

Rothschild and Belmont.
When the original August Belmont came to New York as agent of the Rothschilds he started in business with Charles Christmas as partner. Belmont was very rough and overbearing toward everybody connected with him. When one of Christmas' friends, who had witnessed an unpleasant scene, said to him: "I don't see why you allow Belmont to talk to you like that," he replied: "That is nothing. You ought to read what Rothschild writes to him."—The Widow.

THIRD OPERATION PREVENTED

By Lydia E. Pinkham's Vegetable Compound

Chicago, Ill.—"I want to tell you what Lydia E. Pinkham's Vegetable Compound did for me. I was so sick that two of the best doctors in Chicago said I would die if I did not have an operation. I had already had two operations, and they wanted me to go through a third one. I suffered day and night from inflammation and a small tumor, and never thought of seeing a well day again. A friend told me how Lydia E. Pinkham's Vegetable Compound had helped her, and I tried it, and after the third bottle was cured."—Mrs. ALICE SPERLING, 1488 Clybourne Ave., Chicago, Ill.

If you are ill do not drag along at home or in your place of employment until an operation is necessary, but build up the feminine system, and remove the cause of those distressing aches and pains by taking Lydia E. Pinkham's Vegetable Compound, made from roots and herbs.

For thirty years it has been the standard remedy for female ills, and has positively restored the health of thousands of women who have been troubled with displacements, inflammation, ulceration, fibroid tumors, irregularities, periodic pains, backache, bearing-down feeling, flatulency, indigestion, dizziness, or nervous prostration. Why don't you try it?

GOOD ROADS

WHAT GOOD ROADS COST.

There are in the Empire State 80,000 miles of roads, greater mileage of which is improved highway than all of the other Eastern States put together, not including Massachusetts. There are now 2,000 miles of State roads more under construction. There are macadam roads totalling in mileage 2,400 miles, constructed by towns. There are more than 40,000 miles of earth roads, properly shaped and crowned, stones picked and removed, depressions filled, culverts and bridges repaired. Towns have constructed 8,000 miles of gravel roads, in first class condition.

To keep these roads in navigable, so to speak, shape means work, systematic, untiring labor on the part of a great corps of people. The State is divided into nine districts, with Frank D. Lyon, Deputy Commissioner of the State Highway Department, in actual charge of these. Each district has a superintendent, an assistant to Mr. Lyon. Then the State is again subdivided into fifty-four counties under the supervision of fifty-four superintendents, who in turn are answerable to the nine assistants to Mr. Lyon. Then it is further subdivided into 934 towns under 934 town superintendents. By this system Commissioner Lyon can reach within twenty-four hours after notification any road in the State in need of repair.

Work of construction and repair is now at its height, and Mr. Lyon's report of recent date showed that on one particular day there were 26,000 men and teams on the roads of the State.

"The upkeep of motor cars," says Mr. Lyon, "will this year be reduced forty per cent, in my mind, on account of repairs to highways being made."

Towns are this year raising by taxes for highway improvement the sum of \$2,504,675.23. The State is turning over to the towns to aid them in this work \$1,593,070. Bridge work in 1910 is to cost \$628,414.63. The amount to be paid out for new machinery is \$180,011.25. Special road improvement in towns of the State is to cost \$279,706.22, making in all \$5,185,877.33 to be expended by towns this year.

The State is to bond itself for \$10,000,000 for the construction of State roads. Towns and counties are to be called upon to provide as their share \$5,000,000. The State Legislature has appropriated \$1,800,000 for the maintenance of State roads already constructed.

The sum of \$21,985,877.33 is to be expended in one year, this year, for road construction and improvement throughout the great Empire State, that is, this amount is available for the work and in all probability will be utilized by the State Department of Highways.—From the Empire State Motorist.

A CHAIR OF GOOD ROADS.

The directors of the Texas State Agricultural and Mechanical College have determined to establish a good roads chair in that institution and their action is wise and commendable.

Young men who are studying scientific methods of farming will be none the worse off for knowing something about scientific roadmaking. Farms and roads are generally pretty close together—in fact a farm is not a desirable possession unless there is a passable good road leading to it. Farmers ought to be interested in the road question, for in most localities they pay most of the taxes that go to the maintenance of highways. They do practically all the routine road work in States where the "Warning-in-plan" prevails. As to the indirect tax that is entailed by bad roads no one suffers more from it than the farmer.

Despite these facts there are many farmers who are surprisingly indifferent to road improvement. Some of them, having known nothing but bad roads all their lives, are content to plod along in the same old way their ancestors plodded. Others are affrighted by the prospect of increased taxation or do not realize the worth of a good road to a rural community.

The young man who wants to become educated in farming is a progressive individual and is not going to be satisfied with running a farm on the conventional pattern that was handed down to him from his great grandfather. This young man expects to do things on a different plan. He is a believer in improvements and it is a safe bet that he is a believer in good roads—or will be by the time he gets back home from college.

It is this young man who must be relied upon to keep the world from being "perpetually to bed," and it is highly appropriate that he should be taught something about road building.—Louisville Courier-Journal.

Skin Humor Lasted 25 Years.

"Cuticura did wonders for me. For twenty-five years I suffered agonies from a terrible humor, completely covering my head, neck and shoulders, so even to my wife, I became an object of dread. At large expense I consulted the most able doctors, far and near. Their treatment was of no avail, nor was that of the Hospital, during six months' efforts. I suffered on and concluded there was no help for me this side of the grave. Then I heard of some one who had been cured by Cuticura Remedies and thought that a trial could do no harm. In a surprisingly short time I was completely cured. S. P. Keyes, 147 Congress St., Boston, Mass., October 12, '09."

Face Covered With Pimples.

"I congratulate Cuticura upon my speedy recovery from pimples which covered my face. I used Cuticura Soap, Ointment and Resolvent for ten days and my face cleared and I am perfectly well. I had tried doctors for several months but got no results. Wm. J. Sadler, 1614 Susquehanna Ave., Philadelphia, May 1, 1909."

When The Clothier Fainted.

A London clothier was never known to acknowledge that he didn't have anything a possible customer might ask for. One day a customer entered the shop and asked if he had any trousers made especially for one-legged men.

"Certainly," replied the merchant. "What kind do you want?"

"Dress pants," said the man. "The best you've got."

Hurrying to the rear of the shop, the enterprising merchant snatched a pair of trousers and snipped off the right leg with a pair of shears.

Hastily turning under the edges he presented them to the customer.

"That's the kind I want. What's the price?"

"Thirty shillings."

"Well, give me a pair with the left leg off."

A month later the clothier was pronounced convalescent.—London Globe.

COMMERCIAL

Weekly Review of Trade and Market Reports.

R. G. Dun & Co.'s Weekly Review of Trade says:

Crop news continues encouraging, the iron and steel market improves, while foreign trade now shows an excess of exports, and in these three important particulars the business outlook is distinctly better.

There is further improvement in iron, with increased inquiry at the leading producing centers. More orders have been placed for pig iron, and the tonnage already booked for delivery during the second half of the year is heavy. Existing quotations are considered very low, and in consequence there is less disposition on the part of consumers to defer purchases in expectation of concessions.

The primary dry goods market still reflect light trading, but agents handling cotton goods lines are holding prices generally firm. Jobbers in Western markets have been shading prices at clearance sales to reduce stocks preliminary to stock taking, while an announcement is made by a large Eastern house that the usual semi-annual clearance sales will be omitted on the ground that costs of replacement are above current values. Staple printed goods are selling in small lots, but Western advances state that business promises to be better next month, and there is more inquiry for denims and colored goods. Miscellaneous export trade in cotton goods holds up well. Men's woollens rule quiet, but a little better business is noted in some parts of the dress goods market, warmer weather stimulating interest in seasonable merchandise. The feature from the producers' standpoint, is the substantial increase in curtailment.

New orders for fall footwear continue small, and the situation is generally unsatisfactory. Trade in leather continues dull and prices on most descriptions are weak.

When He Asked For Food.

Mayor Maddox, of Atlanta, said at a recent "shad breakfast": "This glorious weather is bringing out the flowers and the tramps, particularly the tramps. "A tramp knocked at a lady's door the other morning and said: "Lady, I am starvin'. For the last 48 hours not a morsel of food has passed—" "Oh, you poor fellow!" said the lady. "My husband has an old pair of boots upstairs. Wait and I'll get them for you." "The tramp bit his lip. "Pardon me, ma'am," he said

DR. PIERCE'S FAVORITE PRESCRIPTION

THE ONE REMEDY for women's peculiar ailments woe enough that its makers are not afraid to print on its outside wrapper its every ingredient. No Secrets—No Deception.

THE ONE REMEDY for women which contains no alcohol and no habit-forming drugs. Made from native medicinal forest roots of well established curative value.

Cook in Comfort

You no longer need wear yourself out with the weakening heat of an intensely hot kitchen. You can cook in comfort. Here is a stove that gives no outside heat. All its heat is concentrated at the burners. An intense blue flame (hotter than either white or red) is thrown upwards but not around. All the heat is utilized in cooking—none in outside heating.

New Perfection Oil Cook-stove

entirely removes the discomfort of cooking. Apply a match and immediately the stove is ready. Instantly an intense heat is projected upwards against the pot, pan, kettle or boiler, and yet there is no surrounding heat—no smell—no smoke.

Why? Because The New Perfection Oil Cook-Stove is scientifically and practically perfect. You cannot use too much wick—it is automatically controlled. You get the maximum heat—no smoke. The burner is simple. One wick with a cloth cleans it—consequently there is no smell.

The New Perfection Oil Cook-Stove is wonderful for year-round use, but especially in summer. Its heat operates upward to pan, pot, or kettle, but not beyond or around it. It is useless for heating a room.

It has a Cabinet Top with shelf for keeping plates and food hot. It has long turquoise-blue enamel chimneys. The nickel finish, with the bright blue of the chimneys, makes the stove ornamental and attractive. Made with 1, 2 and 3 burners; the 2 and 3-burner stoves can be had with or without Cabinet.

MAPLEINE

The World's Population. Much is made of the fact that the population of France is decreasing. Is it because we all shall be losers, if the death rate of that country continues to exceed the birth rate? Or is it because the rest of the French world is especially fond of the French? Or is it because we fear that some day the population of the earth will be so small that human beings will not be numerous enough to combat wild beasts and other evils which are successfully combated today?

Whatever may be the feelings with which the rest of mankind beholds the steady decline of the French people in numbers, the fact is there are still people enough on this planet, for while the population of France has increased only 3,000,000 since 1851, that of Germany had increased 30,000,000.

Would it not be better then, to look on both sides of the population picture? It also might be well to consider this fact: If the French people have done their turn on this planet, the planet may have to reconceive itself to seeing them disappear or mingle with some other race.—Boston Globe.
