

HOW TO KNOW PURE PAINT.

A Way in Which it May be Identified Before Using.

After a building has been painted long enough for a weather test, it is easy to tell if the paint used was made of pure White Lead or not. But such belated knowledge comes like locking the barn after the colt is stolen.

What one wants is a test that will tell the quality of the paint before it and the labor of putting it on are paid for.

Nature has provided a way in which genuine White Lead may be positively distinguished from adulterated or fake White Lead before you spend a cent on your painting.

Pure White Lead is made from metallic lead, and, under intense heat, such as is produced by a blow-pipe, pure White Lead will resolve itself back into metallic lead. If, however, it is not genuine White Lead, or if it contains the slightest trace of adulteration, the change will not take place. Therefore the "blow-pipe" test is an absolute and final one.

The National Lead Company, are urging every one interested in painting to make this test of paint before using it, and they guarantee that the pure White Lead sold under their "Dutch Boy Painter" trade-mark will always prove absolutely pure under the "blow-pipe" or any other test. To make it easy for you to perform the experiment they will send you free upon request a blow-pipe and everything necessary for you to make the test, together with a valuable booklet on paint. Address, National Lead Company, Woodbridge Building, New York City.

Getting On.

Two girls returning from Sunday School in the country were discussing their progress in the shorter catechism. "I'm past original sin," said one. The other immediately responded: "Oh, I am farther on than you, for I'm past redemption."—London Tit-Bits

The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. The proprietors have so much faith in its curative powers that they offer One Hundred Dollars for any case that it fails to cure. Send for list of testimonials. Address F. J. CHENEY & CO., Toledo, O. Automobile Mortality.

Consul Frank W. Mahan writes from Nottingham England that the secretary of the Highways Protection League reports that, according to accounts in the press, 983 automobile accidents occurred in Great Britain in 1907, killing 213 persons and injuring 673. For these accidents and other motor car offenses 2,370 persons were summoned, of whom 2,046 were convicted. As the number of automobiles in use is estimated at 45,000, it would seem that one in about every twenty-two did something illegal last year.—Kansas City Journal.

Postage Overpaid.

One day a wire basket fell off the top of a clerk's desk and scratched his cheek. Not having any cure plaster at hand, he slapped on three cent stamps and continued his work. A few minutes later he had occasion to take some paper to his employer's private office. When he entered, the "old man," observing the postage stamps on his cheek, fixed him with an astonished stare. "Look here, Jenkins," he said, "you are carrying too much postage for a second-class matter!"—Indianapolis News.

MUSIC STUDENTS Should Have Steady Nerves.

The nervous system of the musician is often very sensitive, and any habit like coffee drinking may so upset the nerves as to make regular and necessary daily practice next to impossible.

"I practice from seven to eight hours a day and study Harmony two hours," writes a Mich. music student. "Last September I was so nervous I could only practice a few minutes at a time and mother said I would have to drop my music for a year.

"This was terribly discouraging, as I couldn't bear the thought of losing a whole year of study. Becoming convinced that my nervousness was caused largely by coffee, and seeing Postum so highly spoken of, I decided I would test it for a while.

"Mother followed the directions carefully and I thought I had never tasted such a delicious drink. We drank Postum every morning instead of coffee, and by November I felt more like myself than for years, and was ready to resume my music.

"I now practice as usual, do my studying and when my day's work is finished I am not any more nervous than when I began.

"I cannot too highly recommend Postum to musicians who practice half a day. My father is a physician and recommends Postum to his patients. Words cannot express my appreciation for this most valuable health beverage, and experience has proven its superiority over all others. "There's a Reason."

DEALING WITH ANARCHY BEGUN

Washington Officials Admit Difficulties—Not Optimistic as to Outcome of the Latest Measures—Effective Measures Too Drastic to Receive Popular Support—Restrictions on Immigration Inadequate to Keep Out Anarchists.

Washington, D. C.—It may not be reassuring information, but the Washington officials are none too optimistic about the outcome of the attempt to drive all the anarchists from the United States. Those officials whose duty it is to deal directly with the anarchists cannot talk for publication. The officials who can issue orders to immigration inspectors telling them to be alive to their duty have talked for publication, but the talk, like much of the work done, is impotent. Some one here has said that anarchists are made, not born. This is largely true, and anarchists will be made as long as there are anarchist teachers who get within touch of receptive pupils. This means that as long as there are anarchists in the country their ranks will grow daily.

Since the shooting of the priest at the altar in Denver and the attempted killing of the chief of police, Shippy, in Chicago, the Senators and Representatives have been busy talking about immigration measures, but they have confined their talking largely to the corridors and cloak rooms. Most of them are just as afraid to-day to pass a restriction bill that means restriction as they were before the shooting gave them sharp excuse for the passing of an absolutely drastic measure.

One member, who is not more than one generation removed from being a foreigner himself, told your correspondent that it wouldn't do to draw a line part way up the continent of Europe and to say that no one from below the line should come to this country. "What we ought to do," he said, "is to draw a line down the middle of the Atlantic Ocean and another one down the middle of the Pacific Ocean, and to say no one shall cross."

When a New York Representative, on the floor of the House, spoke in advocacy of a really restrictive immigration measure, several Representatives whose constituents are largely Southern Europeans, at once began missionary work. They told the other members what a wrong it would be to punish the many because of the failings of the few, and they did not neglect to touch on the matter of power, the balance of power, of course, which the men coming from some of the European countries hold at the polls in America.

One member, an Illinois man, told a colleague who was urging no action, that it would be far better for him and for his people in the future to have all immigration stopped from their native countries for a series of years, until the United States had opportunity to assimilate those that were here to that point of assimilation which means the dropping of hyphens and writing of themselves as Americans.

PANAMA CANAL MUST FAIL, SAYS STEVENS.

Former Chief Engineer of Isthmian Waterway Gives Reasons For Prophecy.

New Haven, Conn.—John F. Stevens, a vice-president of the New York, New Haven and Hartford Railroad, and a former chief engineer of the Panama Canal, has issued a statement regarding the latter enterprise, in which he prophesies a failure of the undertaking.

In this statement Mr. Stevens says that the canal will not help the United States in its trade with South America, as practically all of the inhabitants of the Southern Continent are on the east of the Andes, so that it would be of no advantage to make use of the canal to reach there. Mr. Stevens also says that in our commercial relations with the islands of the Pacific and the Far East the canal will be of little value. Our coal and wheat centers are inland. Their products have to be started on their way by rail. When loaded on cars it would not be cheaper to ship to the Atlantic and then ship to the East by the way of the canal than it would be to send directly to the ports on our Pacific coast and then get on board ship.

Furthermore, Mr. Stevens believes that our coal supply is fast diminishing and that China will be the coal country for the future. Siberia, he says, will be the wheat country of the future, with India a close second.

Mr. Stevens maintains that the

The last two annual reports have shown a profit of \$5000, and have done much to justify Northampton's experiment of maintaining a municipal theater.

TEN YEARS OF BACKACHE.

Thousands of Women Suffer in the Same Way.

Mrs. Thos. Dunn, 153 Vin St., Columbus, Ohio, says: "For more than ten years I was in misery with backache. The simplest household work completely exhausted me.
