Arab Fatalism.

Arab fatalism, which is at the root of his stoic impassiveness, though much talked of, is but little understood in its almost superhuman invincibility. This is brought into strong relief by the history attaching to one of the treasures of the Louvre museum. It is a human skeleton-a skeleton with a history. It is the disembodied framework of man, an Arab and an assassin. In the flesh he was Suleiman el Aleby, and his hand it was that murdered Kleber, the commander of the French revolutionary army in Egypt. For this crime he was condemned by a French court martial to have his right hand burned off, to be impaled and exposed to birds \$3400. of prey and to have his body reduced to a skeleton. The burning off of his hand Suleiman bore without a groan or even a wince, but toward the end of the dire ordeal the executioner happened to touch another part of his arm with the redhot iron. "This punishment," he shouted, with anger, "is not in the sentence." Then he underwent ing any expression or even a sign of feeling .- London Globe.

This curvature hurls the snow up against the top of the mountain, where it is shaped in the peculiar manner by the action and has repeatedly defended the grafters, force of the wind.—Translated From

Barrel Racing on Ice. An exciting form of winter sport in which Canadian boys excel is barrel racing on the ice. Ordinary barrels, with their heads removed, are placed at regular intervals along the race urse for about a quarter of a mile. Then at a given signal all the boys ment guarantees that the dinner will skate for the first barrel. Many reach It together, and as each skater must crawl through all the barrels in or der to win it is to be imagined that there is quite a scramble for first turn Sometimes a barrel wheels completely around while the boy is working his way through it, and when he comes out he is so confused that he skates off in the wrong direction. Usually the laugh of the spectators makes him turns about and tries to make up for lost time. It is quite an exciting sport and an interesting one also for the spectator, as the boys and barrels bob about in the most amusing fashion .-
