

CURED THREE YEARS.

Not the Slightest Sign of Kidney Trouble Ever Returned.

W. H. Hall, 269 Main St., Orange, N. J., says: "My back was as useless as if I had broken it. Pains such as I had never experienced, struck me through the kidneys and I was nearly prostrated. I could not find rest or sleep and lay awake thinking how miserable was my lot. I had had, throbbing headaches and often became dizzy. No one who has not had kidney trouble can imagine the misery it will cause. At last I began taking Doan's Kidney Pills and in a few weeks was a well man. For three years and I have been free from kidney trouble."

Remember the name—Doan's. For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

HURT HIM.

Customer—That razor you're using must be rather old.
Barber—How can you tell, sir?
Customer—It has so many teeth.

SCRATCHED TILL BLOOD RAN

"When my boy was about three months old his head broke out with a rash which was very itchy and ran a watery fluid. We tried everything we could but he got worse all the time, till it spread to his arms, legs and then to his entire body. He got so bad that he came near dying. The rash would itch so that he would scratch till the blood ran, and a thin yellowish stuff would be all over his pillow in the morning. I had to put mittens on his hands to prevent him tearing his skin. He was so weak and run down that he took fainting spells as if he were dying. He was almost a skeleton and his little hands were thin like claws."

"He was bad about eight months when we tried Cuticura Remedies. I had not laid him down in his cradle in the daytime for a long while. I washed him with Cuticura Soap and put on one application of Cuticura Ointment and he was so soothed that he could sleep. You don't know how glad I was he felt better. It took one box of Cuticura Ointment and pretty near one cake of Cuticura Soap to cure him. I think our boy would have died but for the Cuticura Remedies and I shall always remain a firm friend of them. There has been no return of the trouble. I shall be glad to have you publish this true statement of his cure." (Signed) Mrs. M. C. Maitland, Jasper, Ontario, May 27, 1910.

It Might Help.

"My wife used to meet me at the door every night when I got home from work."
"Doesn't she do so any more?"
"No, never."
"Why not try taking home a little check to her two or three times a week?"

Dr. Pierce's Peppermint Cure, small, sugar-coated easy to take as candy, regulate and invigorate stomach, liver and bowels and cure constipation.

Men have more temptations than women, because they know where to look for them.

Mrs. Winslow's Soothing Syrup for Children teething, softens the gums, reduces inflammation, allays pain, cures wind colic, 25c a bottle.

It's easier for a shiftless man to make friends than to make good.

Biliousness
"I have used your valuable Cascara and I find them perfect. Couldn't find some time for indigestion and biliousness and am now completely cured. Recommend them to everyone. Once tried, you will never be without them in the family."—Edward A. Marx, Albany, N. Y.

**ALL OVER THE STATE
TOLD IN
SHORT ORDER**

Mauch Chunk.—Work on the grading of the extension of the line of the Lehigh and New England Railroad from Danielsville to Tamaqua, via the Lizard Creek Valley, is progressing rapidly. In response to threats made by West Penn Township, Schuylkill County, farmers that unless the company came forward with the cash for the land over which the new road is to pass, the courts would be asked to grant injunctions, the company's claim agent took a trip through the valley this week to renew old options or pay the cash. This move is thought to indicate that the Lehigh Coal and Navigation Company has no hope of fixing up its differences with the Central Railroad of New Jersey and that the new road must now be built.

Reading.—Fish Warden Charles Nessley made a midnight raid at Glendale, in the southern end of Berks County, and took into custody James Harner, Charles Harner, Frank Quigley and Ernest Weaver on the charge of illegal fishing. It is alleged that the party visited trout streams in the vicinity of the Yellow House, and with a large net took nearly all the trout in the dam and in the streams.

Allentown.—Lewis F. Grammes, a leading manufacturer of this section, died suddenly of heart trouble in his sixty-seventh year. He had many patents for knitting machines and other mechanical contrivances, but his principal invention was the mailing machine. Mr. Grammes and his sons did the largest foreign business from Allentown.

Chester.—Amor Talley, treasurer of Lower Chichester Township, was severely injured by the explosion of an electric light globe on a Marcus Hook trolley car. Pieces of the glass struck him in the eye, necessitating the aid of an oculist. In spite of the pain he proceeded on his way to Media and reported for duty as a Civil Court J. J. J. J. J.

York.—Because he did not like his new home, having changed his residence the first of April, Emanuel H. Heckert, seventy years old, committed suicide by shooting himself in the head. Two boys witnessed the tragedy, having followed Mr. Heckert from his house to the barn, believing he intended to kill rats. The boys crept near to where Mr. Heckert was sitting and saw him place a revolver to his head and fire.

Lewistown.—Mrs. Charles Relly, 49 years old, died of burns received when she attempted to stamp out the flames of a rubbish fire that had communicated with straw in the stable yard and threatened the building. Rev. Mr. Rhoads jumped the fence and was badly burned on the hands and arms in an attempt to save the woman, whose clothing was a mass of flames.

Harrisburg.—Warrants were issued here for the arrest of Arthur Gleason, an Englishman, accused of having embezzled money belonging to three women living in Dorset, England. The information was made by Mrs. E. Harley, who met the man in Liverpool, and who, with her sisters, accompanied him to this country with money to invest. They charge that he secured the money and left for New York, leaving them stranded in this city.

Bethlehem.—Injuries which will result fatally occurred to Harold and Charles Pursel, aged 2 and 3 years old, sons of Levitt Pursel, of Holland, N. J. The babies, in the absence of their mother, got hold of matches. Playing with them near a couch, the latter became ignited. In trying to put out the blaze the clothing of the children caught fire and both were burned from head to foot.

Scranton.—Nine-year-old Tommy McLane, known to his companions as "Wild West," was hungry for pie, he saw a baker's wagon with eighty-two juicy, tempting pies on the street corner, got into the wagon and drove off. The most he could eat was six pies. The others he dumped into the street; drove the wagon to police headquarters and told the police he found it in "Mc Padder's barn." He was held for Juvenile Court.

Pottsville.—District Attorney Lyons has appealed to the Superior Court the cases of William Grow and William Jones, convicted of ballot box stuffing, but granted a new trial by Judge Brumm. The case was before Superior Court before and as a result Grow and Jones were remanded to jail and it is claimed that the lower court cannot now grant a new trial. Judge Brumm declares that the men were not properly defended and that circumstances have developed which show that an injustice has been done to them.

Stroudsburg.—Hurd's Sanitarium at North Wales Gap, was destroyed by fire together with a cottage, laundry, two ice houses and a large barn belonging to the Minisink Farm Company. The loss is estimated at \$65,000. Hurd's Sanitarium was one of the oldest summer resort places at the Water Gap, and for years has been well patronized by Philadelphians. For a month the resort has been opened and a number were registered at the place. There was little difficulty for the guests to escape in safety, but most of them lost clothing and valuables.

VALUABLE ADVICE IN CATCHING

John Kling, Catcher for Champion Cubs.

John Kling, the Cubs' famous catcher, still receives credit for knowing all of the fine points behind the bat. Kling was asked the other day to give a talk on the scientific methods employed in baseball, and this is what he said:

"When I was a pitcher in semiprofessional teams around Kansas City I lost many games by trying to do too much, by throwing too often and by wearing myself out by wasted efforts. I was a failure as a ball player in several towns before experience taught me that one play at the right instant is worth ten at any other time."

"When I began catching one of the first things I learned was that the catcher can break up a team quicker than anyone else can. He need not even make an error to do it. One of the easiest ways to lose a game is for the catcher to throw too much. He may throw perfectly, and yet by keeping the infield moving and out of position, expecting his throws and studying him instead of watching the batter he may cause the game to be lost. My idea has been to make plays when they count and not to use too

many signals. The infielders have a lot to watch and if the catcher keeps them watching him all the time he takes their minds off the other duties and causes them to make blunders. "First and foremost in importance in winning is that the catcher never shall make or attempt to make any play, especially a throw, unless absolutely certain that the other men in the play have caught the signal, understand what is to be attempted and are prepared to make the play with him."

"A bad first baseman or one in whom the others have no confidence makes bad throwers of all. I believe in helping umpires and doing all I can to make their work easier. If they are let alone and not nagged at their work is much more satisfactory. I am not put out of ball games. I take as much interest as anybody, but I cannot see the use of kicking on decisions."

No International Track Meet.

English authorities say there will be no meeting between the Oxford-Cambridge and combined Harvard-Yale track and field teams this year.

SLOW BALL THING OF PAST

Christy Mathewson Says Style of Pitching Has Undergone Change in Fast Company.

Christy Mathewson is of the opinion that the day of the slow ball pitcher in fast company is a thing of the past.

"When I broke into the big league," said Christy the other day, "Win Mercer, Clarke Griffith, Red Donohue and other pitchers were getting away with their games and each one was depending upon a slow ball to a large extent. Billy Reldy and Dusty Rhoades followed them, but look over the list of pitchers in the two big leagues today and you will not find a single pitcher who is noted for his slow ball. There may be some who have a floater in their repertoire, but they do not depend upon it to any extent."

"Today the big league pitcher must have speed. The majority of the big league pitchers are large men, but, large or small, they must be able to put steam on the ball or they go back to the minors. In fact, when a big league scout reports some minor leaguer to his employer, the first question that the latter asks is: 'Has he any smoke?'"

"I have reasoned it out that the slow ball pitcher scarcely ever won his games by small scores and the clubs in the days when slow ball pitchers thrived generally had a lot of batters who won their games by big scores. It did not cause much damage if five or six runs were scored against a club that owned a slow ball pitcher if that team was able to go out and score seven or eight runs. But nowadays the scores are smaller and the man with the floater finds it difficult to stand the pace."

HAS BIGGEST BASEBALL HAND

Mike Kahoe, Scout for Washington Team, Says Eddie Ainsmith Will Be Greatest Catcher.

Eddie Ainsmith, the Nationals' young catcher, who is attracting so much attention by his brilliant work, and who bids fair to be the sensation of the American league this season, carries around with him the largest pair of hands known to baseball."

So big are Ainsmith's bread hooks that he cannot put gloves to fit, and during the cold days in Cambridge, Mass., he is forced to don mittens. The digits on Ainsmith's throwing hand are badly twisted and look like

branches of a guarded oak, but he is not handicapped in the least, and claims that this mishapen bunch of fives does not bother him in throwing to bases.

It has been said that Frank Bowerman of the New York Giants had only to hold up both hands and one might see the complete deaf and dumb alphabet there. According to the veteran, Mike Kahoe, Ainsmith's hands are almost twice the size of Bowerman's, and the scout also declares that in two years the former will be the greatest backstop known to organized baseball.

ATELL WILL HAVE TO REST

Injury to Shoulder of Featherweight Champion May End His Long and Brilliant Career.

Abe Attell, the featherweight champion, who suffered another injury to his left shoulder in his bout with Frankie Burns in New York recently, has been ordered by his physicians not to fight again for at least six months and probably for a year. There is a possibility that the arm is so badly injured that Attell will never be able to return to the prize ring. Enforcement of retirement for a year means a loss of \$30,000 to

Abe Attell.

\$50,000 to the fighter, who had mapped out a busy campaign. One of his first matches was to have been with "Knockout" Brown, whom Manager Danny Morgan promised to send against the little champion as soon as Brown's ear was again in shape. Attell rested more than two months after the arm was first injured in his bout with Kilbane at Cleveland, but the rest did not prove long enough.

Capabianca May Meet Lasker. Capabianca may meet Dr. Lasker, the champion, in a class match.

SPEAKER IS BEST FIELDER

Boston Fans, Who Are Well Informed, Claim Texan Is Greatest of All in Center Garden.

Boston baseball fans, the best informed and the most discriminating, say Tris Speaker is the best center fielder in the world.

He is seen every day in center field making difficult fly balls look easy, running like a grayhound into the right fielder's or left fielder's territory, and we see him at the plate swinging his bat nonchalantly, eyeing the pitcher like a hawk and waiting for him to send up the kind of ball he is waiting for; but the public never gets very close to a ball player—never knows what kind of a man he really is.

Tris Speaker is a Texan. How did he come by the name of Tris? He was asked the question.

"Oh, I don't know," he replied; "they just call me that."

Speaker is twenty-eight years old, weighs 180 pounds and stands 5 feet 11 inches high. He has the rough complexion of one who has spent most of his life in the open air. He has heavy, muddy, bloodshot eyes, not the kind one would imagine could pick out a good ball and paste it to the far corner of the field, or could start after the ball at the crack and judge to an inch where that ball is going to land.

He has a voice like rumbling thunder, and his softest words sound like the growl of a mastiff. He has large, powerful hands, freckled:

Speaker lives in winter in Hubbard City, Tex., which is not a city at all, but a small post village near Dallas, having a population of 894 in summer and 895 when Speaker is there.

He goes back home at the close of the baseball season and spends the

Tris Speaker.

first few weeks hunting, and then turns to the cattle industry. He is a regular Texas cowboy in the saddle and can do as much with a horse as he can with a baseball bat.

Sporting Gossip.

Louisville has released Pitcher Powers to Columbus, S. C.

Ball games Sunday before noon at Oakland, Cal., have proved successful from a patronage point of view.

Baseball's "bad boys" are gradually dropping out of the game. Managers will not waste their time on the loose livers.

Comiskey says Jimmy Callahan is the "wonder of the decade," that Cal has come back with a vengeance, good as ever.

"Buck" Freeman, the home-run kid from Boston, is still in the game and will manage a team in the Northwest-ern league.

Eugene Sampson, pitcher and captain of Westminster college last year, has accepted terms with the Philadelphia National league team.

Jerry Downs, the former Washington player, is showing up well as a first baseman for the Columbus team in the American association.

Clark Griffith, like Bobby Wallace, it is said, wants no more of Hot Springs as a training camp and the Reds may go into Texas next spring, probably to San Antonio.

John Gansel is to make his permanent home in Rochester. He has bought a lot in an aristocratic residence section and is now building a house that will cost him \$10,000.

George McQuillen's brother, Earl, has signed with Aurora in the Wisconsin-Illinois league. He is also a pitcher and hopes some day to be as famous as the Cincinnati finger.

CURE THAT CATARRH

Our climate with its sudden changes is conducive to catarrh—which is a chronic inflammation of the mucous membrane surface of head—nose or throat.

One month's local treatment with Paxtine Tilet Antiseptic will convince the most skeptical that Paxtine is not a palliative but a specific for all catarrhal conditions.

Paxtine is a perfectly harmless antiseptic and germicide in powder form which contains all of the antiseptic qualities of liquid antiseptics, but with other valuable cleansing, germicidal, and healing ingredients added.

Just a little in a glass of water as needed—used as a spray and gargle, will not only remove the accumulated secretions, but heals the inflammation, destroys the germs of disease, and dispels the disagreeable odor caused by chronic catarrh.

For sale at all druggists, 25c and 50c a box, or postpaid upon receipt of price. The Paxton Toilet Company, Boston, Mass. Send for a free sample.

Churches and Tuberculosis.

Statistics showing how serious a problem tuberculosis is to the ordinary church congregation have been issued by the National Association for the Study and Prevention of Tuberculosis. From reports received from over 725 churches, with a membership of over 312,000 communicants of twenty denominations, and from 208 cities and towns in 12 states in various parts of the country, out of nearly 7,000 deaths in 1910, over 700 or 10 per cent., were caused by tuberculosis. This means 224 deaths for every thousand members or communicants. While the percentage of deaths from tuberculosis compared with other diseases is not higher in the churches, according to these figures, than in the country at large, the tuberculosis death rate, as shown by the church returns, is higher per thousand communicants than that for the general population in the registration area of the United States, which the census bureau gave as 1.67 in 1909.

Evidently an Amateur. Getting ready for your suburban gardening?"

"Yep. I've got a spade, a pick, a hoe, a rake and some garden seeds, but I've ransacked the market and nobody seems to have any angle worms for sale."

You are not responsible for the disposition you were born with, but you are responsible for the one you die with.—Babcock

Facts About Motherhood

The experience of Motherhood is a trying one to most women and marks distinctly an epoch in their lives. Not

one woman in a hundred is prepared or understands how to properly care for herself. Of course nearly every woman nowadays has medical treatment at the time of child-birth, but many approach the experience with an organism unfitted for the trial of strength, and when the strain is over her system has received a shock from which it is hard to recover. Following right upon this comes the nervous strain of caring for the child, and a distinct change in the mother results.

There is nothing more charming than a happy and healthy mother of children, and indeed child-birth under right conditions need be no hazard to health or beauty. The unexplainable thing is that, with all the evidence of shattered nerves and broken health, resulting from an unprepared condition, women will persist in going blindly to the trial.

It isn't as though the experience came upon them unawares. They have ample time in which to prepare, but they, for the most part, trust to chance and pay the penalty.

In many homes once childless there are now children because of the fact that Lydia E. Pinkham's Vegetable Compound makes women normal, healthy, and strong.

Any woman who would like special advice in regard to this matter is cordially invited to write to Mrs. Pinkham at Lynn, Mass. Her letter will be held in strict confidence.
