China's Baby Emperor.

Poor little Pu Yi finds himself at the age of 3 called upon to rule over a population of some 430,000,-000 and an area of 4,250,000 square miles. It would seem to be a job for a man full grown. The mated population of the United States, including our insular dependencies, is something less than 100,-000,000 and our area 3,750,000 square miles. And the President of the United States is certainly not likely to find a single hour of the working day hanging heavy on his hands.-Philadelphia Public Ledger.

Some Curious Wills.

The Irish gentleman who has left £1,000 to a religious house on condition that his wife enters it and spends the rest of her life in prayer is another example of the quaint methods by which the dead some times endeavor to control the living. It was a blunt farmer who drew

up his will leaving £100 to his widow. When the lawyer reminded him that some distinction should be made in case the lady married again, he doubled the sum, with the remark that "him as gets her'll deserve it."

It was a wealthy German who, fifteen years ago, bequeathed his property to his six nephews and six nieces, on the sole condition that each of the nephews married a woman named Antoine and each niece married a man named Anton. The firstborn of each marriage was to be named Anton or Antoine, according to sex. Each marriage was also to take place on one of St. Anthony's days. What happened to the nephews and nieces is "wropt in misery" in the office of the German registrar general.-From Tit-Bits.

Why Preachers Live Long.

The British statistics of mortality, just published, show what we all knew before that more clergymen live to old age than the members of any other profession. What is the reason? In part that they are a little older in entering their profession than in almost any other business, which cuts out, in the statistics, those that die before 25. Next, they live a regular life, with no excesses; and they take a moderate amount of exercise, while mostly protected against exposure. something may be credited to the philosophy of religion, which tends to an equable frame of mind .- Independent.

THEN AND NOW Complete Recovery From Coffee Ills.

"About nine years ago my daughter, from coffee drinking, was on the verge of nervous prostration," writes a Louisville lady. "She was confined for the most part to her home.

"When she attempted a trip down town she was often brought home in a cab and would be prostrated for days afterward.

"On the advice of her physician she gave up coffee and tea, drank Postum, and ate Grape-Nuts for breakfast.

"She liked Postum from the very beginning and we soon saw improvement. To-day she is in perfect health. the mother of five children, all of whom are fond of Postum.

"She has recovered, is a member of three charity organizations and a give Postum and Grape-Nuts the credit for her recovery.'

Women Officeholders.

The number of women elected to office in Ireland during the present year is a gource of much satisfaction to the advocates of equal suffrage. Five women-Mrs. L. A. Barr, Mrs. Griffin, Miss Hamilton, Lady Dockrell and Miss G. Leake Griffin-were elected as urban district and town councillors. Forty-three were elected as rural district councillors and poor law guardians, twenty of them for the first time. As poor law guardians there were no less than 103 women elected during the summef alone. The Irish Woman's Suffrage Association held a brilliant meeting in the Mansion House in Dublin by permission of the mayor in the first week in September.
