AN ISLAND OF QUIET.

Yet Going Downtown in Madeira is an Exciting Event.

Madeira is populated, yet is one of the quietest as well as one of the most beautiful places in the world.

All vehicles in Madeira are on runners. If you go calling it is in a bullock sledge with canopy top and comfortable seats.

Two strong men, each holding a guide rope, pull your car over a bag of grease to grease the runners and then give you a running shove and jump each on a runner behind as the car shoots down at a breakneck pace over the cobblestones.

The men yell, hens and dogs scamper, foot passengers cling close to the wall of the narrow street, the runners get hot and fill the air with odor of burning wood as you shoot round sharp corners, down the busy thoroughfare, past gorgeous masses of flowering creepers which hang over the walls of the private villas that border your road.

But, oh, the change when you get to the bottom! You are obliged either to walk or take a carro, drawn by slow moving bullocks, squeaking and slipping over the stones.

ORIGIN OF THE HORSE.

The Modern Animal a Cross Between Two Ancient Breeds.

In Wissen fur Alle Professor Koenig discusses in some detail the origin of the horse of today. He finds that the horse of neolithic times was not specifically distinct from the horse of the present.

The horse of that time was closely allied to the tarpan or semi-wild horse that lived in southern Russia up to a century ago.

The Egyptians had horses as early as 1900 B. C. These were long maned, more like the Arab horses, and came from Assyria.

The origin of the long maned horse is a matter of doubt, but Professor Koenig thinks it may have been from an extinct Indian species.
