If you are interested in a good Normal School, it will be to your advantage to write to the Lock Haven State Normal School for its handsome catalog. The beautiful scenery of the west branch of the Susquehanna in the immediate neighborhood is finely illustrated as well as the great buildings of the institution. As a progressive school, it insists on having a thoroughly well trained faculty. By referring to the catalog, anyone interested can quickly discover that every teacher has had superior college and university advantages. The fall term begins September 6th.

Former County Superintendent of Schools C. L. Gramley, of Rebersburg, was in Centre Hall among friends, stopping with Mrs. Maggie Harper. Mr. Gramley was one of the census enumerators, having to call on many manufacturers in his district which comprised several counties. The experience to him, he said, was a valuable one, and revealed to him the fact that not all the large manufacturers were reaping profits and a's; that some of them were earning immense returns. Of course, he could speak of these things only in a general way.

**The KING LIME SPREADER**

DEAR SIR:

Are you still considering the Spreader question? We are very anxious to place one with you, because we are sure it would result in many more sales; and we are anxious to place it with you NOW in order that orders may be booked early for the coming season.

We therefore make you a VERY Special Proposition.

Our KING SPREADER is superior to others, because: It will distribute a greater variety of material, will distribute in any quantity from 100 lbs. to several thousand pounds to the acre. It is simple—any laborer can operate it. It is durable—cleans itself of acids that cause rust. Foreign matter, stones, bolts, lumps do not interfere with distribution nor injure the machine. It is either a two or one horse machine, as you may prefer to make it. It will distribute broadcast or, in drills—will straddle row of corn, putting out fertilizer on either side—run between fruit trees, distributing fertilizer on either side of water furrows. Is there any requirement of yours that you think our Spreader will not fulfill? Does the low price cause you to consider it inferior? (The writer who invented the machine worked hard to bring out a durable and effective machine that could be sold at a low price—a low price being necessary for wide distribution—a farmer doesn't feel like paying from \$45 to \$60 for a machine that is to be used in spreading lime or fertilizer only a few acres.) Shall we book you NOW for future shipment? Will ship a machine to you in September or October, or now.

Yours truly,  
KING WEEDER CO.  
Richmond, Virginia

Pinegrove, Pa., June 28, 1910.  
Gentlemen: I am well pleased with the Lime Spreader you sent me; it does all you claim for it. I have tried it with stone lime and put 50 bushels of stone lime to the acre. If I could only talk it into the people how handy this Spreader is, then I would have sold a lot, but they are so used to that old shovel that they like to throw their arms off, but this fall I think I can sell some as most farmers put their lime on seeding land.  
Very truly,  
J. S. HALDEMAN.

Nanuet, N. Y., June 11, 1910.
