The Product of the Hen.

The increase in the egg production in the United States, in the past few years, is something wonderful. Strange as it may seem, it is nevertheless true, that the increase in the supply causes no reduction in the price, while on the contrary the price is gradually increasing. While the egg industry is a general one, being carried on in all the states in the union, it is especially marked in our immediate vicinity. The Howard Creamery Corporation purchased from April 1 to 16th, 6900 dozen. This amount several years ago would have represented the purchases of a month or more. These people late year paid out over \$11,000.00 for eggs alone, and from present indications, the amount will reach \$15,000.00 or more for the present year. The heavy purchases of this concern are due largely to the fact that they always pay the highest market price for all the products they purchase. The average price paid by this concern for butter-fat for the past six months was twenty-eight and one half cents. At present they are paying twenty-five cents which no doubt accounts for the many new patrons that are being added to their already large and satisfied list.

Fine Horse Stock.

An opportunity is being given horse breeders in Penna Valley to improve their stock by William F. Rishel, of Farmers Mills, who recently purchased a stud and mare, registered in the American Breeders' and Importers, Percheron Register. The stud was foaled in 1907, weighs 1600 pounds, is sixteen hands high, and black in color. A certificate of pure breeding and soundness has been secured from the State Livestock Sanitary Board, and has also been recorded in Centre county. As indicated above, the horse is young, and this season will stand only at the owner's stable.

The laws governing the regulations of the public schools are becoming more and more complicated. There was set aside \$100,000 for the paying of tuition of pupils who attend high schools outside of their own district, but it appears the district must first pay the tuition from its own treasury, and then upon properly filling out blanks and securing the approval of the state superintendent, the money will be refunded by the state. It will, therefore, be advisable for districts to make prompt settlements for tuitions.
