Harvard Student, Who Vanished in 1907, Never Heard From.

Boston, Mass .--- The case of a Maine boy who, while a student at Harvard, disappeared three years ago, and never has been heard from, is given in the Harvard Graduates' Magazine. The letter from B. M. Pike, of Lubec, Me., regarding the vanished student, A. D. Pike, his son, says that the boy left school because he was behind in his studies. The father adds: "I shall very much like to have his name still kept on the list of his class,"

The Worth Of Fat.

Fat people will yearn with satisfaction that they have a champion in a Georgia physician, who says that surplus flesh is a natural armor against colds and sudden falls, lending the body "warmth and security, and the mind peace and good cheer. cheer.

The psychic effect of being fat, according to this doctor, manifests itself in its influence over the temperament and disposition, from the earliest childhood, or from the moment when, under the subtle urging of certain food and tonics, the body begins to grow in bulk of fatty tissue. As fat is acquired the mind that rules and is ruled by matter acquires a rose-colored outlook, a sunny geniality and a patience with the small irritations of life.

Nervous, thin people who actually suffer because of lack of flesh should remember that sleep is one of the greatest fat producers. Obesity is not desirable, but the individual who is plump is often stronger physically than his thin neighbor and has more endurance. The fat man is usually good-natured, has strong resistance to disease and is a good citizen, as is generally proved by his large circle of friends.—Boston Globe.
