The Gearless Hay Loader.

Farmers can save much time, worry and expense by purchasing the best machinery on the market, and since such an unprecented hay crop is staring every tiller of the soil in the face, attention is called to the many merita of the Gearless hay loader, sold by J H. and S. E. Weber, of Centre Hall It is just what the name indicates-a hay loader without gears-no chains, no sprockets, no drums, no return webs. The draft is light; the rakes will a just themselves to the uneven soil; there is no eloging; no need to use the side delivery rake-the leader takes the hay clear from the swath. It is an ideal machine in every respect, and lessens the labor of the man on the wagon, because it has the power to push the hay forward, and no matter what the conditions, once the hay is elevated it will not again be drawn to the ground.

A Genius at Excuses.

"While I was stage managing a piece some time ago," said a theatrical magnate, "one of my show girls showed superb. She was always late for rebearsal. Her excuses were great. All her friends and relations had a secies of maladies which were remarkable in their number and diversity. She wursed them all until by naturally save up the ghost. About an hour was enough to bury most of them. Then she caught on to mechanical desices. Street cars were invariably late-just as late as she was, in text. Then in turn came certain inconveniences in sticking until finally came the denouement. It was in Philadelphia. The siren did not appear until nearly two hours after the proper time. I booked at her and waited. The excuse came

How the Cook Did It.

He had a number of guests to dinner, and he was doing the carving. He had deftly taken two slices off the joint, and he was turning off a third when the blade struck a shewer, made a sliding motion and came out at the top, with the result that the proposed slice looked like a dead leaf ourled up by the sun's rays.

He could not say intense things in the presence of his guests, so he froze his wife with a glance, dug the skewer out viciously, made a grim joke conwood and ordered little Willie, who had made several attempts to speak, to keep slient or leave the table.

His evident temper led to an embarrassing silence, and Willie saw an opening that he could not resist.

"Cook burned her nose orful!" he announced. "Too bad," said the mother, glad of any excuse for conversation. "How

did she do it?" "Why," answered Willie very apropos, "trying to pull them skewers out with her teeth!"-London Scraps.

An Indignant Artist.

The sensational offers said to have been made by theatrical managers to trial must have made professional stars feel very much as did the painter Haydon in 1846 when two of his inest pictures were being shown at the Egyptian hall, and the public threnged into another room where General Tom Thumb was on view. "They rush by thousands to see Tom Thumb." wrote the disappointed painter in his dary The Gregg township auditors held a "Their eyes are open, but their sense special meeting in the school house on is shut. It is an insanity, a rathes, a madness, a furor, a dream?" Another entry later on runs: "Tom Thunks had 12,000 people last week, R. R. Himdon 1331/2 (the half a little girl). Exquisite taste of the English people!" We do not seem to have progressed much

> Diameter of a Fine Wire. Should you ever find it necessory to obtain the diameter of a fee wine, it may be done in this manas: Wad it carefully around a piece d penal in one layer for an inch or se, that each turn is touching the previous one. JUNE ON THE GREAT LAKES.

Restful, delightful, interesting, and instructive, there is no trip like that on the Great Lakes, those inland seas which form the border line between the United States and Canada. And June is one of the most charming months in the year in which to take the trip.

For comfort the fine passenger steamships of the Anchor Line have no superiors. As well-appointed as the palatial ocean greyhounds which plow the Atlantic, their schedule allows sufficient time at all stopping places to enable the traveler to see something of the great lake cities and to view in daylight the most distinctive sights of the lakes, and the scenery which frames them.

The trip through Detroit River, and through Lake St. Clair, with its great ship canal in the middle of the lake, thence through Lake Huron, the locking of the steamer through the great locks at the Soo, and the passage of the Portage Entry, lake and canal, across the upper end of Michigan are novel and interesting features.

The voyage from Buffalo to Duluth covers over eleven hundred miles in the five days' journey. Leaving Buffalo, the steamships, Juniata and Tionesta, make stops at Erie, Cleveland, Detroit, Makinac Island, the Soo, Marquette, Houghton and Honcock, and Duluth.

The 1908 season opens on June 16, when the Steamer Tionesta will make her first sailing from Buffalo.

The Anchor Line is the Great Lake Annex of the Pennsylvania Railroad, and the service measures up to the high standard set by the "Standard Railroad of America."

An illustrated folder, giving sailing dates of steamers, rates of fare, and other information is in course of preparation, and may be obtained from any Pennsylvania Railroad Ticket Agent, who is also prepared to book passengers who may desire to take this trip through the Great Lakes and back.
