BACKACHE IS KIDNEYACHE.

Usually There Are Other Symptoms to Prove It.

Pain in the back is pain in the kidneys, in most cases, and it points to the need of a special remedy to relieve and cure the congestion or inflammation of the kidneys that is interfering with their work and causing that pain that makes you say: "Oh, my back!"

Henry Gullatt, of Greensboro, Ga., says: "Two years ago kidney disease fastened itself on me. I had awful dizzy spells, headaches and urinary irregularities. My back was weak and tender. I began using Doan's Kidney Pills and found quick relief. I was soon restored to complete good health."

Perfectly Unprejudiced.

Here the judge took a hand in examining the venerean.

"You don't seem to understand the questions addressed to you by the attorneys," he said. "What they want to know is whether you have formed or expressed any opinion in this case. That is to say, have you told anybody whether or not you believe the defendant guilty of the crime charged against him, or have you said to anybody that you believe him to be innocent?"

"Course not, judge," answered the venerean; "it ain't necessary for me to express no opinion about him. I've known him for thirty years, an' I know blame well he stole the cow."

"That will do, Mr. Skiles. You may stand aside."—Chicago Tribune

Loud Clothes.

The Charlotte-russe spat, hanging over the instep like an inverted cuff, has not been received with favor by our young men of fashion, largely because it interferes with the ever-popular crease in the trousers. When modified so as to be worn with link cuff buttons this objection is likely to be overcome, when we shall look for a great vogue in this novelty in men's dress.

An effective style of evening dress for light opera for men is a gray dinner-coat with a red tie, an embroidered waistcoat with gold buttons, light blue trousers and tanned pumps over violet silk socks. This topped off with a brown derby hat, will attract more than a little attention.—Harper's Weekly.

A BANKER'S NERVE

Broken by Coffee and Restored by Postum.

A banker needs perfect control of the nerves and a clear, quick, accurate brain. A prominent banker of Chattanooga tells how he keeps himself in condition:

"Up to 17 years of age I was not allowed to drink coffee, but as soon as I got out into the world I began to use it and grew very fond of it. For some years I noticed no bad effects from its use, but in time it began to affect me unfavorably. My hands trembled, the muscles of my face twitched, my mental processes seemed slow, and in other ways my system got out of order. These conditions grew so bad at last that I had to give up coffee altogether.

"My attention having been drawn to Postum, I began its use on leaving off the coffee, and it gives me pleasure to testify to its value. I find it a delicious beverage; like it just as well as I did coffee, and during the years that I have used Postum I have been free from the distressing symptoms that accompanied the use of coffee. The nervousness has entirely disappeared, and I am as steady of hand as a boy of 25, though I am more than 92 years old. I owe all this to Postum." "There's a Reason." HIS TURN.

BUILDS IDEAL TOWN IN HER IMAGINATION.

If It Existed 'Twould Be a "Slightly Elevated Spot Somewhere in New Jersey"—Only One Church Needed, and Little For Lawyers and Doctors to Do—Mrs. Pattison Tells Women's Civic Club About It.

Arlington, N. J.—Mrs. Mary Pattison, president of the New Jersey Women's Federated Clubs, has built the ideal village—in her imagination. But she is sure that if such a place existed in fact it would be "a slightly elevated spot somewhere, of course, in New Jersey."

This is how Mrs. Pattison pictured the ideal village in a talk before the members of the Civic Club of Arlington:

"Let us take an imaginary journey," she said, "to a slightly elevated spot somewhere—of course in New Jersey—and build an ideal village or town. Let there be a clean, wide sweep of greenward shaded with trees and cut with winding roads, a few hills and a cool, picturesque valley to one side, through which a clear, happy rivulet curls its way untainted with sewerage and disease-carrying insects and unspilled by the dumps of refuse usually deposited along such banks. Let us see there instead grass, flowers and birds.

"On one of these hills near by we find a roomy schoolhouse, than which nothing better is known, where the children are being educated in the real things of life, in common sense, and in industrial and organic matters, with no danger of forced mentality. Here we find usefulness with beauty of method; as a result, horse or coarse play and disrespect are unknown; individual and careful thinking are encouraged, and appreciation is developed, with charm of manner and the cultivation of the healthiest bodies.

"In the centre of the town, near a few choice shops and offices, we find an airy and well built market, where only the best and purest foods can be bought, not necessarily luxuries, but the substantial varieties that make blood and muscle strong and of good quality—a place where it is not sufficient to simply label the contents of packages, but where it is necessary to tell which beefsteak has had its juice

extracted, what fish and fowl have been embalmed, what animals died in disease, and what fruit has had its natural fermentation stopped by the use of preservatives. It is, in fact, a place to buy food where one is not in danger of one's life, or worse, one's health, at every turn.

"Let us perhaps build two churches in our beautiful village, although that may be one too many, but let there be one opening the gate of heaven through the intellectual door or under the portal of the understanding where reason reigns and science prevails; then a little further on let us find another, bringing God on earth through the aid of the emotions, with the heart as the knower and the senses trained to love. Let them both be beautiful, but let us go first to one and then the other till in the future they unite.

"Our community is made up of homes, cheerful, normal, happy homes, individual in expression, cooperate in management and lovely in design, where the atmosphere is the guiding element, where nothing is held that gives more trouble than worth, where harmony, health and happiness leave not a crevice for hell to peek through.

"And now a little walk to the right, and opposite the park we are led to the village clubhouse, a fine pleasure edifice equipped for all ages. It is a place where play and gymnastics are supervised, a place for games of all sorts, with rooms for music, art, dancing, etc., and for that foolish frivolity without which society would lose its charm.

"May we keep our hand to the wheel, and help to usher in the new village home, if not in detail, at least in essence—a home where one might free the spirit by just living, where doctors and lawyers are at the minimum in number and teachers at the maximum, a place where only health is known, and where the whole air rings with life."

AMERICAN HABITS ARE BREEDING INSANITY

So Says Dr. Crafts and Names Alcohol and Special Maladies as Chief Causes.

St. Louis.—That conditions of American life promote insanity and that heredity, alcohol and a special group of diseases are rapidly increasing the number of insane persons in proportion to the total population were statements made by Dr. Leo M. Crafts, of Minneapolis, before the Mississippi Valley Medical Association.

Dr. Crafts, giving figures for States which he said were typical, showed the extent to which insanity had increased in this country during the past generation. The insane percentage of Illinois as typical of this section, he said, in the past thirty years

has increased four times as rapidly as has the population. Other States and sections were no better off, he said.

According to Dr. Crafts, other countries were developing insanity through American habits. Since Japan adopted Western methods of doing things the proportion of insane persons in that empire has rapidly increased. The negro was also pointed to as furnishing another example of a race incapable of adoption of American methods and environment without an increase in the number of those who go crazy and have to be confined in retreats.

AUTO DUST FIEND HAS REVENGE

He Rushes Through Darien, Conn., With a Tree Dragging Behind and Yet Breaks No Law.

South Norwalk, Conn.—The police and public of Darien have in arms over the actions of a New York automobilist who is, they say, the meanest man on earth. This man, whose number they think is 1770, fastens a large limb to the rear of his machine and, with this trailing in the road, he goes racing through the town, leaving a cloud of dust which entirely envelops him and the machine number, and which leaves the town smothering and fuming, winking and blinking, for some minutes.

Even the Rev. H. S. Brown has joined in the protest, saying that the nuisance is the cause of perversion.

New Church to Be Provided With Airship Landing Place on Roof.

Atlanta.—Anticipating that airships will be in common use in a few years the official of Wesley Memorial Methodist Church, now nearing completion, instructed the building committee to so arrange the roof that there will be no difficulty in adapting it to airship landings.

The officials declared that in future years the communicants of the church would sail to and from the services in airships, just as they now speed their automobiles.

and that a match factory would have a better chance of doing business in the atmosphere of the place than a preacher when the dust is in the air. The autoist fastens the large limb to his machine at one end of the town and drops it off at the other end.

Under the old Connecticut law Darien had a reputation for arresting speeding automobilists. As many as fifty were caught in a day and fined. It is thought that the dust fiend is a victim getting even. The new law allows of no arresting save in extreme speed cases, but the police intend to arrest him as a common nuisance and put him under bonds.

Archbishop Ryan Advocates Beatification of Columbus.

Philadelphia.—The beatification of Christopher Columbus was advocated by Archbishop Ryan here in a speech delivered at the Columbus Day banquet given by the Knights of Columbus.

The Archbishop, referring to the beatification of Joan of Arc, said that it was his dearest wish to "live and die like other hero, Christopher Columbus, also canonized and take his place among the saints as the patron of the Knights of Columbus."

BABY'S WATERY ECZEMA.

Itched and Scratched Until Blood Ran—\$50 Spent on Useless Treatments—Disease Seemed Incurable—Cured by Cuticura for \$1.50.

"When my little boy was two and a half months old he broke out on both cheeks with eczema. It was the itchy, watery kind and we had to keep his little hands wrapped up all the time, and if he would happen to get them uncovered he would claw his face till the blood streamed down on his clothing. We called in a physician at once, but he gave an ointment which was so severe that my babe would scream when it was put on. We changed doctors and medicines until we had spent fifty dollars or more and baby was getting worse. I was so worn out watching and caring for him night and day that I almost felt sure the disease was incurable. But finally reading of the good results of the Cuticura Remedies, I determined to try them. I can truthfully say I was more than surprised, for I bought only a dollar and a half's worth of the Cuticura Remedies (Cuticura Soap, Ointment and Pills), and they did more good than all my doctors' medicines I had tried, and in fact entirely cured him. His face is perfectly clear of the least spot or scar of anything. Mrs. W. M. Comer, Burnt Brass, Pa., Sept. 15, 1908."

Why Legislator Was Late

When a once famous member returned to the House of Commons after a by-election for Knaresborough his unusually delayed appearance was commented upon in the presence of Sir Wilfrid Lawson.

The newly-elected member, though a wealthy man was known to be extremely careful about sixpences. "Isn't it odd," someone said, "Tom Collins doesn't turn up?" "Not at all, not at all," said Sir Wilfrid; "he's waiting for an excursion train."—Manchester Guardian.

ANOTHER WOMAN CURED

By Lydia E. Pinkham's Vegetable Compound

Gardiner, Maine.—"I have been a great sufferer from organic troubles and severe female weakness. The doctor said I would have to go to the hospital for an operation, but I could not bear to think of it. I decided to try Lydia E. Pinkham's Vegetable Compound and Sanative Wash and was entirely cured after three months' use of them."—Mrs. S. A. WILLIAMS, R. F. D. No. 14, Box 39, Gardiner, Me.

No woman should submit to a surgical operation, which may mean death, until she has given Lydia E. Pinkham's Vegetable Compound, made exclusively from roots and herbs, a fair trial.

This famous medicine for women has for thirty years proved to be the most valuable tonic and renewer of the female organism. Women residing in almost every city and town in the United States bear willing testimony to the wonderful virtue of Lydia E. Pinkham's Vegetable Compound. It cures female ills and creates radiant, buoyant female health. If you are ill, for your own sake as well as those you love, give it a trial.

Mrs. Pinkham, at Lynn, Mass., invites all sick women to write her for advice. Her advice is free, and always helpful.

A Missouri Fish Story.

While at the ice pond fishing a few days ago W. E. Swenceny noticed a large spider on a leaf at the edge of the water that seemed to be fishing also. The spider would put one leg in the water, shake it a little bit, and then wait. By and by a minnow came to the top and grabbed the spider's foot.

This seemed to be what it was waiting for, and without a minute's hesitation sprang onto the minnow, being carried under the water several times, but never releasing its hold on the fish until it ceased to struggle and was dead, when the spider hauled its prey ashore to be devoured at leisure. In trying to land the struggling minnow the spider would lay hold of a leaf or weed on the shore and hang there with a deathlike grip, and at last landed his catch in that way.—Keytesville (Mo.) Courier.

Aids Nature

The great success of Dr. Pierce's Golden Medical Discovery in curing weak stomachs, wasted bodies, weak lungs, and obstinate and lingering coughs, is based on the recognition of the fundamental truth that "Golden Medical Discovery" supplies Nature with body-building, tissue-repairing, muscle-making materials, in condensed and concentrated form. With this help Nature supplies the necessary strength to the stomach to digest food, build up the body and thereby throw off lingering, obstinate coughs. The "Discovery" re-establishes the digestive and nutritive organs in sound health, purifies and enriches the blood, and nourishes the nerves—in short establishes sound vigorous health.

If your doctor offers something "just as good," it is probably better FOR HIM—It pays better. But you are thinking of the cure not the profit, so there's nothing "just as good" for you. Say so.

Devil-Fish in Captivity.

The New York Aquarium has recently obtained an octopus after a search lasting over several seasons for one representative of its kind. It is nearly three feet in extent, from the tip of one tentacle to the extremity of the opposing one, and has the ability to change color at will, which it does especially when attacked or molested. Hiding and crouching in the crevices and grottoes of submerged reefs, its body assuming the same color as its surroundings, the monster easily captures all kinds of marine animals with its tentacles. In the aquarium it is fed on live rock crabs, which are seized with a quick out-thrust of one of the snake-like arms. The octopus has a grotesque walk or crawl, dragging its eight legs, and swims clumsily in a backward manner, bringing all its limbs into play. It seldom lives long in captivity.—Harper's Weekly.
