THURSDAY, JUNE 8, 1911.

LOCALS.

Mrs. Edward Boob and Mrs. Luther Bower, both of Millheim, spent a few days last week with their sister, Mrs. Harry E. Bible, in Altoona.

Rev. S. A. Snyder and family, who for some weeks have been on a vacation, will return home the latter part of this week. Services will be held in the United Evangelical church, Centre Hall, Sunday evening.

Miss Velma T. Simpkins graduated School of Industrial Art last Thursday June 1st, and returned to Centre Hall a few days ago. She was awarded the first prize in the department of illustration.

Mrs. Foster, wife of Dr. J. V. Foster, of Centre Hall, last week underwent an operation at the Bellefonte Hospital. She is since getting along nicely, and every day is visited by her husband, who frequently is obliged to make the trip during the night time.

Mr. and Mrs. W. H. Meyer made a trip to Mifflinburg in their automobile last Tuesday and while in that place they were guests at the home of in than it generally is. their daughter, Mrs. I. V. Musser. They were accompanied home by their grandson, Harold Musser, who will spend some time in Centre Hall.

The senior and junior classes of the Agriculture Department of Pennsylvania State College left last week on an inspection trip through western Pennsylvania, New York, Maryland, Massachusetts and New Hampshire, returning by way of Philadelphia. They were accompanied by Prof. John Gregg.

Robert, the three-year-old son of Mr. and Mrs. Charles McClellan, of Bellefonte, was painfully though not seriously scalded by falling into a boiler of hot water. Fortunately the boiler was not full at the time, yet the child was injured to such an extent that the services of a physician were required.

The toll house occupied by Isaac Miller will be raised and put into good it where it was, but now you are repair by the pike company. The flood of three weeks ago did great damage to this property, and also to the furniture, carpets, etc., belonging to the Miller family. The pike company will reimburse them for their loss, which, by the way, is not a small

playing about the railroad station, got mixed up with some machinery on the platform. An iron wheel fell, striking the calf of his leg, tearing the flesh and muscles so that it required four or more stitches to sew up the

Farmers are beginning to ask each other, "How soon are you going to cut clover?" The clover is well on, but grasses will need more time to mature until ready for the knife. cause of the prospects of getting a good in an effort to extricate himself. price for the crop when ready to bale.

On of the disappointed Lutherans in Harrisburg is Aaron Hafter, who was elected a delegate to the General Synod which meets at Washington, D. C., and the only layman on the program of the Brotherhood, which assembled last Sunday, in the National Capitol City. The cause for his regret was a break in the machinery of the city eletric light plant, which necessitated his remaining at home and forego the pleasure of attending the sessions of the Brotherhood and Synod.

Company adjusted their loss with the insurance companies with which they held insurance on the Waddle saw mill, which was recently totally destroyed, with entire satisfaction. The work of rebuilding the plant has already been begun. The company is making every effort to take care of the men in their employment, and while some of the men regularly employed on the mill will be idle until it is rebuilt, the others are kept steadily popular druggists have succeeded in employed getting out prop timber, and doing other work.

of Centre Hall, along the Brush Valley pation and dyspepsia. road, improvements have been made to farm buildings. In some instances it was simply an application of paint, pation, dyspepsis and all liver troubles at other points additions were made to that Murray & Bitner are willing to the dwelling houses, and at others, return the price paid in every case barns were enlarged. RUBBING UP THE ARMS.

Said to Have Excellent Results In Cases of Fainting.

When my wife farms, which is miserably often, says a writer in the London medical journal, the Lancet, I do not apply friction in the usual absurd way-rubbing backward and forward, which must alternately check and accelerate the passage of the blood-but, taking hold of one of her hands with my left fiand, I place the tight round her wrist and then pass them firmly up toward her elbow.

Having brought them back loosely to the wrist, I pass them firmly up at the Pennsylvania Museum and again, and when I have repeated the operation two or three times, sometimes on both arms, I have the pleasure of hearing the ejaculation, "I feel better now." When I first had recourse to this means of resuscitating my lady she exclaimed instinctively on two different occasions, without being at all aware that I had had any particular intention, "Oh, that is what I seem to

> From the invariable and immediate effect of this mode of friction I flatter myself that it is not unworthy the notice of the medical practitioner in the friction of cholera patients, a process which should be much oftener resorted to and more energetically persisted

GERMAN RED TAPE.

A Lesson In Picking Up Things In the Streets of Berlin.

Take care how you pick up a thing that is lost in Berlin. The other day one of our deputies going through the Prussian capital on his return from a convention at Frankfort noticed a key at the edge of the sidewalk. He picked it up to hand it to a police agent. The representative of the city police refused to take it, saying, "You should take this key to the special bureau of things that are lost."

"Very well. Where is it?" The agent named the street.

"Is it far from here?" "A half hour, three-quarters of an

hour if you don't walk rapidly." The deputy replaced the key on the pavement, "Some one else will pick it up," he said.

"Not at all," said the agent in a commanding tone. "You should have left and you'll be fined, perhaps given a day in prison. That's the law."

The deputy was compelled to obey orders. Since that day he carries his hand in his pockets.-Cri de Paris.

The Hangman's Stone. John Smith, not the proverbial There is a large bowlder lying in a John Smith, but the little son of John field near Foremark, England, which Mr. and Mrs. Grant Charles and Mrs. Frank Smith, of Centre Hall, while is known throughout Derbyshire as the Sara Stover attended the wedding of "hangman's stone." The exposed portion of the bowlder rises about six feet above the surface of the surrounding field and has a narrow ditch or indentation running across the top. The mark, so tradition says, was made in this way: A sheep thief in the dead of night, while leaning against the bowlder to rest, placed his booty above on the flat surface of the stone. The man had the sheep tied with a rope, and in its effort to escape the creature slipped on the opposite side, and the rope. catching under the thief's chin, choked With hay worth \$20.00 in market, the him to death. The indentation in the farmer is quite willing to undergo the rock was made by the friction of the sweating process in the hay fields, be- rope while the dying man was engaged

A Good Loser. Arthur's, Almack's, Bootle's and White's were the chief clubs of the young men of fashion. There was play, at all, and decayed noblemen and broken down senators fleeced the unwary there. Charles Fox, a dreadful gambler, lost £200,000 at play. Gibbon tells of his playing twenty-two hours at a sitting and losing £500 an hour. That indomitable punster said that the greatest pleasure in life after winning was losing. What hours, what nights, what health did he waste over the devil's books! I was going to say what peace of mind, but he The firm of McNitt-Huyett Lumber took his losses very philosophically. After an awful night's play he was found on a sofa tranquilly reading an eclogue of Virgil-From Thackeray's

People Who Are Interested

in what is done, are generally also interested in how it is done. We are going to tell you. Interest rates in the West have always been higher than in the East. For many years to come, they will be from 1 1-2 to 2 per cent. higher. Look at these figures:

\$1 invested annually for 20 years at 6 per cent., \$38.99.

\$1 invested annually for 20 years at 4 per cent., \$30.97.

Difference in favor of 6 per cent. on \$1 per year, \$8.02.

If you are investing \$100 per year, the difference in favor of western securities would be \$802. It is no wonder that the best returns are secured in the
