the time I was mustered out of the army, but in all my life I never suffered as in 1897. Headaches, dizziness and sleeplessness, first, and then dropsy. I was

weak and helpless, having run down from 180 to 125 pounds. I was having terrible pain in the kidneys, and the secretions passed almost involuntarily. My left leg swelled until it was 34 inches around, and the doctor tapped it night and morning until I could no longer stand it, and then he advised amputation. I refused, and began using Doan's Kidney Pills. The swelling subsided gradually, the urine became natural and all my pains and aches disappeared. I have been well now for nine years since using Doan's Kidney Pills."

TRANSFORMATIONS Curious Results When Coffee Drinking is Abandoned.

It is almost as hard for an old coffee toper to quit the use of coffee as it is for a whiskey or tobacco fiend to break off, except that the coffee user can quit coffee and take up Postum without any feeling of a loss of the morning beverage, for when Postum is well boiled and served with cream, it is really better in point of flavour than most of the coffee served nowadays, and to the taste of the connoisseur it is like the flavour of fine mild Java.

A great transformation takes place in the body within ten days or two weeks after coffee is left off and Postum used, for the reason that the poison to the nerves-caffeine-has been discontinued and in its place is taken a liquid food that contains the most powerful elements of nourish-

Alcohol In Air Of Chicago. Drunkenness lurks in the very at-

mosphere hovering over Chicago. Strangers entering the gates of the municipality may meet a wine breeze at the suburbs, a beer blast half way in, and in the heart of the city a tipple tornado that tears a man's temperance resolutions to tatters. All this is according to Miss Marie

C. Brehm, special lecturer, who told the Woman's Christian Temperance Union convention that the very instant the boundaries of Chicago were crossed alcohol could be retected in the air. She claimed it was a hard job to keep total abstinence resolutions amid such bacchanalian environment. The atmosphere, she son of toil?" asserted, is thoroughly rum-laden.

Brehm, "that men have become a wandering grasshopper, "it is so merely inhaling the fumes of the Chicago

former contents, so it is that a stranger entering Chicago from a prohibition town of high morals and principles feels the alcoholic intoxication in the very air he breathes. He finds himself becoming like those living in the impregnated atmosphere-stupefied morally and reeling mentally. There is just as much alcoholic difference between the air of an Illinois prohibition town and Chicago as there is between a bottle of water and a bottle of ammonia." -Chicago Record-Herald.
