Mingle, executors—Chamber suit, organ, cook stove, double heater, bed clothing, etc. SATURDAY, SEPTEMBER 26, 12:30 o'clock, near Centre Hill, personal property and real estate of the late Jonas B. Royer. See adv.

LOCALS.

Fred Krumrine purchased the Benjamin Corl property back of State College and will make some repairs before occupying it in the spring.

Remember, it is looking down that makes one dizzy. Look up, and your brain clears, your heart grows calm, your strength comes to you for every task and every emergency.

The Reporter—readers and their friends are welcome at all times at this paper's headquarters during the Grange Encampment and Fair. All accommodations at its quarters are free and are provided especially for you.

Miss Effie Snyder, recently elected as an instructor of the Grammar grade in the Bellefonte public schools, tendered her resignation, having accepted a better position, to teach chemistry and physics in the Chicago city schools.

Mrs. Thomas King Morris, Mrs. Delphi Stover and Mrs. George Hszel, of Bellefonte; Mrs. Roxanna Keys, of Milesburg, and Mrs. Katharine Mothersbaugh, of Boalsburg, were operated on recently for appendicitis at the Bellefonte Hospital.

During a thunder storm lightning struck a big oak tree close to the dancing pavilion at Hecla park and not only literally shattered it to splinters but tore up the roots for a distance of from fifteen to twenty feet from the trunk of the tree, giving it the appearance of having been blown up with dynamite.

A few students can yet be accommodated in the dormitories of the Lock Haven State Normal School for the Fall term which begins September 7th. The school is usually filled during the entire year, hence the number of rooms are limited. You will make no mistake to select this thoroughly established school. Address the Principal for a catalogue.

John C. Swabb, of Erie, accompanied by his uncle, Henry Swabb, of Centre Hall, called at the Reporter office Friday. Mr. Swabb has charge of the tool department of the Heisler locomotive shops, at Erie, which concern builds locomotives for the lumber regions of the northwest. He is a son of George Swabb, of Linden Hall, and it was to visit his aged father that he came here at this time.

With a view of affording comfort to mothers who cannot attend the Grange Encampment and Fair without taking with them the baby, The Centre Reporter will have furnished a tent for their use. It will be open at all hours and devoted exclusively to mothers, the baby and little children. Comfortable chairs, cradle and crib made up with clean linens, will be at the mothers' service, and everything free as the air.

Tests of the sample cement brick made from the huge pile of furnace slag lying along the pike this side of Bellefonte have demonstrated that they are superior to the ordinary brick. If the vast quantity of slag would be manufactured into brick it would undoubtedly prove profitable to the manufacturer, employ labor, and give this section an opportunity to obtain the best possible building material.

A Milroy correspondent to the Lewistown Democrat and Sentinel makes this reference: A party from this place consisting of W. B. Harvey, wife and two daughters, John A. Camp wife and son, Mrs. Mary Albright and son, Porter, Miss Gertrude Camp, Mr. and Mrs. B. M. Zook and Maurice Spear, of Philadelphia, and Milton Hoffman, of Tyrone, drove to Pottery Mills where they had dinner, and from thence to Centre Hall where they took supper. They stopped at Patrick Garrity's famous hostelry on their way over and report a good time generally.

HUGE STACK FALLS.

Many workmen Had a Narrow Escape at Glen Iron Stack Was Built Eighty-Two Years Ago.

Upwards of fifty men had a miraculous escape at Glen Iron a few days ago from being crushed to death when the immense stack of the Glen Iron Furnace company caved in and fell to the ground, shattering the buildings within its scope. The stack which was built in 1826, was forty feet high with a twenty foot foundation, being forty-five feet square at the top it was a massive piece of masonry, and when it fell it caused a great deal of excitement in the western part of the county. Fortunately the men at work in the furnace heard a squeaking noise a short time before the wreck occurred and all vacated the building. Had it not been for the warning noise upwards of fifty men, the entire number of employees at the furnace at the present time, would have been killed or injured. The furnace is operated by John L. Church, who will immediately rebuild.

Complete the Plant.

The borough council is discussing the matter of laying new pipes to the Laurel spring and enlarging the intake sufficiently to enable the pipes to carry all the water from that spring to the reservoir. The water plant should be completed. For a number of years the borough has been able to draw from its water plant a needed supply, but the supply was an uncertainty during the "dry spells" each year. The thought of a water famine for a month or more each season is neither pleasant nor helpful to the growth of our splendid borough, and especially so when the borough owns overflowing springs within easy access.

The people have their money invested in the water plant. They have now what may be reasonably sure to be a reservoir that will hold water to the brim; also a good pipe line, and all that is needed to give the borough a complete water system to supply its wants for a number of years to come, is to lay pipe of sufficient size to bring all the water from Laurel spring to the reservoir. Without taking this step, the building of the reservoir may be said to be useless—the money expended without purpose. By completing the plant, the taxpayer will have the full benefit of the money invested—water as pure as can flow from mother earth for both domestic and power purposes; and protection to his property in case of fire. And all this at a cost much below what a private corporation would levy as a water tax.

Complete the plant.

The Vacation Season.

Some one, whose name is unknown to the historian, years ago arbitrarily fixed upon the 1st of September as the end of the vacation period. By what authority he did so no one knows, but all do know that he succeeded in getting the people to come to his frame of mind and agree to it that such should be the date. The fact of the matter is that it is but rarely that business receives any great impetus with the coming of that special date. If it did there would be many happy people, yet at the same time the date does bring to them visions of a winter coming on and also the fact that there are coal bins to fill and no money with which to buy the fuel.

It Saves You Money

The special half-price sale of Dr. Howard's specific for the cure of constipation and dyspepsia by J. D. Murray means the saving of a few dollars on every family's yearly bill for medicines.

Each 50 cent bottle (Mr. Murray sells it for 25 cents) contains sixty doses of a medicine that is pleasant to take and which can be depended upon to cure the worst case of constipation, dyspepsia or liver trouble. Mr. Murray has so much faith in the superior merit of this medicine that he says: "If Dr. Howard's specific does not cure you, come back to my store and I will return your money."

If you are troubled with constipation headache or dizziness, or if your food does not digest naturally and easily, you cannot afford to let pass the special price that Mr. Murray is making this week on Dr. Howard's specific.

Mr. Murray is giving his customers a chance to try Dr. Howard's specific for the cure of constipation and dyspepsia at just half the regular price, 25 cents. And every package is sold under his personal guarantee to refund the money if it is not satisfactory.

A large number of young people go away to school each year. To those who are considering the question of a school, it is desired to call their attention to the Lock Haven State Normal School. This institution has a fine reputation for doing excellent work. It is modern and up to date. It is in a prosperous condition. The Fall term begins September 7th. Write for a catalogue.

Mrs. George O. Benner attended the Williams reunion at Marthas, and on her return to Centre Hall brought with her a niece, Lydia Eberts, a lass of twelve years, who will remain until after the Grange Encampment and Fair.

THE SPIRIT OF HIS SISTER.

How an Apparition From the Unseen World Aided the Brother in Deciding an Important Legal Question—The Phantom on the Grave.

Three times in my life, each instance separated by an interval of years, have the experiences here told been mine. I come of a family to different members of which have become visible at times those appearances which for want of a better name are known as "ghosts." It is at least possible that the superstition regarding the second sight of one born with a veil may have some foundation in scientific fact, for my uncle was thus veiled at birth, and all his life from infancy vacant space was peopled to him with forms, which he would describe so accurately in dress, appearance and manner that listeners would instantly recognize departed friends, gone over years before my uncle's birth in many instances.

It was not till he was a large boy that he realized that the forms seen by him were not visible to others. Pages could be written of his experiences, but I am not here to give hearsay evidence, but my own personal experiences, the sights seen with my own bodily vision.

The first instance was so early in my life that I do not recall it, but my mother relates the circumstances. Our home was in Brooklyn, and we had gone for the summer to Greenfield Hill, Conn. I was so young that I still wore dresses and was in charge of receiving visits from Annie, a girl of her own class, so that I was well acquainted with Annie.

She died suddenly and was buried in the country churchyard, but I was not told of her death, being considered too young to understand. As I walked with my nurse past the cemetery one evening in the edge of dusk her superstitious horror can be imagined when I cried, pointing directly to Annie's grave: "Oh, Maggie, there is Annie! She is waving her hand for us to come over to her!" I broke away from my nurse and ran to the cemetery fence. She caught me up and ran in a panic to the house, nor would she ever again pass the cemetery after dark.

The only idea in my mind was that of a familiar friend whom I had not seen for some time.

The second instance was at the most unromantic age possible to a boy—about thirteen. I was attending boarding school in Dedham, Mass.

A school friend, a boy of about my age, had left the school some days before for his home in the west, leaving in perfect health.

At about 9 in the evening I sat on the edge of the bed removing my shoes when the wall of the room seemed to part and open, showing the night outside, with the dim forms of the trees gently waving in the wind. As I sat spellbound at this strange sight in the rift of the wall against the background of the night stood my friend as I had last seen him, just as in life. He waved his hand to me in token of farewell, stood looking at me a moment, and gently the vision faded.

I said to my roommate, who had seen nothing: "Charlie is dead. I have just seen him." The next morning a telegram to the school said that he had died the night preceding.

In the third instance I had grown to manhood—a normal, healthy man, over six feet tall and weighing nearly 200 pounds. I am a civil engineer, the hardy outdoor life being far removed from dreams and morbid imaginings.

It was on one occasion necessary for me to consult a lawyer, and one evening I met the lawyer in his Boston office to talk over a matter of business. In the course of the conversation he asked me a question which I was undecided about answering. I stopped a moment before replying, for consideration, lowering my eyes, and when I raised them, there stood behind the attorney a favorite sister, dead many years.

Her eyes were fixed on mine, her fingers on her lips. I instantly absorbed the idea conveyed by her suggestive pose and did not give the lawyer the information he asked. As I afterward proved, it was greatly to my interest not to do so.

The lawyer shivered slightly as the visitant stood behind his chair and said that there was a draft through the room.

He never knew that the sensation of cold conveyed to his nervous system was a breath from an unseen world.

Science has proved that light, sound and color are all the results of vibration of greater or less rapidity. Some of these vibrations affect our senses and we see, hear or feel their effects. But what of the vast space filled with those vibrations which affect none of our senses, yet are unknown to science? Could our senses respond to them what secrets of the unseen might not be revealed, and who can say but the secret of these strange sights which sometimes greet the eye of mortals is hidden in this unknown range of vibrations, hiding a world that is all about us, mingling with and overlapping, surrounding and telescoping our common humdrum daily life and only in rare moments of attunement drawing the veil aside for a glimpse into the unknown.—New York Herald.

"The Younger Set," by Robert W. Chambers, will be published in serial form in the Philadelphia Sunday Record, beginning Sunday, September 6th. An advance order to your news-dealer would be advisable.

The reservoir wall is about completed, and in a few days the basin will be ready to receive the water from the various springs.

ADMINISTRATOR'S NOTICE.—LETTERS of administration on the estate of Isaac Long, late of Greeg Township, deceased, having been duly granted to the undersigned, they would respectfully request all persons knowing themselves indebted to the estate to make immediate payment, and those having claims against the same to present them duly authenticated for settlement.
