Daniel Gress, Harry Dinges, main at home much of the time, but Sunday afternoon she and her little ones concluded to take an outing by going up the mountain road, above Centre Hall. The youngest two were placed in a baby carriage, and were being pushed up the mountain by an elder sister. Something attracted the little girl's attention, when she thoughtlessly left the carriage stand and walked away from it. The grade at this point was quite steep, and the motion of the live and precious freight caused the carriage to run backward, and before the vehicle could be reached by either the mother or daughter, it was precipitated over the embankment. The injuries were a broken arm for the eldest of the two children, while the baby received many cuts and bruises.

Thus the gulf stream would seek other shores than those of Britain, and the climate there might be subject to the extremes of heat and cold noticeable in other countries of the same latitude. The icebound rivers of the north, notably those of Russia and Siberia, would be open for navigation, and Russia's activity as a sea power and a commercial nation might alter the whole world of commerce.

Canada would become another country altogether. An immense tract of land would be available for cultivating hardy plants, and Greenland might be what its name indicates. The absence of icebergs off the coast of Newfoundland and Iceland would result in a much warmer climate in those islands, where now the crops often fail.

Ice, too, plays an important part in the economy of nature. Thus, if water never froze, snow, hall and hoarfrost would cease. The loosening of soils and the disintegration of rocks by the frost and many other now vital effects would be lost-in short, the absence of ice would be on the one hand an incalculable disaster, on the other hand

Next to Christmas, Children's Day is the most important to the youth who is being trained in Sunday school and church. The rolling around of a few years ought not to develop neglect among the older ones for the precious children, whose faces beam with delight in reciting the little poem, a scripture verse, or singing a simple melody. Children's Day is for the children, not the sordid, disgruntled. Mr. and Mrs. S. Mr. Dinges is in the insurance business in Williamsport, and holds a position under the Underwriters Association. Dollar Wheat, Maybe.

Wheat is on the rise, and the dollar mark is predicted. That price would be fine, if it came around while the farmer had the berries in his bin, but at this time fully ninety-five per cent. of it has passed into the hands of the speculators. In fact, the greater part through a bloomer gathering string of the wheat sold in Chicago and New York today is simply represented on paper.

The old masters used such care in the selection of the woods for their instruments that, having found a piece of wood of proper fiber and vibrational powers, they treasured every fragment, no matter how small, and rather than waste even a particle of such a strip they frequently constructed the backs and bellies of patches so delicately put together that "the seams are only discoverable by microscope, so perfect is the cabinetwork." It was ever the aim of the old masters to "marry" the back of hard sycamore, which produces the quick vibrations, and the belly of soft wood, producing the slower sound waves, in such a manner as to give the mellow but reedy timbre of the perfect instrument. Anatomically a violin made by an old master is a miracle of construction. It can be taken to pleces, patched, put together, repaired indefinitely and is almost indestructible. Repairing has been the means of exposing many clever forgeries. The inside of a violin made by Stradivari. RHEUMATISM

Old Mr. Rheumatism hangs on tight and bites and pinches when he takes hold.

It's quite a job to shake him off. It's hard to believe that all the pain and trouble he causes comes from such a little thing. Just a tiny bit of acid in the blood the kidneys haven't taken care of. But the kidneys aren't to blame.

I used to think LAWRENCE TUSCANY. they were. Now

I know better. It's that over worked and over crowded stomach giving the kidneys part of its work and the kidneys can't do it. I found this out with Cooper's New Discovery. It puts the stomach in shape, that's all it does, and yet I have seen thousands of people get rid of rheumatism by taking it. That is why I am positive that rheumatism is caused by stomach trouble. Here is a sample of letters I get every day on the subject.

'For a long time I have been a victim of sciatica and inflammatory rheumatism, and my suffering has been too great to describe. For weeks I lay helpless with every joint in my body so tender and sore that I could not bear to move. The slightest touch would cause me the greatest agony. Several doctors treated me but they failed entirely. I tried many remedies but nothing seemed to reach my case, so I continued to lay helpless. My kidneys and stomach were affected also. I could eat but little, digest less and gradu-ally my strength left. I lost flesh rapidly."

"I began the use of the famous Co medicines of which I heard so much. To my surprise and delight I improved immediately, and after using several bottles I felt like another person. My strength and appetite returned. The pain and sore-ness left me and now I feel better than I have for months."
