

COLDS

Menyon's Cold Remedy Relieves the head, throat and lungs almost immediately. Checks Fevers, stops Discharges of the nose, takes away all aches and pains caused by colds. It cures Grip and obstinate Coughs and prevents Pneumonia. Write Prof. Menyon, 33rd and Jefferson Sts., Philadelphia, Pa., for medical advice absolutely free.

The Wretchedness of Constipation

Can quickly be overcome by **CARTER'S LITTLE LIVER PILLS.**

Purely vegetable—act surely and gently on the Liver. Careful Preparation. Headache, Dizziness, and Indigestion. They do their duty. Small Pill, Small Dose, Small Price. **Genuine must bear Signature**

Wheatwood

If afflicted with **Thompson's Eye Water** (Soft eyes, use)

Angel food cakes seldom make boys angelic.

Take Garfield Tea! Made of Herbs, it is pure, pleasant and health-giving.

Some Do.

In Brooklyn a few weeks ago a Sunday school teacher asked his class of hopefuls this rather debatable question:

"Who will tell me what is the chief end of man?"

From the most attentive pupil came forthwith this answer: "To glorify God and annoy him forever."

Simplicity of Expression.

A story was told on Martin Lomasney at the Cape Cod Commercial Travelers' dinner by Representative Pope of Leominster. "Last season Lomasney was seen talking to some one in one of the corridors, and as I passed I heard these words: 'Shall I write him?' 'No,' said Lomasney; 'never write a thing when you can talk, and never talk when you can nod your head.'"—Boston Record.

DOWN ON HIM.

The Cynic (with incontinent mustache): "Poof! Lady footballers, indeed! I don't suppose half of you know what 'touch down' means." Young Lady—Your best girl does if you ever kissed her.

HEREDITY

Can Be Overcome in Cases.

The influence of heredity cannot, of course, be successfully disputed, but it can be minimized or entirely overcome in some cases by correct food and drink. A Conn. lady says:

"For years while I was a coffee drinker I suffered from bilious attacks of great severity, from which I used to emerge as white as a ghost and very weak. Our family physician gave me various prescriptions for improving the digestion and stimulating the liver, which I tried faithfully but without perceptible result."

"He was acquainted with my family history for several generations back, and once when I visited him he said: 'If you have inherited one of those torpid livers you may always suffer more or less from its inaction. We can't dodge our inheritance, you know.'"

"I was not so strong a believer in heredity as he was, however, and, beginning to think for myself, I concluded to stop drinking coffee, and see what effect that would have. I feared it would be a severe trial to give it up, but when I took Postum and had it well made, it completely filled my need for a hot beverage and I grew very fond of it."

"I have used Postum for three years, using no medicine. During all that time I have had absolutely none of the bilious attacks that I used to suffer from, and I have been entirely free from the pain and debilitating effects that used to result from them."

"The change is surely very great, and I am compelled to give Postum the exclusive credit for it." Name given by Postum Co., Battle Creek, Mich.

Read "The Road to Wellville," in plain English. "There's a Reason."

Ever read the above letter? A new one comes from time to time. They are true, and full of human interest.

FARM AND BEES

HANDY DEVICE FOR LIFTING

Portable Hay Derrick is Excellent for Loading Shocks of Fodder On to Wagon in Field.

(By CHARLES G. MENTOONE.)

This is a portable hay derrick which can be used for lifting many things about the farm. It is excellent for loading shocks of fodder on to a wagon in the field.

Placed on runners, it can be hauled along the row of shocks and with its use one man can load as much corn as three can without it. It is also useful in loading hay from the stack to the wagon or from the cock to the wagon.

The center pole should be very strong, a small telegraph pole being the best for the purpose. The bottom

A Handy Lifting Device.

should be made with a shoulder to fit in the hold of the cross-plank at the bottom.

If the pole is 12 feet high the bottom frame should be about six feet square. It should be made of 2x6 plank strongly bolted together. Three pulleys are used and the crane can be swung around to any position.

KNOT THAT WILL NOT SLIP

Clove-Hitch is Simple and Should be Known by Every Man and Boy on Farm—Quite Useful.

(By F. L. ROBINSON.)

The clove-hitch knot ought to be known by every man and boy on the farm. It is very useful in tying ladders to standard or any kind of scaffold building.

This knot is very simple, and if properly made will not slip, as many other knots do under a strain. The first picture shows the application of this knot to such things as derricks, guy shear legs; the second is the clove hitch around a small pole. The tight-

Knot That Will Not Slip.

er the rope is drawn the less liable the rope is to slip. The third figure is still another application of the clove hitch.

Every man about the place ought to be familiar with this knot and be able to tie it on the instant.

It is also a good practice to keep near the ladder, in a dry place, a three-quarter-inch rope, 50 feet or more long. It will be surprising how many times this rope will be used where it never has been used before.

Lighting the Farm House.

With the increasing education of farmers' children and the increasing intellectual and social life in farm homes the use of artificial light in farm homes is increasing, and the money economy, but more the sanitary economy, of artificial lighting is of increasing importance. Nor may the aesthetic element, the effect on life of attractive lighting, be left unconsidered.

All kerosene lights without mantle are very unlike daylight, hard on the eyes, and hence likely to produce pain and nervous irritation and injury to health.

Soil for Corn.

Corn is especially adapted to warm, deep loam soils, rich in humus, but it may be grown with more or less success on almost any kind of soil not too low in available plant food, if the water line does not come too close to the surface.

Killing Potato Bugs.

Paris green or some other poison should be used to destroy the potato bugs before they have had a chance to seriously injure the vines. A few days' delay means the loss of a great many hills.

WINTERING BEES OUT DOORS.

Practice of Leaving Few Colonies on Stand All Winter Without Covering Is Costly.

Many bee keepers who have only a few colonies allow them to remain on the stand all winter without any protection, but they generally find in the spring that their carelessness has cost them dearly, writes Charles Perry in the Farm and Home. If it seems necessary to leave bees out of doors they may be protected as shown in the illustration. I place the hives in

Outdoor Winter Bee Shelter.

a row east and west, with the front to the south, and set them about a foot apart.

I fill the supers with rags, pieces of burlap and torn newspapers, finishing with a quilt of burlap. On this I place the cover. Prairie hay or straw is tightly packed about the backs, sides and tops of the hives. This material is put on 3 feet deep, and over the whole thing is stretched roofing paper, which is held in place by six pieces of 2x4's, which may be set into the ground. On warm days I place a board in front of the hives to prevent the bees from flying out.

TO INTRODUCE A QUEEN BEE

Convenience and Advantage of Pott's Cages Are Detailed—Used as Cell Protectors.

(By JOSEPH GRAY, Long Eaton, England.)

I use Pott's queen-cages, which can also be used as cell-protectors or nurseries. The difference between these and the regular Benton cages are:

1. The candy-hole is made from the end, using only a half-inch bit.

2. A half-inch hole is made through the side into the center compartment.

3. The top and side covers are of perforated metal, and cut so that they do not catch the clothing.

4. These covers are put on with a screw, which serves as a hinge, and can be tightened with one turn of the screwdriver, so that the imprisoned bees cannot force open the doors and escape, which I have seen them do when laid down temporarily.

The convenience and advantage of these cages will be readily seen in the following operations:

Go to your nucleus colony and pick up the comb with the queen; grasp it with the left hand, also hold your queen cage with the same hand, your thumb over the opened side door. Now with the right hand pick off your queen and she will easily pass through the half-inch door. A three-eighth or quarter inch is not nearly so convenient. You can cage as many bees as you wish, with seldom a sting. The covers are so cut that they will not catch the clothing and pull open on the way to the out-apiary.

Revive Unprofitable Colony.

The disposition of an unprofitable colony to store honey may be materially increased by giving them several combs of hatching brood from an industrious hive.

More Pure Honey.

It would be a good thing if more families in general would adopt the plan to have more pure honey on their dining tables and less glucose molasses.

FARM NOTES

A good celery fertilizer must be rich in nitrogen and potash.

Burned lime and manure should not be mixed above ground.

If necessary to feed bees in mid winter, better feed candy.

Never feed scorched sugar in the winter, as it will kill the bees.

If you do not own a good fanning mill you are the loser thereby.

A silo 16 feet in diameter and 26 feet high will hold approximately 85 tons of silage.

It is a mistake to sow alfalfa upon land not containing the bacteria which live upon its roots.

Ammonia is a nitrogen compound and the nitrogen is the most valuable part of the manure.

If you have poor honey, say so; never lie about your own goods nor about your neighbor's.

A very large proportion of our soils need to be put back in the humus condition they were in originally.

Nearly all bee-keepers advocate good stock in bees, but there is a diversity of opinion as to the best way to get the best stock.

If manure is left in piles about the barn it soon begins to heat, even in winter, especially if it contains any large proportion of horse manure.

While the loss of ammonia from the manure heap can be materially reduced by tight packing, more or less is bound to be formed under the best packing possible.

If the manure can be hauled upon ground where there is no danger of its being washed away, the most economical plan is to spread it upon the land as quickly as it is produced.

THE HOBBLE SWEETHEART.

"What's the matter with him? Has he got rheumatism?" "No; the girl he is engaged to wears a hobble skirt, and he got that walk from trying to keep step with her."

Runs on the Bank of England.

Even the Bank of England has not been entirely free from runs nor from the necessity of saving itself by strategy. In 1745, for instance, it was forced to employ agents to present notes, which were paid as slowly as possible in sixpences, the cash being immediately brought in by another door and paid in again, while anxious holders of notes vainly tried to secure attention. In 1825, too, only the accidental discovery of 700,000 £1 notes saved the bank from stopping payment.—London Chronicle.

Becks' CAPTURE is the best remedy—relieves the aches and feverishness—cures the cold and restores normal conditions. It's liquid—effects immediately. 10c., 25c., and 50c. At drug stores.

The saint who says he cannot sin may be an earnest man, but it is wisest to trust some other man with the funds of the church.

Don't worry about your complexion—take Garfield Tea, the Blood purifier.

Homely girls rush in under the mistletoe where peaches fear to tread.

Constipation causes many serious diseases. It is thoroughly cured by Dr. Pierce's Pleasant Pellets. One a laxative, three for cathartic.

Many present problems are past follies getting ripe.

Garfield Tea purifies the blood and eradicates rheumatism. It is made of Herbs.

An undertaker knows a lot of "dead ones" that he is unable to bury.

Certificate admits to College. School Coach Meets Day Pupils. Miss Bangs and Miss Whitton, Riverdale Ave., near 252d St., West

Land That Pays You Back in Sixty Days

It figures out this way. See this farm? Belongs to a man named Moor. Last August, AFTER HARVESTING THAT SAME YEAR, one crop of oats and one of cantaloupes, for which he received \$3,600.00, he let the grass grow, and in forty days the hay on every acre was worth \$25.00, or just about what it will cost you to buy exactly as good an acre of ground, in the same neighborhood, from us.

DEEN LAND FARMS

at Waycross, Ware Co., Ga., cost \$20.00 to \$35.00 an acre (price depends on how close they are to the city of Waycross) and can be taken possession of at once on payment of a dollar an acre down. If you had to pay cash for this land, as you can see, six weeks in grass would let you out about even. But you don't have to pay cash. You can take three years' time to pay if you wish. That makes this proposition easier for you than a government entry.

Reserve Your Land Now—No Risk

Tell you what do. Write Senator Deen to pick you out the best farm of the Deen Land Farm Tract. He'll do just that for you—select the best there is. Enclose a deposit of one dollar per acre on acreage desired (farms sold in 10, 20, 40 and 80 acre parcels)—then take 60 days to investigate, examine titles, etc. At the end of that time if you are not more than satisfied, nay astonished, that you can get such rich, lively, productive land as this, within a radius of two to ten miles of the handsomest, most prosperous and fastest-building railroad town in the new RICH SOUTH—then you can have your deposit money back with 6% interest added—just by asking for it.

Get our big book of SOBER FACTS and read all about this wonderful land that produces three crops a year and grows practically everything from sweet potatoes, sugar cane and celery to cotton and pecans. Send us that coupon NOW and get posted QUICK on this land of Perfect Day and Velvety Night, the Vanishing Death Rate, Low Freight, Ocean Breezes, Year Around Crops, Full Pocket Books, and the Best People on Earth, where sun, air, water and soil combine to make conditions ideal for you whether you are a farmer or not. Get this book, we say, NOW; better still, if you can trust a southern gentleman and want the best farm there is in the Deen Land Tract, send Senator Deen your deposit money at once.
