

**TO LIVE FOREVER.**  
Thomas Edison has perfected a storage battery which he says will last indefinitely and revolutionize the present propelling power.

Prof. Munyon says it is only a question of time until a remedy is discovered that will supply the waste of the human body, so that one may live on almost indefinitely, barring accidents. This seems almost too good to be true, but nothing seems to be impossible in these days when we consider the flying machine and the wireless telegraph.

Prof. Munyon has certainly revolutionized the practice of medicine. He does not believe in building hospitals for consumptives. He says that consumption can always be traced to a cold. Cure a cold and you prevent consumption. His Cold and Cough Remedy will break up almost any form of a cold in a few hours and positively prevent Bronchitis and Pneumonia. To convince the medical world and people in general of the truth of his claims he has distributed millions of vials of the Cold Cure, absolutely free, from the leading newspaper offices throughout the country, and the cures that have been reported from its use have been most astonishing. These little sugar pellets contain no opium, morphine, cocaine or any harmful drug. They seem to relieve the head, throat and lungs almost immediately.

In order that no one may be deprived of this remedy he has placed it with all the druggists throughout the United States for the small sum of 25 cents, or sent postpaid on receipt of price, and with each bottle he gives this guarantee: "If Munyon's Cold and Cough Cure does not do all that is claimed for it, I will refund your money."

There are four advantages in taking Munyon's Remedies. First, they are absolutely harmless. Second, they are pleasant to take. Third, they relieve almost immediately. Fourth, they cost nothing unless they give satisfaction.

**ECZEMA BURNED AND ITCHED.**

Spread Over Hand, Arms, Legs and Face—It Was Something Terrible—Complete Cure by Cuticura.

"About fifteen or eighteen years ago eczema developed on top of my hand. It burned and itched so much that I was compelled to show it to a doctor. He pronounced it ringworm. After trying his different remedies the disease increased and went up my arms and to my legs and finally on my face. The burning was something terrible. I went to another doctor who had the reputation of being the best in town. He told me it was eczema. His medicine checked the advance of the disease but no further. I finally concluded to try the Cuticura Remedies and found relief in the first trial. I continued until I was completely free from the disease and I have not been troubled since. C. Burkhardt, 236 W. Market St., Chambersburg, Pa., Sept. 19, 1908." Potter Drug & Chem. Corp., Sole Props. of Cuticura Remedies, Boston, Mass.

Weekly Review of Trade and Market Reports.

R. G. Dun & Co.'s weekly review of trade says:

In spite of prevailing high prices, which, in some lines, work for curtailment of operations, the volume of trade continues not only largely in excess of last year, but is even approximating the records of 1907. Most noteworthy is the continuing expansion in iron and steel, in which the position of producer and consumer has changed, the latter now displaying most of the eagerness to close contracts at prevailing rates. The sales of steel rails are the heaviest in two years, while there has been a decrease of 32 per cent. in a month in the number of idle cars.

An eccentric country squire agreed to employ an equally eccentric rustic to rid his mansion of its plague of flies, the terms being board, lodgings and beer for three days. At the end of this period there were more flies than ever, and the squire interrogated his new employe thus: "Why ever haven't you made a start. You contracted to kill all the flies."

"I'm waiting for you, guv'nor," retorted the wily rustic, "you've got to catch 'em first. I only promised to kill 'em"—London News.

A friend of the Rev. Dr. J. Willbur Chapman, the evangelist, has received a letter from the former Philadelphia minister, in which he tells of the great success of his meetings in Australia.

The letter describes the people there as fun-loving, and says he has worked off many stories that in the United States would be labeled ancient.

One which he has told with great success to illustrate that there is no real happiness in the world will bear retelling. Here it is:

"Why, even the man who smokes a pipe is not happy," says Dr. Chapman. "If he is smoking his own tobacco he is thinking of how much it cost him, and if he is smoking the other fellow's, he packs it so tight in the bowl of his pipe that it won't draw."—Philadelphia Times.

**Another Operation Avoided.**  
Chicago, Ill.—"I want women to know what that wonderful medicine, Lydia E. Pinkham's Vegetable Compound, has done for me. Two of the best doctors in Chicago said I would die if I did not have an operation, and I never thought of seeing a well day again. I had a small tumor and female troubles so that I suffered day and night. A friend recommended Lydia E. Pinkham's Vegetable Compound, and it made me a well woman."—Mrs. ALYVA SPERLING, 11 Langdon St., Chicago, Ill.

Lydia E. Pinkham's Vegetable Compound, made from roots and herbs, has proved to be the most successful remedy for curing the worst forms of female ills, including displacements, inflammation, fibroid tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, and nervous prostration. It costs but a trifle to try it, and the result has been worth millions to many suffering women.

**When Jerry Turned Tables.**  
Half a dozen Kansas men who moved and had their political being several years ago were mixing political and tobacco smoke the other night in front of a Topeka hotel. As was to be expected, they fell to "yarning," and their subject was Jerry Simpson. They told a lot of stories concerning the sockless Socrates, and here are a few of them:

One time Jerry arrived at an Excelsior Springs hotel and registered "Jerry Simpson, Wichita." The news reached the parlor, which adjoins the office, and several feminine guests bustled out to look at the signature. It was at the time when Jerry was at the zenith of his notoriety.

"Oh," giggled one of them, addressing the clerk, "I wonder if he wears socks?"

Mr. Simpson was standing hard by and overheard the remark. The women all laughed at this well-worn witticism, and they stopped suddenly when Jerry said quietly to the clerk: "I wonder if they wear stockings?"

Whereupon the women fled to the parlor amid a silence that was knee-deep.—Kansas City Journal.

**How He Made A Cuddle.**  
A gentleman went into a pipemaker's shop with the intention of seeing the method of making pipes. The proprietor, who was a Scotchman, had arrived from Edinburgh a few weeks before.

When the Philadelphia girl in the shop he found only a boy back of the counter, so without any more ado he thus addressed him:

"Well, my callant, I'll give you a quarter if you show me how you make your pipes."

"I canna mak' a peep, sir," replied the lad. "I ca only mak' a cuddle!"

"A cuddle! What's that, my hinner?"

"It's a short peep," replied the boy, "as men women smoke out on."

"I'll give you a quarter if you show me how to make that."

"Gie's yer quarter furst," was the reply.

The gentleman gave the boy the quarter, and he took a long pipe and broke a piece off it, saying:

"There, now, sir, that is the way I mak' cuddles." — Philadelphia Times.

Shall Smiling Be Made Mandatory?  
Is there no peace in the world for the man of serious mien? Must one smile, smile, smile from morning till night whether one feels like it or not?

Faddists say the dinner table joke is the best aid to digestion and promotes domestic peace. When dull care intrudes, laugh it away. If your neighbor flies to wrath because your cocker spaniel chases his fowls, dissolve his anger with a smile. In short, keep on smiling.

And now comes a new social disease which this panacean smile is guaranteed to cure. As if man had not already crystallized his features into a perpetual grin, he is now advised to smile to prevent his committing suicide! This new doctrine is advanced by a writer in a medical publication. "Play, smile and don't kill yourself!" is the slogan in brief. Let us harbor still a kind thought for the man who refuses to smile at society's behest. Not that anyone would discourage smiling; merely let us not make the rule mandatory. At least, permit the poor fellow some little option as to when and how much he shall smile.—Cleveland Plain Dealer.

**MAY SUTTON**  
Tells American Girls How To Be Healthy and Graceful.

SAN FRANCISCO, Cal.

Don't drink coffee.  
Don't drink tea.  
Don't exercise too much.

These three don'ts constitute the advice of Miss May Sutton, champion woman tennis player of the world, to girls who would go in seriously and systematically for athletics.

Eat what you want.  
Take long walks.  
Get all the fresh air you can.

These are the three rules Miss Sutton lays down for girls who desire merely to be strong and healthy.

The little champion recently appeared on courts in San Francisco in a series of exhibition matches. It had been reported that she was not in the best of health, but she gave no indication of having "gone back," playing her strong game that made her world's champion, with her same old dash and accuracy.

At the close of the series Miss Sutton was asked to tell what system of training she had found most effective and what, in her opinion, is the best form of exercise and diet for the average American girl. In part she said:

"While I advocate hearty eating, I cannot say too much against the use of tea or coffee. They are nerve destroyers and no one can be healthy who persists in their use."

"Too much exercise is as bad as too little. Walking is the best exercise there is. Early each morning, after drinking a glass of hot water, dressed in loose clothing, I walk for nearly an hour."

"Athletics should receive some attention from every girl. If her time precludes the playing of tennis or golf she should take long walks in the open air, both before the morning and evening meal, throwing the head and shoulders back and taking long, deep draughts of that which money cannot buy but is in reach of the poor as well as the rich—pure air."

"Pure air and a moderate amount of exercise I cannot too strongly impress upon girls as being the only secret of health and grace. Medicine for that out-of-sorts feeling may cause girls to imagine they feel all right, but what they really need is more fresh air and not quite so much sitting around the house in tight-fitting clothes as a great many of them do."

Miss Sutton is declared by physicians to be a perfect athlete. Tennis experts declared that every movement is "a picture."—Lexington (Ky.) Leader.

**Result Of Scientific Farming.**

A forthcoming circular of the Agricultural Department will contradict the prevailing impression that the fertility of the soil of the country is wearing out, but will show that, notwithstanding the abandonment of farming districts in the Northeast, not only is there an increase in the total volume of crops, but an actual growth in the average yield per acre under cultivation. This result is obtained by restoring to the soil those elements and compounds needed and consumed by the different crops.

The well-informed farmer of the present day does not blindly send his plants out to grope for their food; but sees that it is supplied them in proper measure. Recent discoveries in bacteriology have greatly assisted the planter, enabling him to obtain bacteria, with which the growing plant may be inoculated and by which the nitrogen of the air is fixed in form available for plant food and fed to the plant as required. A few cents per acre spent inoculating the plants comes back to the farmer in increased yield of many dollars per acre.—Mobile Register.
