, 1906; 220 acres in Taylor twp. \$2000.

Thomas Fauler, et. al., to Henry Zeigler, March 1, 1906; 57 24-100 acres in Marion twp. \$801.36.

John W. Harter, et. al., to James T. Corman, Dec. 9, 1906; 1 acre, 38 perches in Miles twp. \$236.43.

Chas. F. Cook, exrs., to Ray Brandman, March 28, 1907; premises in Bellefonte. \$4000.

Chas. W. Hoover to William Stine, April 9, 1907; lot in Philipsburg. \$100.

John I. Thompson, et. ux., to Sarah J. Williams, April 12, 1907; 104 acres 70 perches in Worth twp. \$1000.

Martha J. Swartz to A. E. Goss, April 12, 1907; premises in Philipsburg. \$1150.

Thomas Foster, et. al., to James I. Yarnell, April 9, 1907; lot in State College. \$300.

Letter to Wither E. Lee, Centre Hall, Pa.

Dear Sir: The cost of a gallon of paint put-on is about \$5, no matter what paint you buy.

100 gallons Devco	put-on \$500
110 " next-grade "	550
120 " next-to-that "	600
130 " next "	650
140 " next-to-that "	700
150 " next "	750
160 " next-to-that "	800
170 " next "	850
180 " next-to-that "	900
190 " next "	950
200 " next-to-that "	1000
210 " next "	1050
220 " next-to-that "	1100

The strongest paint is one that takes least gallons; least gallons to buy; least gallons to paint; and the strongest paint is the one that wears longest.

These lessons are useful.  
Yours truly,  
F. W. DEVCO & Co.,  
New York.

THE GREAT "WAR COMET."

Its Fiery, Spreading Tail Was Fifty Million Miles Long.

The wonderful "war comet" of 1861 sprang so suddenly into view and blazed with such unexampled brilliancy as to astonish the astronomers and frighten those unlearned in cometary lore half out of their wits. The unlearned declared that the civil war, which was just getting well under way, must have something to do with it. However this may be, it burst forth, unheralded and uninvited, shining with greater brilliancy and magnitude than any phenomena of a similar nature which that generation had ever seen.

On the night of July 3 of that year it exhibited a most wonderful spectacle. In the evening the nucleus did not appear to be larger than a star in the first or second magnitude. As the small hours of the morning approached, however, the nucleus visibly increased in both magnitude and brilliancy. The tail waved back and forth over our little world in a most threatening manner, at times sending rays almost to the zenith. On the morning of July 5 the astronomers announced through the daily papers that the head of the great comet was only separated from the earth by a distance of 12,000,000 miles. According to the report sent out from the Cambridge observatory, the comet appears to have passed its ascending node between the 27th and the 29th of June in longitude 279 degrees, the longitude of the earth being 277 degrees at the same time.

On Oct. 10 its tail extended over a space of 50,000,000 miles and at several points was not less than 10,000,000 miles in width.

At first it was generally conceded that it was the famous comet of 1556, the one which caused the Emperor Charles V. of France to resign his imperial throne, he taking it to be a warning from God. All surmises were subsequently set at rest by the discovery that it was the famous Thatcher comet, discovered by Professor A. F. Thatcher at the Rutherford observatory in New York city.

A STRANGE MAKEUP.

When Wilton Lackaye Looked "Like a Sore Finger."

Barrett was a very pompous man, and as my bump of reverence has always been a conceivably early marked me out for his displeasure. After giving me a list of plays for which to procure wardrobes—plays which he did not do during the season—he suddenly changed his mind and put on "Julius Caesar" in Richmond, Va. It was impossible to get an armor there. I played Metellus Cimber, first citizen and Phasarius—and a soldier! Luckily I had sandals and fleshings. I borrowed a tunic from Otis Skinner, a toga from the stage manager, who was out of the bill; I had a mob shirt made in the theater; I got out a makeup for Phasarius, the barbarian, but the soldier? All of the utility men were compelled to "take the battle rattle out" as soldiers in the last act. I could not get in the town a helmet and armor, so I simply "burked" behind the other soldiers clad in fleshings, sandals and Skinner's tunic, which came halfway to my knees. I was then five feet eleven and three-fourths and weighed 130 pounds, so you may imagine the audience hardly became conscious of me until my third entrance.

My modest disposition and my desire not to meet the star's eye did not avail me. He spotted me the first thing. As the curtain came down he called me and thundered, "What do you think you represent?" I shyly responded, "A camp follower, sir, lurking behind the main column and robbing the dead." "Huh!" he grunted, his eye passing up my stretch of shanks in pink fleshings, surmounted by the tight little tunic at top. "You look like a sore finger!"—Wilton Lackaye in Bohemian Magazine.

A Dame School in England, 1837.

On a perch forming a triangle with the corner of the room sat a cock and two hens. Under a stump bed immediately beneath was a dog kennel in the occupation of three black terriers, whose barking, added to the noise of the children and the cackling of the fowls on the approach of a stranger, was almost deafening. There was only one small window, at which sat the teacher, obstructing three-fourths of the light it was capable of admitting.—Parliamentary Report.

The Number Three.

Three, which since the days of Pythagoras has been the divy number, is not invariably fortunate, for, though the fates are three, so also are the furies. The graces are three, but so also are the judges in hades and the heads of Cerberus. Then there are the records of three disloyal tribes in Welsh history; there are the three robbers in Orion's belt; there were the three tyrants at Athens, and 3 in mythology is as unlucky as it is divine.

Rapid Change.

"My hair turned from raven black to snowy white in a single night."  
"That's nothing. I went into a pawnbroker's shop once and stayed only fifteen minutes. When I came out my watch had turned from gold to silver."  
—London Tit-Bits.

Must Have Read It.

He (virtuously)—I call it simply outrageous for the newspapers to print all this terrible stuff. She (sternly)—How do you know it is terrible?—Baltimore American.

FAMILY DISPUTES.

How They Were Once Sealed by Fair Fight in Court.

In some parts of Germany in days gone by when the relations of husband and wife became strained, so to speak—in other words, when each returning day gave birth to new squabbles and the man's hand was as ready as the woman's tongue—the couple were brought before the magistrate, who, after listening to recriminations, ordered them to prepare for the ordeal by battle. The man was placed in a cask, which was then nearly filled with sand, so that he was covered up to the waist. In some towns a pit was kept handy for the purpose, just as the ducking stool was kept on Bankside, opposite St. Paul's. When he was thus half buried, the man received a short stick for his right hand, while his left hand was tied up across his chest. He was thus one armed and could only deliver his blows if his opponent came near enough.

The lady put on a linen garment, the right sleeve of which was lengthened. In the end was tied up a stone. The sleeve projected about twelve inches beyond her hand. She had thus a formidable weapon, but in order to use it she had to get close to her enemy. Now, observe the situation and the chances. If she succeeded in bringing the stone down upon her husband's head, she might knock him senseless; she might even brain him, but in order to do so she would expose herself to the full blow of his stick. The battle might, in fact, be settled by a single assault. But mark the craftiness of man. It was better to make a woman ridiculous than to knock her silly. The husband, therefore, if he was a philosopher, did not try to hit his wife. He warded her blows with his stick. He tried to catch the sleeve upon his stick. Then the stone flew round and round, and the lady was caught. She could not move, and the victorious husband dragged her, unwilling, head first into his cask.—London Queen.

TELESCOPE LENSES.

Astonishing Sensitiveness of These Wonderful Glasses.

With the exception of astronomers, few persons have any idea of the wonderful sensitiveness of the lens of a telescope. These marvelous artificial eyes can be produced only by the exercise of the most scrupulous care in the selection of the glass itself, consummate skill and inexhaustible patience. The process of grinding and polishing often occupies several months. When the lens of a big telescope is completed, it constitutes one of the greatest marvels wrought by man.

An article in the Literary Digest describes how the sensitiveness of a lens was illustrated by Alvan Clark, the greatest lensmaker America has produced:

Mr. Clark walked down to the lens and held his hand under it about two feet away. Instantaneously a marvelous spectacle burst into view. It seemed as if the great glass disk had become a living volcano, spouting forth jets of flame.

The display was dazzling. Waving, leaping, dancing, the countless tongues of light gleamed and vibrated; then fitfully, reluctantly, they died away, leaving the lens reflecting only a pure, untroubled light.

What is it? How do you account for the wonder? were the eager questions. It is only the radiation of heat alternately expanding and contracting the glass. If the hand had been put upon the lens itself, the phenomenon would have been more violent.

To a person ignorant of lenses the almost supernatural sensitiveness of a mass of glass weighing several hundred pounds is astonishing, but to the scientist it is an everyday matter, for he has instruments that will register with infallible accuracy the approach of a person fifty or a hundred feet away.

His Share.

A gamekeeper found a boy fishing in his master's private waters. "You mustn't fish here!" he exclaimed. "These waters belong to the Earl of A."

"Do they? I didn't know that," replied the culprit, laying aside his rod. He then took up a book and commenced reading.

The keeper departed, but on returning about an hour afterward found the same youth had started fishing again.

"Do you understand that this water belongs to the Earl of A.?" he roared.

"Why, you told me that an hour ago!" exclaimed the angler, in surprise. "Surely the whole river doesn't belong to him? His share went by long ago!"—London Telegraph.

No Hessians Need Apply.

Aunt Sally Linnekin was looking admiringly at a collection of souvenir postal cards brought back from Europe by one of her summer boarders.

"Now, this one," said he, showing a handsome card, "is from Hesse, where those Hessian soldiers came from, you know."

Aunt Sally put down the cards and rose up in intense indignation. "Land sakes!" she exclaimed in horror. "Did you go there?"

No Secret.

"Well, well," exclaimed Miss Passay, "so she's twenty-five today. I guess it would surprise her if I should tell her I was the same age."

"Oh, no," replied Miss Knox; "she knows that, of course."

"She knows that I'm twenty-five?"

"No; that you were."—Philadelphia Press.

Diligence increaseth the fruit of toil. A dilatory man wrestles with losses.—Hesiod.

Chamberlain's Colic, Cholera and Diarrhoea Remedy.

There is probably no medicine made that is relied upon with more implicit confidence than Chamberlain's Colic, Cholera and Diarrhoea Remedy. During the third of a century in which it has been in use, people have learned that it is the one remedy that never fails. When reduced with water and sweetened it is pleasant to take. For sale by

The Star Store, Centre Hall; F. A. Carson, Potters Mills; C. W. Swartz, Tusseyville.

SHORT TALKS BY L. T. COOPER.

THE STOMACH.

My but peoples' stomachs do cause a lot of trouble. I offered to wager some doctors in St. Paul, Minn., that one half of all sickness is caused by the stomach. After I assured them that my medicine did nothing but put the stomach in shape and they had spent a day listening to what people who called on me had to say, they had to agree with me. They heard people come in and tell me that for years they had been near the grave with Bright's disease, or lung trouble, or kidney complaint and all manner of diseases and that the New Discovery had cured them. Of course these people were mistaken, it was nothing but their stomachs. As a matter of fact when the stomach gives out most everything else is thrown out of order too.

When a person feels tired and dull and despondent, is loosing flesh and don't sleep well, has a poor memory, a bad taste in the mouth, a coated tongue, and other troubles he's liable to believe a lot of things are the matter with him. Nine chances to one it's his stomach. I've seen Cooper's New Discovery bring back health to too many people in just this shape to believe anything else. Here's a letter about it:

"I suffered for a long time without knowing just what was the matter with me. I seldom felt like eating. I lost greatly in weight. My digestion was extremely poor and when I did eat I invariably suffered afterward. I was constipated and frequently suffered from nerve racking, violent headaches. When I heard of what the Cooper remedies were doing for others I resolved to try them."

"Relief came with the first bottle. My appetite and digestion improved rapidly. I am no longer constipated nor do I have those dreadful headaches. I sleep well and am gaining flesh." C. H. Powell, 13 Harrison Addition, Duluth, Minn.

We are selling immense quantities of these medicines and our customers express great satisfaction.

J. D. MURRAY, Druggist Centre Hall, Pa.

Good Words for Chamberlain's Cough Remedy.

People everywhere take pleasure in testifying to the good qualities of Chamberlain's Cough Remedy. Mrs. Edward Phillips, of Barclay, Md., writes: "I wish to tell you that I can recommend Chamberlain's Cough Remedy. My little girl, Catharine, who is two years old, has been taking this remedy whenever she has had a cold since she was two months old. About a month ago I contracted a dreadful cold myself, but I took Chamberlain's Cough Remedy and was soon as well as ever." This remedy is for sale by

The Star Store, Centre Hall; F. A. Carson, Potters Mills; C. W. Swartz, Tusseyville.
