The "Lancaster" Side Delivery Hay Rake

In the Lancaster Side Delivery Hay-Rake are combined all the good points and avoided all the faults of those that have gone before. It is simple, durable, well made, easily operated.

The Lancaster rake gathers up the hay into a continuous, loose and fluffy windrow, through which the hay freely passes.

The Lancaster rake is driven from the main axle ; the power is all utilized in the working of the rake, nothing is lost in complicated machinery.

By the use of three sets of raking bars there is obtained alow speed, which is especially desirable in raking clover. The machine will rake clean the shortest blue grass as well as the heaviest timothy or clover.

The Humane French Boatman and the Dead Englishman.

A long expected French lugger was seen making for the roudstead, and the Lowestoft free traders were on the alert, anxiously seeking an opportunity for communicating with her crew. While they waited for a lapse of vigilance on the part of the excise men a boat was lowered from the lugger and rowed toward the shore. A curious crowd of beach men_and excise men assembled to meet her, and as she came in on the crest of a roller it was observed that she contained a coffin.

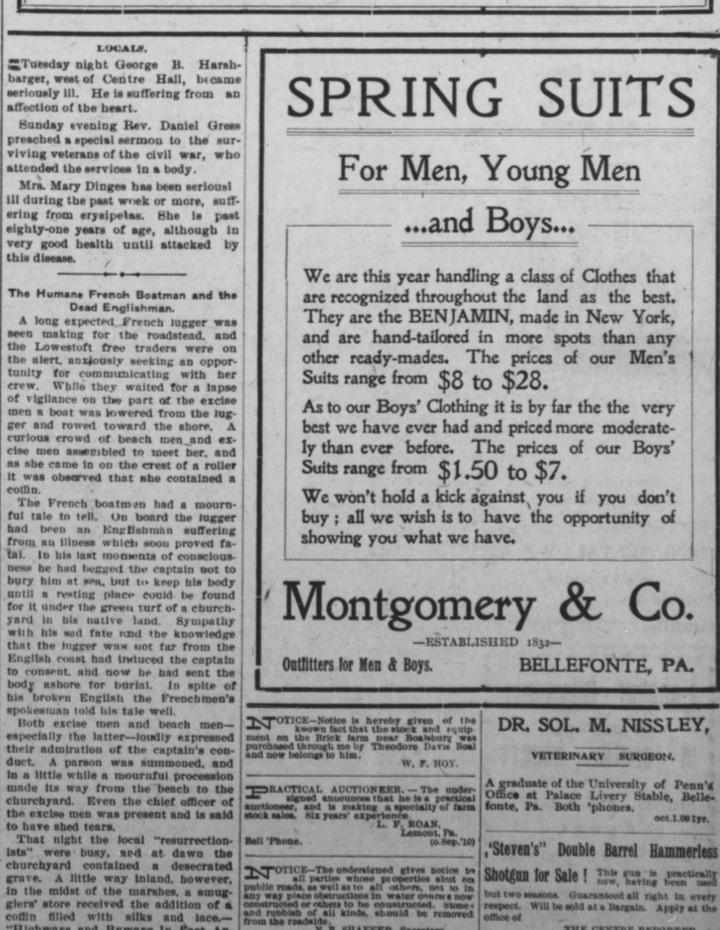

The French boatman had a mournful tale to tell. On board the lugger had been an Englishman suffering from an illness which soon proved fatal. In his last moments of consciousness he had begged the captain not to bury him at sea, but to keep his body until a resting place could be found for it under the green turf of a churchyard in his native land. Sympathy with his sad fate and the knowledge that the lugger was not far from the English coast had induced the captain to consent, and now he had sent the body ashore for burial. In spite of his broken English the Frenchmen's spokesman told his tale well.
