100 YEARS OLD

Petrie's Eye Salve

Not Particular.

She—I heard Freddy Pickle was decided to marry and settle down to a particular girl.

He—Huh! She can't be.

KIDNEY CHILLS AND BACKACHE.

If, when you get wet or take cold, a "settles on the kidneys" and there is a shivery, chilly sensation in the back, it shows kidney weakness which is often the beginning of serious disease. Doan's Kidney Pills should be used persistently until the backache and other symptoms disappear.

C. V. Lemmon, Fal-mouth, Ky., says: "The doctors said I had gravel, in fact, I passed a stone as large as a bean. I improved but my kidneys never regained normal strength and during cold weather, I endured intense suffering from backache and urine passed profusely. During the last attack, I used Doan's Kidney Pills and they soon routed the complaint. I shall surely appeal to them if troubled again."

Remember the name—Doan's.
For sale by all dealers. 50 cents a box. Foster-Milburn Co., Buffalo, N. Y.

THE BEST WAY.

He doesn't care for money, but his purse is far from slim; it's big enough, they say, to make his money care for him.

Age of Oysters.

Oysters grow only during the summer and especially during the long, warm summers at that, and are scarcely big enough for the mouth before the third year. It is easy after looking over a bunch of shells to tell how old an oyster is. A summer hump and the winter sink come across the shell every year, but after the seventh or tenth year full growth comes, then, by looking at the sinks between the humps it is hard to tell anything more about Miss Oyster's age. Oysters live to be 20 years old.

FEED YOUNG GIRLS

Must Have Right Food While Growing.

Great care should be taken at the critical period when the young girl is just merging into womanhood that the diet shall contain that which is up-building and nothing harmful.

At that age the structure is being formed and if formed of a healthy, sturdy character, health and happiness will follow; on the other hand unhealthy cells may be built in and a sick condition slowly supervene which, if not checked, may ripen into a chronic condition and cause life-long suffering.

A young lady says:

"Coffee began to have such an effect on my stomach a few years ago that I finally quit using it. It brought on headaches, pains in my muscles, and nervousness.

I tried to use tea in its stead, but found its effects even worse than those I suffered from coffee. Then for a long time I drank milk at my meals, but at last it failed on me. A friend came to the rescue with the suggestion that I try Postum.

"I did so, only to find at first, that I didn't fancy it. But I had heard of so many persons who had been benefited by its use that I persevered, and when I had it made right—according to directions on the package—I found it grateful in flavor and soothing and strengthening to my stomach. I can find no words to express my feeling of what I owe to Postum!

"In every respect it has worked a wonderful improvement—the headaches, nervousness, the pains in my side and back, all the distressing symptoms yielded to the magic power of Postum. My brain seems also to share in the betterment of my physical condition; it seems keener, more alert and brighter. I am, in short, in better health now than for a long while before, and I am sure I owe it to the use of your Postum." Name given by Postum Company, Battle Creek, Mich.

"There's a reason."

Ever read the above letter? A new one appears from time to time. They are genuine, true, and full of human interest.

HORTICULTURE

REPAIRING INJURY BY MICE

Where Little Rodents Have Gnawed Tender Bark of Young Trees Quick Treatment is Needed.

When you find that the mice have gnawed at the tender bark of young trees and done serious damage go after them at once. Make a circular incision with a sharp knife, if the tree be entirely girdled, all about the stem at once, both above and below the ragged edges where gnawed and remove these portions.

Next, select a twig from its top, say from one-fourth to one-half inch in diameter, and cut in three or four lengths, each as long as the space girdled. With a chisel or knife cut a V-shaped notch, as shown at b, just below and even with the lower edge of the bark above, into the main trunk or stem, to accommodate one properly slanted end of a length of twig. Also, make a similar notch to receive its lower end. These should be made to fit snugly, springing them into place, by slightly bending each length as a bow.

The bark of the twig and that of the tree above and below, where they unite, should meet evenly at both ends. Depending on the diameter of the tree, fit in from two to four

Trunk Grafting Girdled Trees.

of these twig lengths, and cover the whole space with a wax mace of equal parts melted resin and tallow, thoroughly hand worked, and over it put a rough gunny sack, c, or other cloth bandage, which should be left until it comes off of its own accord.

If your work has been carefully done, not one tree in 100 will die, writes G. A. Randall of Gratiot county, Mich., in the Farm and Home. The wax excludes all air, wet, etc., and the twigs soon unite with the parent stem above and below the injury, and in a season or such a matter forms a complete injury or new growth all about the injury. Much valued nursery stock may thus be saved for further usefulness, but if left would surely die.

TREE MULCH IS IMPORTANT

Half-Rotted Leaves Excellent for Spring-Planted Trees—Prevents Rapid Evaporation.

Before hot, dry summer weather sets in the young trees and shrubs, also the newly set privet and evergreen hedge, should have about four inches of half-rotted straw leaves or freshly cut grass spread around each tree. Before applying the mulch fork up the ground around the tree and rake fine, then spread the straw on grass. The covering should extend out fully two feet from the trunk of the tree to protect the roots. A few large stones should be put on top of the straw to keep it in place. Only those who practice mulching know its value.

The mulch will prevent evaporation, keep the soil cool and moist and prevent the growth of weeds. Currants, gooseberries and raspberries yield larger berries and much more fruit when the bushes are mulched early in June. The rose hedges should be mulched with the lawn clippings. Young hedge plants, after the ground is forked up on each side of row and raked fine, should be mulched with any material that may be at hand—grass, weeds, rotted straw or half-rotted leaves from the wood. In the fall this vegetable matter should be forged under and a good dressing of well-rotted manure spread on each side of the hedge to enrich the soil and to protect the roots. Trees and shrubs properly planted and carefully mulched will make a vigorous growth the first year and come into full bearing at least several years earlier than trees that were not mulched. Ornamental shade trees should likewise be given a thick mulch.

Strawberry Plants.

Strawberry plants taken up, root pruned and heeled in early, may be successfully transplanted even when berries are ripe. It is better, however, to plant early, unless plants have been heeled in. It is hardly safe to plant after bloom appears, especially if the plants have been shipped any considerable distance. The land should be plowed early and harrowed frequently until planting time.

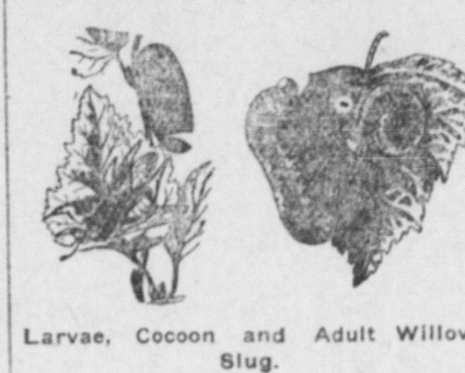

VERY DESTRUCTIVE SAW FLY

American Climber Somewhat Resembles Hornet in Size and Appearance—Attacks Many Trees.

The foliage of our willows is sometimes more or less injured by saw fly larvae, or "false caterpillars," which eat the leaves. Even the laurel-leaved willow, which, happily, is not so much subject to insect attack as some other varieties, is not exempt.

These false caterpillars, differing from the true caterpillars in having from twelve to sixteen fleshy prolegs in addition to their true six legs, are four-winged flies, not ordinarily noticed by the casual observer.

The larva of this insect has a habit of curling up on the leaf. It is greenish or pale yellowish, with a black stripe down the back. They also have the power, it is said, of ejecting an acid fluid from the pores in their skin. When full grown they

Larvae, Cocoon and Adult Willow Slug.

spin a papery cocoon, changing within to pupae, and emerging later as four-winged flies. The American Climber is the biggest saw fly we have, resembling somewhat a hornet in size and general appearance. The eggs are laid in the tissue of the leaf. It affects elms and some other trees as well as the willow.

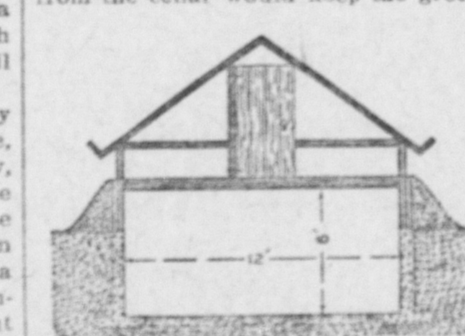

Fortunately, these insects yield readily to arsenical poisons. A weak combination of Paris green and water, or, better, arsenate of lead and water, applied to the leaves will kill them.

CELLAR FOR COLD STORAGE

Excellent Place for Storing Roots to Prevent Drying Out and to Work in Early Spring.

When keeping my dahlia roots in my home cellar, which contains a hot air furnace for heating the house, I lost many roots by drying and I was forced to get them outside, says a writer in the Country Gentleman. I designed a cellar for keeping the roots as well as to furnish a place in which to work on sunny spring days. The roof is made of glass which covers the greenhouse part, this being set over a cellar dug in the earth.

The floor was put in loosely with the supposition that the warm air from the cellar would keep the green-

Sectional View of Cellar.

house from freezing, but instead it helped the cellar to freeze. A small oil stove was sufficient to keep the temperature right during cold snaps in the spring. Such a cellar may be provided with proper drainage in localities where it is necessary.

HORTICULTURAL NOTES

Plan to set out at least a few trees every spring.

The red raspberry is one of the most popular of small fruits.

Trees should be ordered and planted as soon as the ground is dry enough to work.

If the rabbits have gnawed only the outer bark, wrap the wound with cloth.

There are no conflicting opinions among growers on the effects of cover crops on peach trees.

Don't forget that rotation in the flower beds and borders is as necessary as in the fields and garden.

The best place in the world for the poultry yard is the orchard—any kind of an orchard where insects abound.

The only object in cutting back catalpa trees the second or third year is to secure a perfectly straight trunk.

Field mice been at the young trees? If the bark is gnawed to the wood the trees may be saved by bridge grafting.

An hour's work with a sharp wire at the foot of your peach trees killing borers may mean an extra bushel of fine peaches.

In general the pome fruits do better on heavier soil than the stone fruits, but the apple succeeds on a very large variety of soils.

A tree can be bridge grafted in less than half an hour and it is better to take this time to do it than to let a valuable tree die.

The dwarf pear may be planted in orchards from ten to twelve feet apart; the half standards should be planted 15 feet apart.

Raspberries and blackberries should be mulched with straw or litter after they have been shallow cultivated two or three times in the spring.

While the orchard is coming into bearing, try vegetable growing as a side line. This makes one of the surest and best sources of income.

WOMAN BUYING SHOES

THAT IS WHEN FAIR CREATURE IS MOST EXASPERATING.

After Trying on All the Footwear in the Store She Finally Decides That She Will Look Elsewhere.

See, children, the lady is buying a pair of shoes. She has been buying a pair of shoes for an hour, as you can see from the signs.

The salesman waiting on her looks as if he had been run through with a wringer, and his collar is wilted.

About the floor, on the perforated-backed benches and on the wide shelf below the stock shelves are many shoes and many boxes.

The lady has one stockinged foot on the near-leather stool and looks pleased, because she has tried on every shoe in the place as nearly as the salesman can figure.

To begin with, she wanted high shoes with light soles and cloth uppers, and though they found a pair that fitted her exactly, she decided on tans instead.

The tans were too small, but the clerk didn't say so, merely observing that they were a little short for her.

Then she decided on gun metal oxford shoes, and the clerk swarmed up the rolling ladder and got down seven boxes.

One pair of those fitted her exactly, but the unfortunate salesman had told her they were only \$3, and she always got \$4 shoes.

Then, having been fitted in gun metal oxfords, she changed about and decided on high shoes with cloth uppers, but with heavy soles.

Having accomplished a perfect fit in these, and having revolved the matter in her mind, she decided that she didn't want high shoes at all. Spring was coming on, and she had seen a beautiful pair of high-heeled slippers in the window. Would he get them out for her? Sure.

But she didn't like these on close inspection, and preferred a shade of tan. But tan wasn't so fashionable, and she looked at the black.

Then another salesman came on the scene and assisted, and the proprietor came and announced that he knew just precisely what the lady wanted. They were ordered from the east—might even be at the depot now. Could she come in tomorrow?

And now observe—the lady is telling the proprietor she will come in tomorrow and departs.

The proprietor knows where she is going, and knowing it, sees no use in having her followed.

She is going to another shoe store, because she, having decided she needs new shoes, is in a panic lest she will not get them at once.

And she will get them, too, because such a thing as a lady postponing getting shoes when she has once started to buy is absolutely unheard of.

And in the shoe store the proprietor sighs and points to the scattered shoes, and boxes, and tissue paper, and shoehorns, and two salesmen sigh and begin restoring things to order.

They say nothing, for there's nothing to be said. It's all in a day's work, and they're sorter used to it.—Galveston News.

The New Neighbor All Right.

A young couple newly married had just moved into the house next door, and through an open window Mrs. Bonnamy, screened from view behind the curtain of her own window, was watching the young wife at work straightening things in the sitting-room.

"Good!" she exclaimed, turning away at last. "That girl has been properly trained. She'll do."

"What have you found about her?" asked Mr. Bonnamy.

"I've found that she knows how to use a broom."

"How does she use it?"

"Every three or four strokes she makes with it she turns it in her hand."

"Why does she do that?"

"It's just like a man to ask that question. She does it to keep the broom from getting top-sidged. Wears it out evenly; last twice as long, don't you see?"

"Why, I didn't know—"

"No, of course you didn't. Neither do half the women," said Mrs. Bonnamy, almost spitefully.—Youths Companion.

Real Tip-Toppers.

Senator Brown, apropos of the marital misadventures of a young multi-millionaire, said at a dinner in Washington: "The trouble is that too many of our idle rich young men think that among their many rights is included the right to do wrong. They are, in truth, as foolish in this respect as the maid-servant who said:

"I've got a place among the tip-toppers for sure this time. They're bang-up aristocrats I live with now."

"What do you mean by bang-up aristocrats?" a friend asked.

"Oh," she replied, "I mean places where they have three kinds of wine and the ladies smoke and the men swear."

Healthful Advice.

Doctor—You're very run down indeed. You mustn't take any violent exercise of any sort. For instance, you mustn't er—er—what are you? Patient—An anarchist. Doctor—Well, you mustn't er—er—throw any bombs for a long time.

SETTING A HIGH STANDARD

Child's Idea of Goodness Set Forth in Perfect Faith, Without Irreverence.

All things are relative, and to the child, gazing at life and its wonders with eyes as yet undimmed by sophistication or sorrow, nothing is impossible, nothing unspeakable, nothing too sacred to be discussed or too difficult to be attempted. Not irreverence nor impertinence, but innocence prompts such speeches as that recorded of the child of a popular journalist by his devoted paternal grandmother.

"Grandma," said the little boy, delightfully addressing her, "do you know what's going to happen? Papa says that if we're real, real good, he'll take us to the circus!"

"That's nice," smiled the young-bearded adult between whom and the eager youngling no hint of age separation mars perfect comradeship. "How good do we have to be?"

The embryo man, after a moment of silent consideration: "Oh, as good as God, I guess!"

ECZEMA BROKE OUT ON BABY

"When my baby was two months old, she had eczema and rash very bad. I noticed that her face and body broke out very suddenly, thick and red as a coal of fire. I did not know what to do. The doctor ordered castile soap and powders, but they did no good. She would scratch, as it itched, and she cried, and did not sleep for more than a week. One day I saw in the paper the advertisement of the Cuticura Soap and Cuticura Ointment, so I got them and tried them at once. My baby's face was as a cake of sores.

"When I first used the Cuticura Soap and Cuticura Ointment, I could see a difference. In color it was red. I continued with them. My baby was in a terrible condition. I used the Cuticura Remedies (Soap and Ointment) four times a day, and in two weeks she was quite well. The Cuticura Remedies healed her skin perfectly, and her skin is now pretty and fine through using them. I also use the Cuticura Soap today, and will continue to, for it makes a lovely skin. Every mother should use the Cuticura Remedies. They are good for all sores, and the Cuticura Soap is also good for shampooing the hair, for I have tried it. I tell all my friends how the Cuticura Soap and Ointment cured my baby of eczema and rash." (Signed) Mrs. Drew, 210 W. 18th St., New York City, Aug. 26, 1910.

Cuticura Remedies are sold throughout the world. Send to Potter Drug & Chem. Corp., Boston, Mass., for free booklet on the skin.

Well Mated.

Thus the inquisitive boarder: "What has become of the old-fashioned woman who used to call a wedding reception an infare?"

Response by the white-haired boarder:

"I think she married the old-fashioned man who used to crack his knuckles regularly twice a day."

Important to Mothers

Examine carefully every bottle of CASTORIA, a safe and sure remedy for infants and children, and see that it bears the Signature of Dr. J. C. Fletcher.

In Use For Over 30 Years. Children Cry for Fletcher's Castoria.

Local Color.

"I understand that sixteen different women have brought suit for breach of promise against Ritter. What's his defense?"

"Oh, he claims that he was simply getting material for his annual output of summer love stories."—Puck.

Many a girl would promise to marry a man if she thought he wouldn't be so silly as to expect her to live up to her promise.

FOR HEADACHE—MICKS' CAPSIDINE

Whether from Cold, Heat, Stomach or Nervous Troubles, Capsidine will relieve you. It's liquid—pleasant to take—acts immediately. Try it. 10c., 25c., and 50c. at drug stores.

When a girl yawns it's up to the young man to get in the home stretch.

Faint?

Have you weak heart, dizzy feelings, oppressed breathing after meals? Or do you experience pain over the heart, shortness of breath on going up stairs and the many distressing symptoms which indicate poor circulation and bad blood? A heart tonic, blood and body-builder that has stood the test of over 40 years of cures is

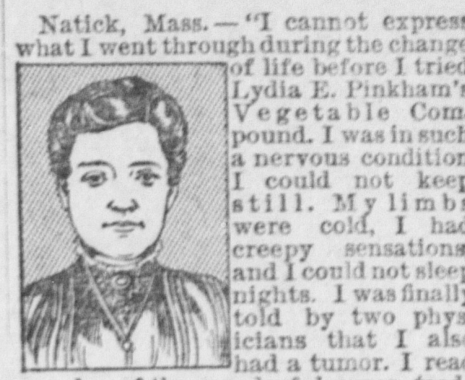

Dr. Pierce's Golden Medical Discovery

The heart becomes regular as clock-work. The red blood corpuscles are increased in number—and the nerves in turn are well fed. The arteries are filled with good rich blood. That is why nervous debility, irritability, fainting spells, disappear and are overcome by this alternative extract of medicinal roots put up by Dr. Pierce without the use of alcohol, opium or any other harmful substance.

Ask your neighbor, "Have you been cured of scrofulous conditions, ulcers, 'fever-sores,' white swellings, etc., by taking Dr. Pierce's Discovery. Just the refreshing and vitalizing tonic needed for excessive tissue waste, in convalescence from fevers or for run-down, anemic, thin-blooded people. Stick to this safe and sure remedy and refuse all 'just as good' kinds offered by the dealer who is looking for a larger profit. Nothing will do you half as much good as Dr. Pierce's Golden Medical Discovery.

WHAT I WENT THROUGH

Before taking Lydia E. Pinkham's Vegetable Compound.

Natick, Mass.—"I cannot express what I went through during the change of life before I tried Lydia E. Pinkham's Vegetable Compound. I was in such a nervous condition I could not keep still. My limbs were cold, I had creepy sensations, and I could not sleep nights. I was finally told by two physicians that I also had a tumor. I read one day of the wonderful cures made by Lydia E. Pinkham's Vegetable Compound and decided to try it, and it has made me a well woman. My neighbors and friends declare it had worked a miracle for me. Lydia E. Pinkham's Vegetable Compound is worth its weight in gold for women during this period of life. If it will help others you may publish my letter."—Mrs. NATHAN B. GREATON, 51 N. Main Street, Natick, Mass.

The Change of Life is the most critical period of a woman's existence. Women everywhere should remember that there is no other remedy known to medicine that will so successfully carry women through this trying period as Lydia E. Pinkham's Vegetable Compound.

If you would like special advice about your case write a confidential letter to Mrs. Pinkham, at Lynn, Mass. Her advice is free, and always helpful.

Instead of Liquid Antiseptics or Peroxide

100,000 people last year used

Paxtine Toilet Antiseptic

The new toilet germicide powder to be dissolved in water as needed. For all toilet and hygienic uses it is better and more economical. To save and beautify the teeth, remove tartar and prevent decay.
