AN EXTINCT ANIMAL.

The Saber Toothed Tiger Was a Formidable Creature.

The most remarkable of all the extinct feline animals are those known to naturalists as the saber toothed cats or tigers, a group comprising the greater part of all the fossil forms. They date back to the earliest times of which we know anything about the family in North America and reach down to the time of man himself. A large and powerful species described from the Indian Territory by Cope lived contemporaneously with the hairy mammoth, as evidenced by the commingling of their skeletons. There can be little or no question but that the hairy mammoth was contemporaneous with man in North America as well as in Europe. Its geological range is from the close of the eocene to the latter part of the pleistocene.

The chief peculiarity of the animal is the extraordinary elongated canine teeth. The tail is of unusual length and the legs are short. The animal measures about seven feet in length aside from the tail. The lower jaws have a downward projection in front, due to a flange-like widening of the jawbones, which doubtless served as a protection to the teeth, preventing their injury or loss. In some of the larger forms from South America this flange was not present, while the canine teeth were even more elongated than is the case with this species, attaining a length of over six inches and protruding far below the jaws when closed.

A FAMOUS ROAD.

India's Tree Bordered Highway 1,200 Miles in Length.

The road I have in my mind is in India and stretches 1,200 miles from Lahore to Calcutta. It is the famous Grand Trunk Road. Let me explain its nature, though I cannot do so by comparison, for there is no road of five miles in England that is anything like it. It is level. Indeed, there is not above a mile the whole distance where even a lady need dismount to walk. The material with which it is made is called kunker, and if you care to turn that word into concrete you have an idea of what it is like. It is exceedingly hard and as smooth as a prepared pavement. There is no dust. When I first got on this road and enjoyed the luxury of easy traveling I said, "This is magnificent, but in a little time I suppose it will become gritty and uneven." I went 50, 100 miles, 200 miles, 500, 600, 700 miles, and it was always the same, with not even a small stone to give a jog. Nearly the whole of the way is lined with a double row of majestic trees.

With two friends I rode across India during the hottest time of the year, in April and May, and was never seriously inconvenienced by the heat, for at a pace of fifteen miles an hour one could create a draft.—Chambers' Journal.

Roadside Wit.

He who matched wits with the author of "The Ancient Mariner" had indeed a lively task before him, for Coleridge was never caught napping. The poet was so awkward a horseman that his riding often attracted comment of anything but a complimentary nature. One day he was riding along the turnpike road in the county of Durham when a wag who met him fastened upon him as an excellent subject for sport. Consequently he drew rein and said in an impertinent drawl: "My graceful friend, did you happen to meet a tailor on the road?" "I'm inclined to think I did," said Coleridge meditatively. "I was not sure at the moment, but he said something about my meeting a goose farther along the road."

Past Salaries of Actors.

A number of autograph letters of Edmund Kean supply some interesting information about the salaries of actors early in the nineteenth century. One relates to an offer by Mr. Ellison offering Kean £3 a week as acting manager of "the new theater in Wyeh street." Later this rose to £25 a month. In 1820 Kean was offered £12,000 a year to go to America. In the prime of his popularity he received £200 for a week in Edinburgh and apparently reached the highest point when Mr. Bunn wrote from the Theater Royal, Dublin, on Feb. 8, 1820, and offered him £50 a night to play in Dublin and Cork.—Liverpool Mercury.

Home Influences.

Each one of us is bound to make the little circle in which he lives better and happier; each one of us is bound to see that out of that small circle the widest good may flow; each of us may have fixed in his mind the thought that out of a single household may flow influences which shall stimulate the whole commonwealth and the whole civilized world.—Dean Stanley.

Got Too Important.

"What has become of the maid you thought such a prize?" "Oh, I had to let her go!" replied the second fashionable woman. "After her operation for appendicitis she thought she was one of us."—Philadelphia Ledger.

Over 12 Inches of Snow.

Over twelve inches of snow fell Tuesday between the hours of seven a. m. and eleven p. m. About four o'clock a heavy wind began blowing, and heaped the snow in great banks in many quarters. Since the roads were clean of snow banks prior to the present snow, it will require but a short time to have the roads in a passable condition.

Penna Cave and Farm Sold.

Penna Cave and the Long farm containing two hundred acres was recently sold by John Wagner, of Bellefonte, to Messrs. H. C. and R. P. Campbell. The price paid to have been paid is in the neighborhood of \$15,000. The present owners of the property are brothers-in-law of H. D. Meek, of State College, who has the properties in charge, and advertises them to let in this issue of the Reporter. H. C. Campbell is a chemist, and is connected with the University of Pennsylvania, in Philadelphia, and R. P. Campbell is a resident of Toledo.

Penna Cave is a most beautiful subterranean cavern. Penna Creek rises at the mouth of the cave and flows through its entire length, and where it comes out of the earth again is a dam which could easily be made to furnish power sufficient to operate an electric light to light up the hotel and cave. With the expenditure of a few thousand dollars, Penna Cave could be made an ideal summer resort, and no doubt that is what the present owners have in mind.

Write a Word to the Readers.

The Reporter will be pleased to have short letters from its readers in the North, East, South and West, and in doing so it is asked that they be not too modest to make mention of their success in business; give the length of time they have been away from good old Centre county; tell about the country in which they live; prices of farm products; and, if they please, and occasion permits, mention others from Centre county who live in their community.

Several letters each week from distant subscribers could be made an interesting feature of the Reporter. It is not necessary to put the communication into flowery language, faultless grammar and correct orthography—facts, that is what are wanted. When facts are given the language can be recast. Send the Reporter short letters.

HUMAN RACE AFFLICTED WITH QUEER DISEASE

Cooper Says Internal Parasites Cause Much Suffering Everywhere.

The following remarkable statement was recently made by L. T. Cooper. It concerns the preparation which has been so widely discussed throughout the country during the past year, and has sold in such enormous quantities in leading cities: "It is now a well-known fact that wherever I have introduced my New Discovery medicine, hundreds of people have brought internal parasites, or tapeworms, to me. In many cases these people did not know the nature of the parasite, and were consequently extremely nervous until I explained the matter to them. In some cities so many have had this experience that the public generally became alarmed. "I take this opportunity of explaining what these creatures are, and what I have learned about them in the past. "Tapeworms are much more common than would be supposed. I venture to say that ten per cent. of all chronic stomach troubles, or what is known as a "rundown" condition, is caused by them. An individual may suffer for years with one of these great parasites and not be aware of it. "Contrary to general belief, the appetite is not greatly increased—it only becomes irregular. There is a general feeling of faintness, however, and a gnawing sensation in the pit of the stomach. "People afflicted with one of these parasites are nervous and depressed. Their chief sensation is one of languor, and they tire very easily. Lack of energy and ambition affect the body, and the mind becomes dull and sluggish. The memory becomes not so good, and the eyesight is generally poorer. "The New Discovery, in freeing stomach and bowels of all impurities, seems to be fatal to these great worms, and almost immediately expels them from the system. I wish to assure anyone who has the experience just related with my preparation, that there is no cause for alarm in the matter, and that it will as a rule mean a speedy restoration to good health. "The Cooper medicines are a boon to stomach sufferers. We sell them, J. D. Murray.
