THE BEST REAL "PULL."

Now that the summer is nearly over hundreds of young men who were graduated last June from colleges and high schools are entering the vocations which they intend shall be their life's work. Some are still seeking suitable openings. The young man withbut a "pull" may believe himself handicapped. He is likely to see instances where the employer gives first consideration to his son, his nephew or the son of a friend. But that is no more than right. The average business man recognizes the obligations of relationship and friendship, up to the point where they do not impair his material interests and those of his associates. His nephew and his friend's son must make good-his own son, most of all. His tendency, in fact, is to be more strict with his son than he is with any of his other employes, says the Cleveland Leader. If a young man thus favored with the first opportunity shows that he will be a failure In the work he is doing, he is removed. Family ties and friendship usually will not hold him. Then comes the chance of the young man who may have felt discouraged because he had no "pull." The best "pull" any young man can have in starting in life is honesty, industry and the determination to work for his employer as though he were working for himself. He should realize that, in fact, he is working for himself and that he has a financial interest in the business, to the extent of his pay. Such a young man is bound to succeed.

A year ago a tipless hotel of the first class was opened in London. The management "positively announced" that no gratuities to waiters, porters, maids or other employes would be permitted or suffered. The "experiment," as everybody called it, seemed extremely interesting, but the result was considered doubtful. Skeptics said: "Wait a month or two." The hotel Is now a year old. The public is assured that the no-tip policy has been enforced to the letter, that the establishment has prospered beyond all expectations, and that there has been no trouble whatever in getting employes-and good, fit, well-mannered employes, too. This is very gratifying news indeed, says the Chicago Record-Herald. Presumably the hotel pays wages and salaries that compare favorably with those of hotels where tips "go," or run riot, at all hours of the day and night. Mere prohibitions. where temptations exist, will not eradicate an abuse. But if everybody is satisfied at the tipless hotel there is no reason why its policy should not succeed permanently.

Upon a Newport "farm" which cost a fortune the young owner lies ill of typhoid fever. A wealthy woman nearby suffers from the same "disease of dirt." In Manhattan last year there was a sporadic outbreak in the region of costly apartment houses. This year It is Brooklyn's turn, says the New York World. In this city, with its guarded water supply, it is likely that typhoid at this season is brought from insanitary summer resorts or incurred during automobile runs. Every life flost by typhoid is a wasted life. It as absolutely preventable. People who live in marble halls without caring whether poison runs in the pipes behind them; the very rich who spend millions in display but neglect sanitation; college professors caught unaware by epidemics like that in Ithaca -these have themselves to blame if the disease occurs. Typhoid originaing in any community disgraces it.

A new method of making physical examinations to detect the presence of tuberculosis has been demonstrated at Guy's hospital, London. The examination is made by the aid of X-rays, and shows tuberculous ravages in the lungs, it is said, at an earlier stage than they are revealed by the stethoscope. The X-ray is valuable for many purposes, but must always be used with caution, as numerous sad experiences have taught.

Cable reports that in Berlin during ring bouts a band always plays lively airs, and many boxers not only keep time with their feet but seem to take their hitting and sidestepping ques from the music. This is magnificent, but it is not boxing. Over here there's no music required save the thud of the padded glove and the contestants have to move lively enough.

An interesting incident at the convention of the National Association of Master Bakers in Baltimore was the reading of a paper by a Washington lady dealing vigorously with the methods of bakers and pleading for homemade bread both for sanitary reasons and as a matter of economy. The bakers were gallant enough to allow the lady to have her say, and if her objection to some of the practises mentioned are well founded doubtless there will be reform.

# MULTI-MILLIONAIRE MILK COMBINATION

Seeking to Control the Supply of the Large Cities.

#### ATTORNEY GENERAL ORDERS PROBE

Sensational Charges Made That Some Of the Foremost Financiers Of the Country Are Trying To Control the Milk Supply Of the Large Cities To Establish a Monopoly For Manufacture Of Pasteurizing Machinery.

Washington, D. C. (Special) .-Following sensational charges made by officers of the Washington Milk Dealers' Association that a "multimillionaire milk trust" is seeking to control the milk supply of the large cities in order to establish a monopoly for the manufacture of pasteurizing machinery, Attorney General Wickersham ordered an investigahearing before the District commissioners, held in connection with a boiler-house disappeared in a puff of enlisted in his last desperate effort to lost control of his ship, which, at 5 campaign that is being waged by the milk producers against pasteurization and the turerculin test.

At this hearing Corbin Thompson, the vice-president of the dealers' association, and A. S. Trundle, chairman of the executive committee, to control the milk supply in order flying glass. to sell their pasteurizing machines, and to this end were bringing pressure to bear on the health officers of large cities.

At the hearing there were present away. scientists from the various government was removed and an ardent gathered. disciple of pasteurization was substituted in the interest of the alleged trust. At the hearing Mr. Rudolph, were found. The body of Michael upon Messrs. Boiler in Cordage Plant Blows Up---Employes in Panic.

New York (Special) .- Six men were instantly killed, two were mortally injured, 12 were hurt more or less seriously and 50 persons, most or them women, were cut and bruised when the boilers of the American Manufacturing Company, at Greenpoint, blew up.

The American Manufacturing Company is part of the Cordage Trust. It covers three blocks, from Oak to Milton street, and from West street, seven hundred feet to the East River. There are more than a dozen buildings, all adjoining, and ranging in height from four to six stories.

The company employs 2,000 girls and 1,000 men. The boiler-house is a two-story back building at Oak and West streets. In it is a battery of immense boilers.

The six killed were in the boilerstructure was left alive to tell the ployes had just got to work. Sudshook buildings blocks away. The steam and smoke. Windows in the shake off his pursuers. other buildings of the concern surter fell

## SAFE ON DRY LAND.

# New York.

York (Special). - Walter Wellman and his five companions were landed here by the steamship Trent, which picked them up at sea after they had abandoned their dirigible balloon America and failed in the first attempt ever made to cross the Atlantic through the air. A Fidelity and Deposit Company again bruised right hand, which Wellman picked up the thread of the chase carried in a sling, was the only physical injury that resulted from their long voyage of approximately Robert E. Peary, the Arctic explorer, land; Liverpool and Pensacola, Fla., 900 miles, and a rescue the like of which is unknown to all history.

None of the aeronauts expressed regret for the loss of the America. They agreed that it had served its purpose and taught its lesson. All stand ready to renew the attempt as soon as Wellman and his engineers find a way to conquer the difficulties that brought their first trip to its thrilling end, 400 miles southeast of Sandy Hook.

Standing on the deck of the Trent, clad in the same suit of khaki he wore when he and his crew launched the America at Atlantic City, Well-

man made this statement: "We thought we could not get along without the equilibrator. Now we find we couldn't get along with it. Our plans for the future are indefinite until we find something that will do what we thought the equilibrator would do."

# COMMERCIAL

Weekly Review of Trade and Market Reports.

#### Bradstreet's says:

"Trade is irregular and still lacks snap, but the better undertone noted last week has become more widely disseminated. This despite holidays which have tended to limit the aggregate volume of business done. Causes for the improved feeling have been the official confirmation by the Government crop reporting service of the trade estimates of bumper yields of corn and oats and larger than expected yields of wheat, the liberal marketing of crops, more especially cereals, live stock and cotton, the advent of cooler, settled weather in some sections and the rather better tone of the securities markets. Improvement, as a whole, is not marked and the conservatism earlier noted is still manifest in small and frequent rather than large buying. "Business feailures in the United

States for the week were 223, against 192 last week. 'Wheat, including flour, exports from the United States and Canada for the week aggregate 3,102,873

bushels, against 2,392,630 bushels last week and 4,865,819 bushels this week last year. Corn exports for the week are 642,262 bushels, against 435,321 bushels last week and 271,771 bushels in 1909."
