Box Alder Should Go.

The writer's attention was the other day called to the fact that the box alder, or some times called black alder, should not be permitted to grow any where. The seeds spread, and the young alder become an intolerable nuisance.

The recounting of this experience should be sufficient to impel every one having this variety of trees growing briefly before acting. to at once set about to destroy them.

The sight of a box alder growing along Main street as a shade tree, brought about a discussion of the subject. The alder should go.

A friend of mine, writes a Scottish correspondent, recently saw a piece of paper lying on the street. He picked it up. It was a one pound note. Some men might have pocketed it, with a smile of satisfaction. My friend, however, honestly handed it over to the police. A short time afterward he discovered that he himself had lost a pound. He thought over the matter and remembered that before finding the note he had been standing on the edge of the pavement for some time. It slowly dawned upon him that the pound he had found was his own and that he had drawn it from his pocket unconsciously. He went back promptly to the police station and explained the circumstance. The officer in charge only shook his head and smiled incredulously. "Very clever," he said, "but-eh-it will scarcely do." If my friend cared to call back at the end of six months, he was informed, he would get the pound if in the interval it had The gentleman further related that not been claimed. During this time

Traps of the Ant Lion.

We read of the tiger traps in Indiagreat pits dug in the ground and covered lightly with pliant bamboo. The tiger steps upon the false top and before it can retreat is precipitated into a trap. Walking along a sandy road, look for tiny circular pits sunk below the surface and then sit down and watch an exciting episode in the life of the little still hunter which has dug the pitfall. It is invisible, and for some time the whole affair seems lifeless. Then an ant comes blundering slong and without warning topples over the edge and begins to slide down the incline. But the insect aghts hard for life and seems about to make its escape, when, io, the sand grains heave upward at the bottom and with a jerk are horied like a miniature catapult at the ant, knocking it over and rolling it to the bottom. The ant lion, for such it b, now seizes its prey and after sucking its juices easts the dry body away and meads its pit against the coming of another vietim. - Chicago

Getting His Money's Worth.

A New Hampshire man tells of a tight fisted man of affairs in a town of that state who until recently had never been observed to take an intercet in church matters. Suddenly, however he became a regular attendant at divine service, greatly to the aston-Ishment of his fellow townsmen.

"What do you think of the case of old Keichum?' said one of the business men of the place to a friend. "Is It true that he has got religion?"

"Well, hardly," replied the other. The fact is it's entirely a matter of business with him. I am in a position to know that about a year ago he loaned the postor \$50, which the latter was mable to pay. So there remained nothing for Ketchum but to take it out is pew rent."
