The cement brick is matured in the open air, and is ready for use within ten days after leaving the compressors. Should the slag prove to be desirable material, the great mountain of waste may be manufactured into the most valuable building bricks on the market.

**SIGN OF A BEATEN MAN.**

Runner Who Looks Behind Almost Sure to Lose the Race.

"There are many more good distance runners now than in my days," said an old time champion after watching a three mile scratch race at the New York Athletic club games. "But the habits of the runners have not changed any. For I noticed one little trick in the race that bore the significance that used to attach to it.

"To the casual onlooker there was nothing to choose between the two leaders when they were beginning the last quarter of a mile. Right from the crack of the pistol they were running almost stride for stride with the low, graceful, easy action of the real long distance runner.

"Neither had called into use the reserve power which must be utilized in the final sprint for victory when they turned into the stretch for the final lap. Then one of them slightly turned his head to see where the third man was.

"That man is beaten," was the thought which occurred to me at once, and it proved true, as always, for when the dash for the finish began he allowed his rival to get a lead of five yards before going after him in earnest pursuit.

"From that point to the finish there was no perceptible difference in the speed of the men, but the man who had turned his head to make sure that he would get second place, instead of bending every energy to win, of course landed where his thoughts placed him."—New York Sun.

**The Gun Barrels Grew.**

In the early days in the northwest, when the Hudson Bay company laid the foundations of great fortunes by trade with the savages and a gun paid for as many beaver skins as would reach to the muzzle of it, the skins packed flat and the gun held upright, it was alleged that the barrel of the weapon grew and grew with each successive year until the Indian, after he had bought it with the peltry, had to borrow a file and cut off a foot of useless metal.

Rural mail carriers who want a vacation at the expense of the government will have to crowd in between July 1st and November 1st, according to an order just issued by the post-office department at Washington. Rural carriers are allowed two weeks off each year with pay. In the past they were permitted to take their two weeks whenever they desired and it did not matter to the government whether it was taken in July or March just so it was taken. It is all different now. Rural carriers will have to take their time off during the nice weather and will not be able to lay off in the winter time when the country roads are at their worst.
