The readers of this paper will be pleased to learn that there is at least one dreaded disease that science has been able to cure in all its stages, and that is Catarrh. Hall's Catarrh Cure is the only positive cure now known to the medical fraternity. Catarrh being a constitutional disease, requires a constitutional treatment. Hall's Catarrh Cure is taken internally, acting directly upon the blood and mucous surfaces of the system, thereby destroying the foundation of the disease, and giving the patient strength by building up the constitution and assisting nature in doing its work. A Knowledgeable Person.
An English marvel has come to this country to answer any question as to quantity or date that may be asked him. It is said that knowledge is power, and according to this, that man must be a powerful man, but on the other hand, it is very likely he is nothing of the kind. A man may know so much that the knowledge is in his way and interferes with his thinking and doing. Knowledge is power only when it is put to work, and to reach this point there must be a disposition or resolution in this person to be something. Always getting knowledge, but never assimilating it or putting it to some good use, is apt to make the individual negative if not worthless. So our educational institutions should always weave purpose alongside of instruction. The person who cannot or will not make the fact he has learned vital is not educated. Industrial training recognized this doctrine, and so does every other true educational purpose.—Ohio State Journal.

Didn't Need Help.
Four-year-old Helen wished to get into the playground, but the gate (which had been put at the door to keep her baby brother in) was locked. She tried again and again to climb over it, when at last her mother heard her say, "Dear God, please help me get over this gate." Just then she tumbled over, and said, "Never mind, I got over myself."—Harper's Magazine.

SISTER'S TRICK
But it all came out right.
How a sister played a trick that brought rosy health to a coffee fiend is an interesting tale:
"I was a coffee fiend—a trembling, nervous, physical wreck, yet clinging to the poison that stole away my strength. I mocked at Postum and would have none of it.
"One day my sister substituted a cup of piping hot Postum for my morning cup of coffee but did not tell me what it was. I noticed the richness of it and remarked that the coffee tasted fine, but my sister did not tell me I was drinking Postum for fear I might not take any more.
"She kept the secret and kept giving me Postum instead of coffee until I grew stronger, more tireless, got a better color in my sallow cheeks and a clearness in my eyes, then she told me of the health-giving, nerve-strengthening life-saver she had given me in place of my morning coffee. From that time I became a disciple of Postum and no words can do justice in telling the good this cereal drink did me. I will not try to tell it, for only after having used it can one be convinced of its merits.
"Ten days' trial shows Postum's power to rebuild what coffee has destroyed. "There's a Reason."
"Look in pkgs. for the famous little book, "The Road to Wellville."
"Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest."

NEWS OF PENNSYLVANIA

EXPECT GOOD FISHING.

Shenandoah Anglers Look Forward To Improved Season.
Shenandoah.—Fishermen are looking forward to one of the best trout seasons of many years. The advance guard who made a special tour of many streams have returned and report this year has the earmark of unprecedented conditions. They claim the early disappearance of ice and snow has raised the temperature of the water, which is remarkably clear. The mild weather caused the thaw to be gradual, doing away with icy waters, cold and muddy, causing much joy in nimrod circles.
To add to the bright outlook thousands of trout fry from the State hatcheries have been deposited in the numerous streams hereabouts for the last three seasons by the local anglers, who now hope to be rewarded for all their trouble in the past.

CORPORAL PUNISHMENT.

The moral delinquency of the rising generation is attracting the earnest attention of students of social and moral questions throughout the world.
To check this, many remedial and disciplinary plans are being suggested. The lack of parental instruction and discipline in one fruitful cause of moral deficiency. Many feel that the school must assume this duty which the parent neglects. Every child must be taught obedience to law and a higher authority. A return to corporal punishment in the public schools is, therefore, being advocated by many teachers and publicists.
President Hall of Clark University has recently proposed some novel remedies for the waywardness of American youth. He says that "a sound rebuke from parents and teachers usually has a salutary effect, especially if the scolding, when necessary, is followed up by punishment which has fallen still more in to demerit, 'flogging.'"—Milwaukee Sentinel.

MIND YOUR P'S AND Q'S.

The most probable derivation of this phrase is that it comes from the printing office, and rose from the fact that the p's and q's in Roman type very but slightly in form, and that when reversed, as they necessarily are in type, they are easily confounded by young compositors. Another derivation refers to the "scot" written up in the ale-house, where P and Q were used to designate pints and quarts. Still another derivation refers to the toupees and queues of olden times.

THE CRACKING OF PAINT.

Property Owners Can Save Money by Learning the Cause.

Do you know what is wrong when paint peels, or cracks, or otherwise necessitates premature re-painting? Well, sometimes it hasn't been properly applied—the surface being damp or there being too much turpentine or too much drier.
But, nine times out of ten, the trouble is caused by adulterated white lead.

To avoid all such trouble, every houseowner should know in a general way, when a surface is in proper condition to receive paint, what kind of primer and finishing coats different surfaces require, and how to avoid adulteration in materials.

A complete painting guide, including a book of color schemes, specifications for all kinds of painting work, and an instrument for detecting adulteration in painting materials, with directions for using it, can be had free by writing National Lead Company, 1902 Trinity Bldg., New York, and asking for Houseowner's Painting Outfit No. 49.

This company, the largest makers of pure white lead, invite tests, by means of the blowpipe (included in outfit), or in any other way, of the purity of the white lead sold under their famous "Dutch Boy Painter" trademark. That trademark on a keg of white lead is in itself an absolute guarantee of purity and quality.

CHILD ATE CUTICURA.

Spread Whole Box of It on Crackers—Not the Least Injury Resulted—Thus Proven Pure and Sweet.

A New York friend of Cuticura writes: "My three year old son and heir, after being put to bed on a trip across the Atlantic, investigated the stateroom and located a box of Graham crackers and a box of Cuticura Ointment. When a search was made for the box, it was found empty and the kid admitted that he had eaten the contents of the entire box spread on the crackers. It cured him of a bad cold and I don't know what else."

No more conclusive evidence could be offered that every ingredient of Cuticura Ointment is absolutely pure, sweet and harmless. If it may be safely eaten by a young child, none but the most beneficial results can be expected to attend its application to even the tenderest skin or youngest infant.
