The Proper School Age.

The old question, "At What Age Should Children Enter School?" being agitated in educational circles. Companionship and study are excellent elements in an education for the young when it is possible to have groups of children enter school at the same age. For example, if all the children in a neighborhood could begin attendance at the age of six or seven or eight years then the companionship would have much to do with fostering a child's interest in the studies.

One educator's advice that the parents should consult with the principal of the school in the district where they reside and have him examine the child for the purpose of deciding whether it is best to have him begin schooling is sensible. Pat it is far better to have a physician's opinion on this subject. There are too many children of a tender age ambitious to study who have not the requisite physical health, Body building is of more consequence than mental attainments in the beginning of a child's education .- Boston Globe,

Looking For A Life Job.

The removal from the county clerk's office of two safes which had been purchased by the city in the days of "Boss" Tweed recalls the story which a man once prominent in Albany politics used to tell whenever he had an opportunity. John McBride Davidson, maker of safes and member of the inner circle, was met in the city hall park one day by a man who introduced himself as a fellow Albanian. "I am a glazier; can't you get me a job on the court-house or city hall?"

'No," said Davidson. . "I don't think I can. They give those jobs to New Yorkers." "But I want only the job to put

in one pane of glass." 'What good will that do you?" "Once I have a contract for one pane of glass from these gentlemen my family is provided for. I need never work again," was the reply.-

Red Squirrels And Brown Tails.

If the red squirrel is inclined to destroy moth nests he can perhaps be made a powerful ally in the work. The Record this week secured what seems to be confirmation of this discovery by a case on High Street where two red squirrels have their home. Last year only seven nests were found on the trees in the vicinity of the home of these squirrels. this year, when the nests are 20 times as thick in other places. only four are found in the same who have opportunity to observe the habits of red squirrels to note what they have done in other places in clearing trees of brown-tail nests .--Brunswick Record.

## The Important Problem

confronting anyone in need of a laxative is not a question of a single action only, but of permanently beneficial effects, which will follow proper efforts to live in a healthful way, with the assistance of Syrup of Figs and Elixir of Senna, whenever it is required, as it cleanses the system gently yet promptly, without irritation and will therefore always have the preference of all who wish the best of family laxatives.

The combination has the approval of physicians because it is known to be truly beneficial, and because it has given satisfaction to the millions of well-informed families who have used it for many years past.

To get its beneficial effects, always buy the genuine manufactured by the California Fig Syrup Co. only.

Aids Nature

The great success of Dr. Pierce's Golden Medical Discovery a curing weak stomachs, wasted bodies, weak lungs, and obstinate and lingering coughs, is based on the recognition of the fundamental truth that "Golden Medical Discovery" supplies Nature with body-building, tissue-repairing, muscle-making materials, in coadensed and concentrated form. With this help Nature supplies the necessary strength to the stomach to digest food, build up the body and thereby throw off lingering obstinate coughs. The "Discovery" re-establishes the digestive and nutritive organs in sound health, purifies and enriches the blood, and nourishes the nerves—in ahort establishes sound vigorous health.

If your dealer offers something " just as good," It is probably better FOR HIM ... it pays better. But you are thinking of the cure not the profit, so there's nothing "just as good" for you. Say so.

### AN UP-TO-DATE STOVE

Do you realize there is no longer any reason why you should use a coal range? Oil is cheaper than coal; it is lighter and easier to handle, and gives an intense heat. Provided you have the right stove, oil is more economical, cleaner and less trouble. Have you seen the

The accompanying illustration gives you only a rough idea of its appearance. You really can't appreciate it until you either use it yourself, or talk to someone who has used it. It does everything that a Goal range will do-except heat the room. The New Perfection Oil Cook-

Stove will do anything, from heating a kettle of water to cooking a course dinner, but it won't heat a room. It doesn't "smell," it doesn't smoke. It can't get out of order. Light it and it is ready. Turn it down and it is out. Only a woman who knows the trouble of carrying coal and cooking in a hot kitchen can appreciate what it means to have a clean, perfect stove that will cook anything, boil, bake or roast, and yet won't heat the kitchen. How is it done? The flame is controlled in turquoise-blue enamel chimneys, and directed against the bottom of pot, pan, kettle or oven, and only there. The flame operates exactly where it is needed —and nowhere else. With this stove your kitchen is cool.

The nickel finish with the bright bine of the chimneys makes the stove ornamental and attractive. Made with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet. Every dealer everywhere; if not at yours, write for Descriptive Circular to the nearest agency of the
