Because your case is a difficult one, doctors having done you no good, do not continue to suffer without giving Lydia E. Pinkham's Vegetable Compound a trial. It surely has cured many cases of female ills, such as inflammation, ulceration, displacements, fibroid tumors, irregularities, periodic pains, backache, that bearing-down feeling, indigestion, dizziness, and nervous prostration. It costs but a trifle to try it, and the result is worth millions to many suffering women.

The Fateful Hyphen.

It happens frequently and perhaps usually, where the hyphen is employed to phrase a controversy, that the losing party of the first part and the winning that of the party of the second part. Thus, in reference to a war, the name of a defeated nation familiarly precedes that of the victor; the Spanish-American War, Franco-German, Russo-Japanese. It was the Cook-Peary controversy as generally phrased from the first; and the result confirmed the rule by a curious fatality. Possibly in the psychology of what seems to be purely an accidental arrangement, the first place is allotted to the apparently weaker controversialist, pending the decision. Possibly, too, a sense of thythm is influential; though this may be more imaginary than real. "Peary-Cook" might not now sound odd had that been the original arrangements. Consider Ballinger-Pinchot. Secretary Ballinger has drawn the first blood; but will he be able in the end to overcome the mystic omen discoverable in the relation of his name to the hpyhen?-Providence Journal.

Holders Of Gold.

The great holders of gold are the state banks of Europe and the United States Treasury, the latter institution leading all the rest with the tremendous amount of \$1,034,000,000, of which \$875,000,000 is held against gold certificates in circulation, \$150,-000,000 as reserve against the greenbacks and \$9,000,000 in unpledged Treasury surplus.

Next comes the Bank of Russia, with \$713,880,000, of which part is security for \$610,000,000 outstanding notes. Third in rank is the Bank of France, with \$707,000,000 gold, held largely against notes, though this great bank, which carries much silver money, reserves the right, according to its judgment, to pay out silver-a sort of limited bimetallism, discreetly reglated in practice. The other large holders of gold are, in their order: Bank of Austria-Hungary, \$285,000,-000; Bank of Germany, \$179.825,-000; Bank of England, \$172.545,-000. A relatively small holding of gold sustains the mighty fabric of British credit .-- Mexican Herald

Mr. Gilder's answer took the very life out of me. I asked him: 'Now, Mr. Gilder, what would you say was the first, the chief, the all-essential requisite for a young woman entering the literary field? "I waited with bated breath, when

Weekly Review of Trade and Market Reports.

R. G. Dun & Co.'s Weekly Review

of Trade says: Notwithstanding the seasonal lull in business, general conditions are fully normal, and the volume of trade as measured by bank exchanges and railroad earnings is very heavy. There is a wide diversity of reports from the different trade centers, but even the least satisfactory indicates no fundamental weakness, while the majority of the reports, particularly those farthest removed from the influence of the unsettled conditons in the financial markets, show a healthy condition of affairs The distinguishing feature of the whole business situation is the sharp contrast between the hesitation prevailing in the security markets and the confidence and activity prevailing in productive enterprises.

An increased demand for pig iron is indicated, with buyers displaying more interest than for several weeks past, and prices show a hardening

tendency in some districts. Trading in cotton goods was restricted to some extent by unsettled conditions in the raw material market, although in the face of a sharp decline in the staple there were large sales of print cloths.
